What Do Principals Do? A Study of a Principal's Job and How Long It Takes To Do It IAP What Do Principals Do? provides a comprehensive and expansive look into a high school principal's job. Rather than a survey asking principals how much time they spend on various tasks, this work provides empirical evidence of exactly what a principal does every day of the year and how much time he spends doing it. Based on the results of a three-year longitudinal study conducted by a California High School Principal of the Year (Association of California School Administrators, 2012), this book reveals precisely what a principal does, when he does it, and how much time he spends doing it. The study identifies 72 discrete tasks performed by principals and examines how much time (disaggregated by day, week, month, and year) they spend on each of those 72 tasks. The results of the data collection are the foundation of the book. The findings are supplemented with explanations and analyses that reveal the workings of K-12 education and give readers a glimpse of life in a comprehensive high school. This is a must read for everyone considering a life in public school administration. The author, Dr. Jonathan Hurst, the longest running principal in Elsinore High School's 130-year history, provides insightful commentary and relevant anecdotes from a rich and rewarding career served in a large comprehensive high school in Southern California. This book provides detailed, quantitative evidence and an explanation for just what a principal does and how much time he spends doing it. In the process, it demonstrates the requisite skills for effective school governance, administrative multi-tasking, and productive principal behavior. Data collected covers three years and encompasses over 20,500 tasks and 7,500 hours of work. This is a useful augmentation to existing administrative credential course readings as it provides evidence for what the research and authors are saying and demonstrates those skills, procedures, and operations that are an everyday part of a school administrator's job. But the appeal for What Do Principal's Do? goes beyond those seeking knowledge about educational administration. Besides the facts and figures about how a principal spends his time, Dr. Hurst offers explanations for why and how the time is spent, and he provides insight into the educational scene. This book has appeal for students in teacher education programs, because it explains school communities and life in a school system, and that also makes it appealing to the lay person or parent who wants to understand how schools work. (SM) The Successful Principal Concrete Strategies and Essential Advice Rowman & Littlefield The Successful Principal takes its reader through the arc of the principalship, beginning with teaching, moving on to promotion to the administrative office and how to achieve it, describing how to go about entry planning, going into depth about the challenges and opportunities the principal faces in leading a school, and moving into a focus on how to thrive as a principal while growing the skills of others. This is a book designed to give principals advice on how to do the job well. The book is buttressed by research where appropriate, and it pays particular attention to the principal's basic conundrum, which is this: while he/she is arguably the face and leader of the school, he/she is often the person with the least actual power in the system. The book takes a realistic look at the principal's power, opportunities, and structural and political limitations and then teaches its readers how successful principals find a way forward in spite of those challenges. Pushing the Limits The Female Administrative Aspirant State University of New York Press By providing new understanding and insights into the backgrounds and experiences of women pursuing administrative careers in education, Pushing the Limits fills a critical void in the existing literature. Sakre Edson's five-year investigation documents the accounts of 142 nonminority and minority women across the United States seeking administrative roles—an area of public school responsibility where women remain underrepresented. Edson's book is unique in its focus on aspirants—those women currently preparing and competing for principalships and other top administrative positions—rather than on established female administrators or on women who have chosen not to aspire beyond the classroom. The female teachers, graduate students, and entry-level

administrators quoted here give voice to the struggles would-be female school executives face, and their experiences and reflections not only question the impact of the women⬜s movement and equity legislation upon employment practices, but serve to illuminate the problems of women and minorities excluded from managerial ranks in professions outside of education. Throughout the work one theme prevails: As they push the limits of this traditional male bastion, these women are confident in their abilities to succeed and even to excel in managing the nation⬜s schools. English Learners Left Behind Standardized Testing as Language Policy Multilingual Matters In the wake of recent federal legislation entitled No Child Left Behind, high-stakes standardized testing for accountability purposes is being emphasized in educational systems across the U.S. for all students – including English Language Learners (ELLs). Yet language proficiency mediates test performance, so ELLs typically receive scores far below those of other students. This book explores how tests have become de facto language policy in schools, shaping what is taught in school, how it is taught, and in what language(s) it is taught. In New York City, while most schools responded to testing by increasing the amount of English instruction offered to ELLs, a few schools have preserved native language instruction instead. Moreover, this research documents how tests are a defining force in the daily lives of ELLs and the educators who serve them. Quechua-Spanish Bilingualism Interference and Convergence in Functional Categories John Benjamins Publishing This book addresses how cross-linguistic interference is represented in the bilingual mind. Examining novel oral production data from older bilingual children representing two Quechua varieties, this research concludes that interference in the feature specification of functional categories leads to language change in a language contact situation, and links convergence, a common set of feature values for the same functional category in both languages to the activation of features related to the informational structure of the sentence. These mechanisms are illustrated in detail by the presence of overt determiners, canonical SVO word order and the absence of accusative marking in bilingual Quechua and by neutralization of case and gender distinctions in direct object pronouns as well as in the emergence of null pronouns with definite antecedents in bilingual Spanish.
