Re-imagining Offshore Finance

Market-dominant Small Jurisdictions in a Globalizing Financial World

Oxford University Press Small jurisdictions have become significant players in cross-border corporate and financial services. Their nature, legal status, and market roles, however, remain under-theorized. Lacking a sufficiently nuanced framework to describe their functions in cross-border finance - and the peculiar strengths of those achieving global dominance in the marketplace - it remains impossible to evaluate their impacts in a comprehensive manner. This book advances a new conceptual framework to refine the analysis and direct it toward more productive inquiries. Bruner canvasses extant theoretical frameworks used to describe and evaluate the roles of small jurisdictions in cross-border finance. He then proposes a new concept that better captures the characteristics, competitive strategies, and market roles of those achieving global dominance in the marketplace - the "market-dominant small jurisdiction" (MDSJ). Bruner identifies the central features giving rise to such jurisdictions' competitive strengths - some reflect historical, cultural, and geographic circumstances, while others reflect development strategies pursued in light of those circumstances. Through this lens, he evaluates a range of small jurisdictions that have achieved global dominance in specialized areas of cross-border finance, including Bermuda, Dubai, Singapore, Hong Kong, Switzerland, and Delaware. Bruner further tests the MDSJ concept's explanatory power through a broader comparative analysis, and he concludes that the MDSJs' significance will likely continue to grow - as will the need for a more effective means of theorizing their roles in cross-border finance and the global dynamics generated by their ascendance.

Geopolitics at the End of the Twentieth Century

The Changing World Political Map

Routledge An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries, but also to traditional notions of state, boundaries, sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering, with an emphasis on Eastern Europe and South Asia. They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno-territorial demands; as borders are transversed by the movement of peoples, information and finance; and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed. Each section ends with articles which focus on literature on geopolitics and boundaries. This is an invaluable addition to our understanding of contemporary world affairs.
