Comprehending as without difficulty as deal even more than extra will offer each success. next to, the revelation as capably as perception of this Care Social And Health can be taken as with ease as picked to act.

KEY=HEALTH - JAIDYN OSCAR

The Textbook of Health and Social Care

SAGE A comprehensive textbook designed to guide students through the entirety of a Health and Social Care BSc degree. Covering the important topics and pressing issues relevant to Health and Social Care today. The book's three part structure starts with the essential areas and core knowledge, including the sociology and psychology of illness, the research process, key legal and ethical issues and reflective practice. The second part covers aspects of health and social care in practice, like health promotion, safeguarding children and their rights, and working with people experiencing mental health disorders. Finally, the third part considers some of the challenges faced in present day health and social care, looking at social justice issues, legal and ethical considerations, leadership, and health inequalities. All content is supported by practical and reflective features to help students throughout their degree, these include: interactive activities, real life case studies and examples related to chapter content, links and suggestions for further reading, and answers to key activities and case study exercises. The perfect companion text for anyone studying a Health and Social Care degree, or any other course related to the health and social care services.

The short guide to health and social care

Policy Press As a field, health and social care is facing considerable challenge and debate, in the UK and internationally. This clear and succinct text offers a valuable introductory guide to this multidisciplinary subject, helping people who want to study or work in health and social care understand why these services matter, how they have developed and how they work. Framed by vital historical and social policy context, the book considers:

- The social context in which health and social care are delivered
- The history and nature of current services
- Organising, funding and delivering services
- How to be a professional in practice

Including chapter summaries and links to further reading, this text will be invaluable to undergraduate students on programmes in Health and Social Care, Social Work, Nursing, Allied Health Professions, Social Policy and related applied social science subjects, as well as to A-level and Foundation programmes prior to University.

Integrating Social Care into the Delivery of Health Care

Moving Upstream to Improve the Nation's Health

National Academies Press Integrating Social Care into the Delivery of Health Care: Moving Upstream to Improve the Nation's Health was released in September 2019, before the World Health Organization declared COVID-19 a global pandemic in March 2020. Improving social conditions remains critical to improving health outcomes, and integrating social care into health care delivery is more relevant than ever in the context of the pandemic and increased strains placed on the U.S. health care system. The report and its related products ultimately aim to help improve health and health equity, during COVID-19 and beyond. The consistent and compelling evidence on how social determinants shape health has led to a growing recognition throughout the health care sector that improving health and health equity is likely to depend "at least in part" on mitigating adverse social determinants. This recognition has been bolstered by a shift in the health care sector towards value-based payment, which incentivizes improved health outcomes for persons and populations rather than service delivery alone. The combined result of these changes has been a growing emphasis on health care systems addressing patients' social risk factors and social needs with the aim of improving health outcomes. This may involve health care systems linking individual patients with government and community social services, but important questions need to be answered about when and how health care systems should integrate social care into their practices and what kinds of infrastructure are required to facilitate such activities. Integrating Social Care into the Delivery of Health Care: Moving Upstream to Improve the Nation's Health examines the potential for integrating services addressing social needs and the social determinants of health into the delivery of health care to achieve better health outcomes. This report assesses approaches to social care integration currently being taken by health care providers and systems, and new or emerging approaches and opportunities; current roles in such integration by different disciplines and organizations, and new or emerging roles and types of providers; and current and emerging efforts to design health care systems to improve the nation's health and reduce health inequities.

Professional Social Work Education and Health Care

Challenges for the Future

Routledge Professional Social Work Education and Health Care responds to critical concerns about the educational preparation of social workers within the rapidly changing health care environment. Contributors address issues and questions of importance to educators who are contending with the multiple challenges of rapidly changing institutions, fiscal constraints, and service to populations with complex social health care needs. This coverage provides you with important visions of the future education of leaders in health care social work. The editors of Professional Social Work Education and Health Care present information that looks to the future in order to open the floor for communication among the leaders in health care social work settings. Chapters explain the context of social work practice, explore current social work practice issues, and look into continuing education and fieldwork. In doing so, they give you valuable information about important issues such as: changes in social work department structure and function in challenging economic times collaborative efforts and reciprocal relationships in education and training emergence of networks that will join forces with hospitals preparation for short-term, solution-based social work the remaining need for traditional, long-term social work frameworks and values the shift in ideology to viewing clients as consumers rather than patients modification of curriculum to focus on parenting, health education, adolescent pregnancy prevention, and wellness programs emergence of a model for post-master's education field work in community-based health care placements versus inpatient hospital settings This book's model for making education and practice responsive to each other and for responding to the needs for collaboration makes it a valuable resource for social work educators, practitioners, and clinicians in health and mental health; advanced gerontologists in academic and practice agencies; and teachers of policy and research in health concentrations in schools of social work. Professional Social Work Education and Health Care is an excellent ancillary text for advanced undergraduate and graduate courses in social work practice in health and mental health and is a strong addition to reading lists for classes on social work with the aged, social work research in health care, and field work seminars in health and mental health.

Health and Social Care in the Digital World

Meeting the Challenge for Primary Care

CRC Press This provocative and timely book examines the current state of primary care practice and outlines a new vision for the delivery of primary care services, primarily in the UK but also internationally. Encouraging a social compact between citizens, governments and the providers of care, the book describes how this will necessitate a redesign of the welfare sector to ensure it is 'fit for purpose' in the digital world. It explores the respective roles of the inverse care law and the rule of halves, systems theory and learning organisations, mutuality and active citizenship, and how these can be applied to improve service delivery. Key Features Offers an alternative approach to thinking and a challenge to leaders within primary care and to those with administrative responsibility for the sector Reflects the multiple challenges facing primary care, including the rise in frail elderly patients, increasing multi-morbidities, the impact of changing demography with migration and much more Sets these challenges in a context of increasing workforce pressures, including changing attitudes to professionalism, burnout and recruitment difficulties Outlines a road map for improvement responding to current challenges around social care as well as digital/e-health Aimed at, and written for, all those committed to improving the future of the primary care sector in the UK and internationally, this important book will be of interest to students, clinicians, managers, commissioners, policy makers and service users. The Author Nigel Starey is a practicing GP, an academic GP and an advisor for the Care Quality Commission, UK.

Key Themes in Health and Social Care

A Companion to Learning

Routledge Key Themes in Health and Social Care is a learning resource for students in health and social care. It provides an overview of foundational issues and core themes in the field and introduces key areas of debate, moving from an introductory level to in-depth discussion as the book progresses. Divided into three parts: the first part sets the scene, addressing introductory psychology and sociology, social policy, equality and diversity, skills for practice, and working with people the second part considers key themes such as the contribution of philosophy and politics; criminal justice; management of services; the relationship between place and wellbeing; research in health and social care; theories of counselling; housing and the built environment the third part looks at discrete areas of practice such as mental health; substance abuse, protection work; health promotion; disability studies; working with men; child welfare and public responsibility. Each chapter begins with an outline of the content and learning outcomes and includes reflective exercises to allow students to reflect on what they have read, review their learning and consolidate their understanding. Time-pressed readers wanting to 'dip into' the book for relevant areas can do so but, read from cover to cover, the book provides a comprehensive introduction to the key areas of contemporary health and social care practice. It will be particularly helpful for students undertaking health and social care undergraduate and foundation degrees.

Narrative-Based Practice in Health and Social Care

Conversations Inviting Change

Routledge *Narrative-Based Practice in Health and Social Care* outlines a vision of how witnessing narratives, paying attention to them, and developing an ability to question them creatively, can make the person's emerging story the central focus of health and social care, and of healing. This text gives an account of the practical application of ideas and skills from contemporary narrative studies to health and social care. Promoting narrative-based practice in everyday encounters with patients and clients, and in supervision, teaching, teamwork and management, it presents "Conversations Inviting Change," an established narrative-based model of interactional skills. Underpinned by an account of theory from narrative studies and related fields, including communication theory and systems thinking, it is written for students and practitioners across a broad range of professions in primary and secondary health care and social care. More information about "Conversations Inviting Change" is available at www.conversationsinvitingchange.com. This website includes podcasts, presentations and further teaching material as well as details of forthcoming courses, and is continually updated with information about the approach described in this book.

Developing Professional Practice in Health and Social Care

Taylor & Francis Addressing the changing world of professionalism, this text combines theory, research and practice, using real case studies, to investigate the process of becoming professional. Mapping the journey from allied or associate practitioner positions through qualifying and into advanced practitioner status, it is a valuable companion for health and social care, social work and allied health students from the beginning of their studies. *Developing Professional Practice in Health and Social Care* is an accessible text, including case studies, reflective exercises and activities, chapter aims and summaries and further reading boxes throughout. It covers: the context for professional practice, including historical perspectives, policy and discussion of relevant competencies and frameworks the concept of professionalism, exploring what it means to be a professional values and ethics underpinning professional practice professional identity development, including formation and changes in identity professional practice in complex environments, paying particular attention to working in organisations becoming a critical and globally aware practitioner the role of evidence and knowledge in professional practice working with supervision. Maintaining a strong focus on the ethical dimensions of professional practice, this text emphasises how health and social care practitioners can contribute to social justice and challenge social exclusion.

Foundations of Health and Social Care

Bloomsbury Publishing Written specifically for students and practitioners in health and social care taking foundation degrees or further professional qualifications, this textbook offers a wealth of material on contexts, knowledge bases, skills and practices, as well as dealing with work carried out by those involved in treatment, therapy, advocacy and management. Written in very accessible style, this very comprehensive book is set to become a core text for all Foundation Degree students within the health and social care field, and a very valuable resource for tutors and practitioners in the field.

Changing Practice in Health and Social Care

SAGE *New Ways of Working in Health and Social Care* explores the range and depth of recent challenges facing professionals in health and social care.

Understanding Health and Social Care (third Edition)

Policy Press This engaging and accessible text, now in its third edition, provides a comprehensive introduction to health and social care. This new edition has been updated to cover recent developments, including the integrated care agenda, potential regional devolution and austerity.

Body Work in Health and Social Care

Critical Themes, New Agendas

John Wiley & Sons The first book to fully explore the multiple ways in which body work features in health and social care and the meanings of this work both for those employed to do it and those on whose bodies they work. Explores the commonalities between different sectors of work, including those outside health and social care Contributions come from an international range of experts Draws on perspectives from across the medical, therapeutic, and care fields Incorporates a variety of methodological approaches, from life history analysis to ethnographic studies and first person accounts

The Body in Health and Social Care

Bloomsbury Publishing Focusing on health and social care, this book shows how important the body can be to a range of issues such as disability, old age, sexuality, consumption, food and public space. Twigg illustrates how constructions of the body affect how we see different social groups and explores the significance of it in the provision and delivery of care.

Your Foundation in Health & Social Care

A Guide for Foundation Degree Students

SAGE Written to accompany the Foundation degree in Health and Social Care, and other higher education courses in the same area, this book offers a user-friendly approach to help you make the most of your course. Matched to the Foundation Degree guidelines, *Your Foundation in Health and Social Care* gives you the knowledge and skills necessary for effective learning both in academia and in the workplace. The book includes: - Case studies drawn from a range of health and social care settings to illustrate 'real-life' practice; - Suggested Essay Topics, Activities and Further Research features that encourage you to develop your knowledge and understanding; - Study Skills tips and guidelines for approaching learning; Written in a lively and engaging style the comprehensive content and jargon-free approach will make this book invaluable for students. It will be a core text for those studying Foundation degrees and higher education courses in health and social care.

Social Work in the Health Field

A Care Perspective, Second Edition

Routledge Use your social work skills to advocate for more effective health care! *Social Work in the Health Field: A Care Perspective, Second Edition* updates this comprehensive guide to social work practice and policy issues in the health field. An easy-to-use textbook for graduate and undergraduate courses and a practical guide for social work practitioners, the book will help you meet the demands of the growing population of clients in nursing homes or hospice care and for the decline of traditional hospital-based social work. Complete with an instructor's manual to help you facilitate lectures, class discussions, and tests, this new edition focuses even more strongly than the first on prevention and health promotion at the community level as well as the individual client level, the relevance of social environmental conditions to the health of populations, and the growing importance of social work in the health field. *Social Work in the Health Field: A Care Perspective, Second Edition* is an overview of social work practice in various health care settings. The book addresses the historical background of social work in health care, theoretical perspectives, organizational considerations, theory and practice of interdisciplinary teamwork, client problems, skill and knowledge requirements, values and ethics considerations, and recent developments in hospital social work. New material in this edition includes: an update on primary health care—how social workers can modify communities and social environmental conditions to reduce social inequities and enhance social supports and integration within populations an updated critique of the health care system in the United States—what social workers need to know and the changes they need to make to advocate effectively updates on research findings and statistical data Praise for the first edition of *Social Work in the Health Field*: "VERY USEFUL TO STUDENTS. . . . One of the few works available that includes a useful discussion of social work practice in nursing homes." —Choice "EFFECTIVE. . . . presents generic and special knowledge requirements for social work practice in health care settings, including values, ethics, and issues of diversity." —*Social Work Agenda* "The book is CLEARLY WRITTEN, and is thought-provoking concerning the role of the social work practitioner in health settings and the nature of the linkage between health and social care. Despite the fact that it is American in origin, it is of relevance to multi-disciplinary and international audiences and contains much which will be OF INTEREST TO STUDENTS AND EDUCATORS AS WELL AS PRACTITIONERS." —*Journal of Social Work*

Working with Men in Health and Social Care

SAGE *Working with Men in Health and Social Care* is a very welcome contribution to the stock of books on men and masculinities. It is especially useful for those interested in direct practice and policy applications in the fields of welfare, and for those who work with the problems men create, the problems men experience, and their interconnections' - Jeff Hearn, co-editor *Men and Masculinities*, University of Huddersfield and Linköping University *Working with Men in Health and Social Care* is an important and timely book that introduces the complex issues and debates involved in working with men in a range of professional settings. The authors locate academic and popular discourse on masculinities within the specific context of health and social care settings, critically analysing the theory and policy that underpin and inform practice, and continually linking theoretical frameworks to 'real-life' practice examples. Section 1 contextualises the topic with a discussion of gender theory, social policy and the occupational culture of relevant organisations Section 2 provides a summary of practice models, examining practice with men as individuals, as well as in groups, families and communities Section 3 is organised according to specific groups of service users and includes chapters on fathers, abusive men, physical and mental health, boys, and older men This thought-provoking and topical book will be essential reading for students and academics in social work, health care, probation, counselling, and allied disciplines, and for those facing the reality of working with men in their day-to-day practice.

Social Work in Health Care Its Past and Future

SAGE This book is a comprehensive look at the US healthcare industry from its historical development to its current status. It pays particular attention to four domains of health care and the role that social workers play in these roles in the present day and in the future.

Managing in Health and Social Care

Routledge *Managing in Health and Social Care* is a practical textbook for students of management in health and social care, whether at undergraduate or postgraduate level. It includes case studies with textual commentary to reinforce learning, activities, key references and clear explanations of essential management tools and concepts.

Intellectual Disability in Health and Social Care

Routledge Many practitioners within health and social care come into contact with people with intellectual disabilities and want to work in ways that are beneficial to them by making reasonable adjustments in order to meet clients' needs and expectations. Yet the health and wellbeing of people with learning disabilities continues to be a neglected area, where unnecessary suffering and premature deaths continue to prevail. This text provides a comprehensive insight into intellectual disability healthcare. It is aimed at those who are training in the field of intellectual disability nursing and also untrained practitioners who work in both health and social care settings. Divided into five sections, it explores how a wide range of biological, health, psychological and social barriers impact upon people with learning disability, and includes: Six guiding principles used to adjust, plan and develop meaningful and accessible health and social services Assessment, screening and diagnosis of intellectual disability across the life course Addressing lifelong health needs Psychological and psychotherapeutic issues, including sexuality, behavioural and mental health needs, bereavement, and ethical concerns. The changing professional roles and models of meeting the needs of people with intellectual and learning disabilities. *Intellectual Disability in Health and Social Care* provides a wide-ranging overview of what learning disability professionals' roles are and provides insight into what health and social care practitioners might do to assist someone with intellectual disabilities when specific needs arise.

Leading Change in Health and Social Care

Routledge Learning is at the heart of change. This book breaks new ground in exploring the need for individuals to engage in personal change, through learning, as an essential part of achieving significant change in organisations. It explains how to engage with people's energy, enthusiasm and abilities to enable them to think and do things differently. Providing an overview of leadership theories and a practical guide to management tools and techniques, *Leading Change in Health and Social Care* is illustrated throughout with examples drawn from health and social care settings. Key topics covered include: * contemporary models of transformational leadership * learning as the foundation of personal and organisational change * systems thinking as a way of understanding change in complex services * visions of a better future and how to develop them * values and how they influence our choice of direction * inspiring ourselves and others to take action. This is a book for everyone who wants to improve health and social care services and enhance the experience of patients and service users. It assumes no previous knowledge of change management and is appropriate for students, teachers, trainers and professionals.

Health and Social Care (Adults)

Heinemann This candidate handbook provides comprehensive coverage of everything candidates need for success in this new qualification.

Advanced Health and Social Care for NVQ Level 4 and Foundation Degree

Pearson Education Ltd Totally revised to reflect the latest legislation, occupational standards and best practice - so candidates have the up-to-date information they need to succeed.

Social Policy for Health and Social Care

Hodder Education Both A Level and vocational social science courses are increasing their emphasis on social policy issues and this book is written to meet the needs of these courses. It also includes coverage of European social policy issues.

Health & social care (adults)

S/NVQ level 3

Pearson Education Ltd This candidate handbook provides comprehensive coverage of everything candidates need for success in this new qualification.

Values for Care Practice

In this book, students will be encouraged to critically analyse their personal value base and those underpinning health and social care work. They will explore values in general and reflect on how these are articulated in Codes of Practice.

Values-Based Health & Social Care

Beyond Evidence-Based Practice

SAGE Is evidence-based practice really best practice? This is a hotly debated question in health and social care circles and the starting point for this book. Engaging firmly in the debate, *Values-Based Health & Social Care* calls into question the dominance of evidence-based practice and sets out an alternative vision of care which places holism, professional judgement, intuition and client choice at its centre. Bringing together writers from a range of health and social care backgrounds, the book describes the rise of evidence-based practice and explores major criticisms of the approach. It argues that evidence should be seen as part of a broader vision of practice which places equal value on: - a holistic vision of the needs of patients and clients. - professional knowledge and intuition, and - seeing patients and clients as partners in their care. Examples are used throughout the book to help readers link the concepts to practice. The book concludes with suggestions on how to develop a values-based approach in practice and through professional education. *Values-Based Health & Social Care* sets out key debates surrounding the nature of practice which will be of interest to students and practitioners alike.

Health & Social Care

S/NVQ Level 2

Heinemann This candidate handbook provides comprehensive coverage of everything candidates need for success in this new qualification.

Critical Practice in Health and Social Care

SAGE This major new textbook will take a fresh look at professions and professionalism - what these terms mean and what they need to mean in the future in the health and social care field. Written by experienced teachers, the textbook: reviews the evidence on team and inter-professional working, teasing out the new perspectives and the skills required; examines what professional development entails and what it means in different fields of practice; tackles ethical dilemmas of practice alongside changing concepts in society of accountability; explores current debates about how professionals can be supported in their practice and how their performance is best regulated; and highlights the contribution that practitioners can make

Health and Social Care

Heinemann Fully up-to-date with a lively format, this student book contains a wide variety of features which will inspire students to engage with their learning. Contains the four mandatory units and four of the most popular option units - everything needed to pass this award. A range of activities thoroughly prepare candidates for assessment, and lively illustrations and colour photos engage students with the content covered. The authors have worked closely with OCR on the development of the course, fully understanding the OCR National requirements.

Understanding Health and Social Care

An Introductory Reader

SAGE This introductory text provides a wide-ranging collection of key readings in the field of health and social care. The book features classic readings alongside articles reflecting the most recent theoretical and empirical work. Cutting across the conventional divide between health care and social care, the Reader sets out to link policy to practice in a tangible way, juxtaposing the voices of a range of carers and service users with insights from academic debate and research. The Reader is divided into five sections focusing on: the experience of caring or being cared for; the environment in which care takes place; the ways in which care has been conceptualized; issues of abuse in care settings; and the pol

Commissioning for Health and Social Care

SAGE This practical text takes you methodically and logically through the challenging task of commissioning and procuring public services across the health and social care sector. Split into four parts, it moves step-by-step through each stage of the commissioning cycle established by the Institute: Plan Do Review Analyse Chapters include key terms which support learning, case studies which help you apply the theory to different contexts and exercises which encourage reflection. The book is essential reading for those taking postgraduate courses in commissioning and those studying management and leadership in health and social care at postgraduate level. It is also valuable reading for professionals working in the health and social care sector.

Effective Practice in Health, Social Care and Criminal Justice

McGraw-Hill Education (UK) "There is a growing body of literature surrounding the incorporation and complexity of partnership working within service delivery and whilst this edited book adds to that knowledge, it places a specific focus on highlighting examples of best practice within the field of health, social care and criminal justice..... In short, anyone working within the range of areas addressed here is likely to find something of value and, therefore, the book fits with the editors' suggested audience of practitioners, students and managers who increasingly have to work in a joined-up way as part of mainstream business." Michelle Jolley, PhD Student, School of Law, University of Plymouth, UK in *The Howard Journal* May 2010 "It would be a rare practitioner or manager whose daily round does not include some partnership activity. Yet, glitzy conferences notwithstanding, how often is its practice, let alone its theory properly examined and its value evaluated within those partnership agencies? This is the second edition of a book which aims to do this ... It is worth obtaining this book for Chapter 16 alone. Entitled 'On the receiving end: Reflections from a service user', it should be compulsory reading for every practitioner, manager and politician for its matter-of-fact yet piercing account of being a service user." *Journal of Health and Social Care in the Community* Volume 18 Issue 1, Published Online: 15 Dec 2009 "The second edition ... offers the reader a range of chapters that consider some of the key areas of social and health care where partnership working can be effective ... The central theme of partnership working is an important one at a time when it has yet again been painful to see how departments, organisations and agencies have failed the vulnerable in preventing some horrendous criminal acts ... this book is a welcome addition to the increasing number of texts that are now addressing working across departmental and organisational boundaries." *British Journal of Social Work* "Contemporary health and social care requires practitioners to develop effective partnerships with patients and clients and with the wider service workforce. This text is designed to promote the development of such partnerships and demonstrates the ways in which partnership can work effectively in practice... This text is clearly written with all the health and social care professions in mind and will prove to be an invaluable resource for students and trained staff alike." Margaret Chambers, Lecturer in Children's Nursing, University of Plymouth, UK Comprehensive yet concise, this text addresses many of the main social and health issues facing society today, and incorporates a practical focus to demonstrate partnership working. The new edition of this popular book has been updated to include new chapters on the partnership approach in criminal justice and provides a practical and theoretical insight into some of the issues when working in collaborative partnership with other agencies. The text examines the partnership approach to delivering services in relation to: Child protection Mental health Gypsy travellers Domestic violence Drug misuse Homelessness Old and young people HIV and AIDS The first section of the book examines the nature of partnership in relation to concepts, politics, diversity, ethics and information technology. The second edition incorporates knowledge from a range of carefully selected contributors, using their expertise with particular user groups to illustrate where collaboration is crucial for effective practice. The final section reflects upon what has been learnt about partnership work and includes reflections from a service user and a chapter on evaluation. *Effective Practice in Health, Social Care and Criminal Justice* is an essential text for students, practitioners and managers from a variety of human service agencies, and is a must-read for anyone working in a multi-agency partnership.

Health and Social Care Research Methods in Context

Applying Research to Practice

Routledge This is the first textbook to show how research using a range of qualitative and quantitative methods relates to improving health and social care practice. The book shows how different research approaches are undertaken in practice and the challenges and strengths of different methodologies, thus facilitating students to make informed decisions when choosing which to use in their own research projects. The eleven chapters are each structured around different research methods and include: A brief overview of the research and research question Identification and overview of the research approach and associated methods selected to answer this question The sample and recruitment, including issues and challenges Ethical concerns Practical issues in undertaking the research approach Links between the research process and findings to health and social care values Links to the full research study Further reading The book will be a required reading for all students of social work; social care; nursing; public health and health studies and particularly suitable for those on widening participation courses.

Systems Leadership in Health and Social Care

Routledge Most leadership development activity in health and social care has been intra-organisational or confined to a particular sector. However, there is increasing recognition of the need to move beyond simple collaboration and partnership and work towards different models of care which involve addressing the whole health and social care system. This is particularly important when addressing complex and 'wicked' problems in a time of resource scarcity. This book provides a much-needed guide for individuals, professionals, and organisations making the shift towards working in radically different ways in this current climate. It provides a rationale for systems leadership, describing the basic underlying principles behind it and their origins, and explores the various aspects of it, with particular emphasis on the development of systems leaders in health and social care. It also captures good practice, which is illustrated by a number of case studies, and suggests further reading on the topic. Combining theory with practice, this book will be essential reading for those studying on courses in public service, public policy, health and social care, as well as policymakers and professionals interested in honing best practice.

Evaluating Outcomes in Health and Social Care

Policy Press In recent years collaborative working has moved from being an optional extra of public service practice to being a core competency for individuals and teams. Has this led to better outcomes for those who use services? How to understand and to measure these outcomes and demonstrate these to a variety of different audiences remains a significant challenge for many. This revised edition of this bestselling textbook includes the latest research findings and contains more tools, frameworks and international examples of best practice to aid practitioners to more effectively evaluate partnerships. Up-to-date research evidence is presented in a practical and helpful way, making this an essential resource for students.

Care Management in Social and Primary Health Care

The Gateshead Community Care Scheme

Routledge This title was first published in 2003: This book provides an evaluation of the Gateshead Community Care Scheme which was devised as an alternative to residential and hospital care for frail elderly people. An important feature of the scheme was the decentralization of control of resources to individual social workers acting as care managers, with defined caseloads and expenditure limits to ensure accountability. The initial social care scheme was subsequently extended to provide both health and social care to clients from a large general practice based in a health centre. The social care team was enlarged to include a nurse care manager and part-time doctor and physiotherapist. The study examines the operation of care management in both settings, the use of devolved budgets and services developed, the outcomes for clients and carers and the costs of care. Admissions to residential care were reduced and the elderly people who received the scheme's support experienced a better quality of care and greater well-being when compared with elderly people receiving the usual range of services. This was achieved at no greater cost. The characteristics of those for whom the scheme was most appropriate are described. In addition, the pattern of development of the scheme as it was incorporated into the mainstream of the Social Services and after the implementation of the NHS and Community Care Act are examined. Final, the implications for the development of care management are considered.

Vulnerable Groups in Health and Social Care

SAGE Publications Carefully researched and highly readable, this textbook looks at the experiences and health and social needs of key 'vulnerable groups'. It presents an engaging social science perspective relevant to everyone exploring how we, and society, care for the vulnerable. Each chapter defines and explores a vulnerable social group, bringing together theoretical, policy, and practice

perspectives. The lively and engaging style enables the reader to engage with the client group and to reflect upon their own learning and practice in a more meaningful way.

Relating Experience

Stories from Health and Social Care

Routledge This reader provides a diverse selection of accounts of interpersonal communication and relationships in the context of health and social care. Most of the contributions are personal narratives by people using or working in care services; the majority are contemporary and many have been written especially for this anthology. The book also includes other kinds of accounts, including attempts to encapsulate in fictional, poetic and visual form something of the nature of encounters in the context of care. There are sections on changing relationships, the way things happen, the physical context of care, difficult encounters, and working together, as well as cross-cutting themes such as power and diversity. *Relating Experience* is an essential resource for students of social work, nursing, health and social policy, and for all involved in health and social care services, whether as professionals, carers or service users.

S/NVQ level 2 health and social care

Pearson Education Ltd This candidate handbook provides comprehensive coverage of everything candidates need for success in this new qualification.
