Actuaries' Survival Guide

How to Succeed in One of the Most Desirable Professions

Academic Press This book explains what actuaries are, what they do, and where they do it. It describes the ideas, techniques, and skills involved in the day-to-day work of actuaries. This second edition has been updated to reflect the rise of social networking and the internet, the progress toward a global knowledge-based economy, and the global expansion of the actuarial field that has occurred since the first edition. --from publisher description

International Reference Guide to Space Launch Systems

Textbook of Emergency & Trauma Care

JP Medical Ltd This book is a comprehensive guide to emergency and trauma care covering the complete process, from pre-hospital care, rapid and point of care assessment, and triaging, to care of the patient during transfer, and in-hospital care. Beginning with a general overview of emergency care and resuscitation, the following sections discuss the treatment of emergencies and trauma in different systems of the body. A complete section is dedicated to paediatric emergencies. The final chapters cover trauma management, toxicology, disaster management, and environmental emergencies such as thermal and chemical burns, and snake bites. The descriptive text is further enhanced by more than 700 flowcharts, tables, diagrams, clinical photographs, and short notes to assist learning. Key points Comprehensive guide to emergency and trauma care Covers management of emergencies in different systems of the body Includes section on paediatric emergencies Highly illustrated with flowcharts, tables, diagrams, photographs and short notes

Advances in Emergency Treatment Research and Application: 2011 Edition

ScholarlyBrief

ScholarlyEditions Advances in Emergency Treatment Research and Application: 2011 Edition is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about Emergency Treatment in a concise format. The editors have built Advances in Emergency Treatment Research and Application: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Emergency Treatment in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Advances in Emergency Treatment Research and Application: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

The Acquisition of Chinese as a First and Second Language

MDPI This volume, through highly selective and rigorous review processes, has collected eight empirical studies showcasing research advances in multiple domains including child first language, adult additional language, and heritage language acquisition. The studies are theoretically motivated and have adopted a spectrum of innovative methodological strategies to achieve a broader understanding of the nature of learning and the learning process. The volume encompasses a wide range of contents: 1) The L1 and L2 acquisition of syntax, semantics, phonetics, and the syntax-discourse interface; 2) Data comparisons across different learner groups: L1 Chinese children, L2 Chinese learners, and Chinese

heritage speakers; 3) Acquisition of language skills: speaking, listening, and writing; and last but not least, 4) Instructional interventions including consciousness-raising and metacognitive strategy training. The volume is intended to bridge the gap between research and instruction by helping teachers understand their students and their learning. Informed by research, teachers can opt for appropriate pedagogical approaches and instructional conditions for their students. The volume is guest-edited by Xiaohong Wen, Professor in Applied Linguistics and Chinese language Acquisition at the University of Houston.

The International Handbook of Parental Alienation Syndrome

Conceptual, Clinical and Legal Considerations

Charles C Thomas Publisher The dramatic increase in the number of child-custody disputes since the seventies has created an equally dramatic need for a standard reference work that examines the growing social problem of children who develop an irrational hatred for a parent as the result of divorce. **The International Handbook of Parental Alienation Syndrome: Conceptual, Clinical, and Legal Considerations** features clinical, legal, and research perspectives from 32 contributors representing eight countries, building on the work of the late Dr. Richard Gardner, a pioneer in the theory, practice, diagnosis, and treatment of Parental Alienation Syndrome (PAS). This unique book addresses the effects of PAS on parents and children, discusses issues surrounding reconciliation between parent and alienated child, and includes material published for the first time on incidence, gender, and false allegations of abuse in PAS. Content highlights examines PAS and the roles of family members, the criminal justice system, and the need for public awareness and policymakers to respond to PAS. Descriptive statistics on 84 cases are given, and the factors affecting reconciliation between the child and target parent are listed. The mild, moderate, and severe categories of PAS are explored, and the psychological consequences of PAS indoctrination for adult children of divorce and the effects of alienation on parents are researched. The role of medical reports in the development of PAS, sexual abuse allegations, and future predictions on the fate of PAS children are many of the clinical considerations in this book. The legal issues concern PAS in American law, criticisms of PAS in courts of law, protecting the fundamental rights of children in families, family law reform, International PAS abductions, and the legal requirements of experts giving evidence to courts. The impact and implications of PAS are immense, and no other single source provides the depth and breadth of coverage of the topic than the clinical and forensic chapters in this book.

Energy Research Abstracts

The International Guide to English Language Programs

Covering: Australia, Canada, New Zealand, the UK, and USA. Includes: over 150 comprehensive program profiles; course descriptions and dates; program costs and admissions.

Monthly Catalogue, United States Public Documents

Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971

Energy Research Abstracts

Semiannual, with semiannual and annual indexes. References to all scientific and technical literature coming from DOE, its laboratories, energy centers, and contractors. Includes all works deriving from DOE, other related government-sponsored information, and foreign nonnuclear information. Arranged under 39 categories, e.g., Biomedical sciences, basic studies; Biomedical sciences, applied studies; Health and safety; and Fusion energy. Entry gives bibliographical information and abstract. Corporate, author, subject, report number indexes.

Current Trends in Histocompatibility

Volume 1 Immunogenetic and Molecular Profiles

Springer Science & Business Media Information about histocompatibility antigens is expanding so rapidly that it is difficult to remain abreast of aB advances. In these volumes, we have made an effort to bring together the most current work on topics that have generated most of the re cent advances and discussions. We have asked each author to present and interpret his most current work, and we have judiciously refrained from imposing our own prejudices and viewpoints. Although there is obvious overlap in some individual topics, we have encouraged this to provide the reader with as many different and some times opposing viewpoints as possible. This approach will, we liope, give a broad overview of current ideas in the field. We wish to thank all contributors for their timely and exciting manu scripts, and we sincerely hope that the reader will benefit from these volumes. R. A. Reisfeld S. Ferrone La Jolla ix Contents I. Serology and Genetics Chapter 1 Studies of HLA-DR Antigens by Complement Fixation Jacques M. Colombani, Laurent Degos, Virginia Lepage, Helene Dastot, Muriel Reboul, and Pierre Lethielleux 1. Introduction. 3 2. Material and Methods. 3 3. Results and Discussion 4 3. 1. Screening for Anti-HLA-DR Complement-Fixing Sera 4 3. 2. Discovering Research Methods in Psychology

A Student's Guide

John Wiley & Sons This study presents a student-friendly introduction to the principal research methodology techniques of psychology. Using a narrative approach, the text explains the complexities of research and the vital role it has played in the development of the field.

Executive Functions in Children's Everyday Lives

A Handbook for Professionals in Applied Psychology

Oxford University Press Executive Functions in Children's Everyday Lives captures the diversity and complexity of the executive system that underlies children's everyday life experiences. Acquisition of executive functions, such as interpreting communication cues and the perspectives of others, is foundational to and a function of children's early social and communicative competencies. From the soccer field to the classroom, executive functions support children's strategic thinking and control of their environment. Knowing about executive functions and how this system of cognitive resources emerges in young children is important in understanding children's development. Recent research points to the importance of also considering environmental influences on the executive system. This book is unique in its focus on how experiences in children's early lives influence and are influenced by executive functions. Viewing executive functions through this broad lens is critical for professionals who intervene when children's access to executive functions is less than optimal. This book addresses a wide range of topics, including the neurological basis of executive functions in young children, the assessment of children's executive functions, theoretical and historical conceptions of executive functions, the relations between executive functions and theory of mind, multilingualism, early school transitions, and the relationship of executive functions to Autism and ADHD. This volume will be useful to professionals in applied psychology, undergraduate and graduate students, and social science and applied researchers.
