*Springer Science & Business Media Imagine mathematics, imagine with the help of mathematics, imagine new worlds, new geometries, new forms. This book is intended to contribute to grasping how much that is interesting and new is happening in the relationships between mathematics, imagination and culture. With a look at the past, at figures and events, that help to understand the phenomena of today. It is no coincidence that this volume contains an homage to the great Italian artist of the 1700s, Andrea Pozzo, and his perspective views. Theatre, art and architecture are the topics of choice, along with music, literature and cinema. No less important are applications of mathematics to medicine and economics. The treatment is rigorous but captivating, detailed but full of evocations, an all-embracing look at the world of mathematics and culture*

#### IMAGINE A METROPOLIS

---

---

#### ROTTERDAM'S CREATIVE CLASS, 1970-2000

---

*Q10 Publishers The cultural climate of Rotterdam changed radically between 1970 and 2000. Opinions differ as to what the most important changes were and when they occurred. If the Rotterdam of 1970 was still a city with an identity crisis, that wanted to be small rather than large and cosy rather than commercial, by 2000 Rotterdam was perceived as the most metropolitan of all Dutch cities. Artists and other cultural practitioners were the first to advance this metropolitan vision, thereby paving the way for the New Rotterdam that would begin to take concrete shape at the end of the 1980s. "Imagine a Metropolis" looks at this transformation, and goes on to show that this New Rotterdam is returning to its nineteenth-century identity and the developments of the inter-war years and the period of postwar reconstruction.*

## THE WILL TO IMAGINE

---

---

### A JUSTIFICATION OF SKEPTICAL RELIGION

---

---

Cornell University Press *The Will to Imagine* completes J. L. Schellenberg's trilogy in the philosophy of religion, following his acclaimed *Prolegomena to a Philosophy of Religion* and *The Wisdom to Doubt*. This book marks a striking reversal in our understanding of the possibility of religious faith. Where other works treat religious skepticism as a dead end, *The Will to Imagine* argues that skepticism is the only point from which a proper beginning in religious inquiry—and in religion itself—can be made. For Schellenberg, our immaturity as a species not only makes justified religious belief impossible but also provides the appropriate context for a type of faith response grounded in imagination rather than belief, directed not to theism but to ultimism, the heart of religion. This new and nonbelieving form of faith, he demonstrates, is quite capable of nourishing an authentic religious life while allowing for inquiry into ways of refining the generic idea that shapes its commitments. A singular feature of Schellenberg's book is his claim, developed in detail, that unsuccessful believers' arguments can successfully be recast as arguments for imaginative faith. Out of the rational failure of traditional forms of religious belief, *The Will to Imagine* fashions an unconventional form of religion better fitted, Schellenberg argues, to the human species as it exists today and as we may hope it will evolve.

### BETWEEN CULTURE AND MATHEMATICS

---

---

Springer Science & Business Media *Imagine mathematics, imagine with the help of mathematics, imagine new worlds, new geometries, new forms.* The new volume in the series "Imagine Math" is intended to contribute to grasping how much that is interesting and new is happening in the relationships between mathematics, imagination and culture. The present book begins with the connections between mathematics, numbers, poetry and music, with the latest opera by Italian composer Claudio Ambrosini. Literature and narrative also play an important role here. There is cinema too, with the "erotic" mathematics films by Edward Frenkel, and the new short "Arithmétique" by Munari and Rovazzani. The section on applications of mathematics features a study of ants, as well as the refined forms and surfaces generated by algorithms used in the performances by Adrien Mondot and Claire Bardainne. Last but not least, in honour of the hundredth anniversary of his birth, a mathematical, literary and theatrical homage to Alan Turing, one of the outstanding figures of the twentieth century.

### PRACTICAL IMPROVISATIONAL THEATRE TECHNIQUES FOR TRAINERS AND MANAGERS TO ENHANCE CREATIVITY, TEAMWORK, LEADERSHIP, AND LEARNING

---

---

Stylus Publishing, LLC *Creating innovative products and game-changing processes, and adapting to new cultures and communication styles, have all become imperative for business survival. Today's business leaders, from Fortune 500 companies on down, have discovered the value of improvisational*

theatre techniques to develop creativity and collaboration skills they need. Since publication of its seminal first edition, the principles and techniques pioneered in *Training to Imagine* have been widely adopted by organizations around the world, and have given rise to the field of Applied Improvisation. This new edition builds on the characteristics that made it the most comprehensive and most easy-to-apply resource for using improv in organizations. As before, this book translates the theories and exercises of improv into language that is familiar to business culture, and provides guidelines, case studies and exercises intended for use by individuals for self-development, for small groups, and for facilitation by corporate trainers. This revised edition places more emphasis on the development of leadership, in particular adding activities designed for individuals to develop skills on their own, or outside formal training environments. It builds upon what has been learned since 2001, presenting examples of practice, and research on the methods, that have proven to be most effective in the workplace. Kat Koppett has added a whole new section on instructional design to help users make informed choices in selecting activities to best support their objectives and corporate context, as well as numerous new exercises. This is a vital resource for trainers, executives, and leaders at all levels who want to increase their personal communication and creativity skills, and in inspire and motivate their teams. The enhanced e-book edition will incorporate video of sample activities and exercises, as well as interviews with leading Applied Improv practitioners. This material will also be available free on the Stylus Web site.

### DOES GOD EXIST? I DO-DO NOT BELIEVE (THIS BOOK IS FOR YOU)

---

[Christian Faith Publishing, Inc.](#) Does science prove God's existence or provide more reasons to doubt? Does God truly exist? That is the age-old seemingly unanswerable question. But what if there was an answer? What if the answer has been staring us right in the face for centuries, but we've been too busy missing the forest for the trees? This book invites you to take a step back and look at the broader picture. It offers anecdotes, observations and, most importantly, scientific evidence of the universal, all-encompassing, culture-transcending purpose that connects us all. In that purpose, we find many paths to a knowledge that has eluded humankind for as long as we have had the ability to wonder: proof that God does indeed exist. We find this knowledge in the stars, in the nature of time, in the laws of physics, in our own bodies, and in equations as complex as advanced calculus and unconditional love. It's just a matter of knowing where (and how) to look. In a centuries-old debate that has always placed science in an adversarial role with faith, this book brings the two camps together, using logic and reason to prove the existence of God. For the atheist, these pages eschew scriptural references in favor of evolutionary, philosophical, cultural, and natural evidence. For the believer, this book enhances your faith with affirmative arguments steeped in mathematics, particle physics, and a host of other scientific and real-world observations. And for anyone who has ever looked up at the sky and wondered what might lie beyond, this book provides a clear, compelling, life-affirming answer. "Desire is the starting point of all achievement, not a hope, not a wish, but a keen pulsating desire which transcends everything." "" Napoleon Hill "As a secularist and humanist who doesn't share the same conclusions, I was surprised with what an enjoyable read this is. This is the strongest summary to date that I've seen for the Theist position." "" Jeremy Runnells, author of the CES Letter "Written through a Euro-centric philosophical and western science lens, one has the opportunity to consider not only the argument for and against the belief in a God, but to contemplate a middle ground where the dualities of such sit squarely within the most important part of the equation- the one who asks the question. This book is a worthwhile read, particularly for those seeking to dive more deeply into the self." "" Jonathan Webb, Dr. of Theology

Imagine building mathematical models that make it possible to manage our world better, imagine solving great problems, imagine new problems never before thought of, imagine combining music, art, poetry, literature, architecture, theatre and cinema with mathematics. Imagine the unpredictable and sometimes counterintuitive applications of mathematics in all areas of human endeavour. This seventh volume starts with a homage to the Italian artist Mimmo Paladino who created exclusively for the Venice Conference 2019 ten original and unique works of art paper dedicated to the themes of the meeting. A large section is dedicated to the most recent Fields Medals including a Homage to Maryam Mirzakhani including a presentation of the exhibition on soap bubbles in art and science that took place in 2019. A section is dedicated to cinema and theatre including the performances by Claire Bardainne & Adrien Mondot. A part of the conference focused on the community of mathematicians, their role in literature and even in politics with the extraordinary example of Antanas Mockus Major of Bogotá. Mathematics in the constructions of bridges, in particular in Italy in the Sixties was presented by Tullia Iori. A very particular contribution on Origami by a mathematician, Marco Abate and an artist, Alessandro Beber. And many other topics. As usual the topics are treated in a way that is rigorous but captivating, detailed and full of evocations. This is an all-embracing look at the world of mathematics and culture. The world, life, culture, everything has changed in a few weeks with the Coronavirus. Culture, science are the main ways to safeguard people's physical and social life. Trust in humanity's creativity and ability. The motto today in Italy is Everything will be fine. This work is addressed to all those who have an interest in Mathematics.*

### 3 STEPS TO A NEW BEGINNING USING IMAGEWORK

---

[Duncan Baird Publishers](#) This is a practical book that guides the reader step by step from difficult times through a turning point to a new beginning. Each chapter includes a section entitled *Spiritual Gym*, which features imagery exercises relevant to that chapter. Dr Glouberman's website will host MP3 downloads to help guide the reader through the exercises. The content is based on a 3-step approach to new beginnings: 1. The catalyst: the life event or inner search that gets the person moving. 2. The turning point: an expansion in perspective on oneself and life. This includes an acceptance of present feelings and situations, a connection with deeper and more stable levels of oneself, and a vision of the possible futures. 3. The new beginning: accepting the vision without expecting to be 'happy ever after'. The various stages of the process are illustrated through quotes and accounts from interviews with friends and colleagues, as well as prominent figures. Interviewees include Chad Varah, founder of the Samaritans, Gabrielle Roth, Five Rhythms creator, actor Michael York and poet and men's movement founder Robert Bly. The book combines a chatty, approachable and humorous style with original insights of subtlety and depth, as well as state-of-the-art utilisation of imagery throughout.

### IDEAS THAT CHALLENGE THE STATUS QUO

---

[AuthorHouse](#) *Imagine places ideas in society and gets readers thinking critically about their most cherished beliefs and values. The topics are vast and varied. Abortion, immigration, gay rights, love, mentorship, and sustainable development. There is no right answer. We must come to our own conclusions. If we can listen and learn from each other, we can accept our differences. Everyone has ideas on how to make the world a better place and fill humankind with hope. Imagine espouses humanitarian and egalitarian ideals such as every citizen deserves to reach their potential and contribute to society. Imagine is written from the perspective of protecting the people and the planet for current and future generations. You will learn of thought-provoking issues. The book proposes that we are all one and connected by spiritual energy. This will help us look for what we have in common and bring about social peace, social progress, and social change that lights our soul and lifts humanity in one colossal embrace.*

## DREAMING VENICE

---

Springer Nature This eighth volume of *Imagine Math* is different from all the previous ones. The reason is very clear: in the last two years, the world changed, and we still do not know what the world of tomorrow will look like. Difficult to make predictions. This volume has a subtitle *Dreaming Venice*. Venice, the dream city of dreams, that miraculous image of a city on water that resisted for hundreds of years, has become in the last two years truly unreachable. Many things tie this book to the previous ones. Once again, this volume also starts like *Imagine Math 7*, with a homage to the Italian artist Mimmo Paladino who created exclusively for the *Imagine Math 8* volume a new series of ten original and unique works of art dedicated to Piero della Francesca. Many artists, art historians, designers and musicians are involved in the new book, including Linda D. Henderson and Marco Pierini, Claudio Ambrosini and Davide Amodio. Space also for comics and mathematics in a Disney key. Many applications, from Origami to mathematical models for world hunger. Particular attention to classical and modern architecture, with Tullia Iori. As usual, the topics are treated in a way that is rigorous but captivating, detailed and full of evocations. This is an all-embracing look at the world of mathematics and culture.

Springer *Imagine mathematics, imagine with the help of mathematics, imagine new worlds, new geometries, new forms. Imagine building mathematical models that make it possible to manage our world better, imagine combining music, art, poetry, literature, architecture and cinema with mathematics. Imagine the unpredictable and sometimes counterintuitive applications of mathematics in all areas of human endeavour. Imagination and mathematics, imagination and culture, culture and mathematics. This sixth volume in the series begins with a homage to the architect Zaha Hadid, who died on March 31st, 2016, a few weeks before the opening of a large exhibition of her works in Palazzo Franchetti in Venice, where all the Mathematics and Culture conferences have taken place in the last years. A large section of the book is dedicated to literature, narrative and mathematics including a contribution from Simon Singh. It discusses the role of media in mathematics, including museums of science, journals and movies. Mathematics and applications, including blood circulation and preventing crimes using earthquakes, is also addressed, while a section on mathematics and art examines the role of math in design. A large selection presents photos of mathematicians and mathematical objects by Vincent Moncorge. Discussing all topics in a way that is rigorous but captivating, detailed but full of evocations, it offers an all-embracing look at the world of mathematics and culture.*

Imagine places of learning and inspiration for teachers, administrators, teacher educators, and teacher candidates. Imagine a Place: Stories From Middle Grades Educators, a new anthology of teacher-written narratives, focuses on educators' stories that have the power to offer hope, ignite creativity, and provide practical ideas for middle grades teachers. Imagine a Place is filled with stories of joy, stories of relationships, and stories of finding the treasure in challenging situations that provide powerful insight into the world of teaching young adolescent learners. Along with teacher narratives, the editors of this book provide questions and exercises for thoughtful reflections on the themes and issues raised in each story as well as guidance for the reader to write his or her own account of their middle grades teaching experiences. We invite you to join these teachers in their classrooms as they reflect on their experiences with young adolescents in the place we call school.*

## AND OTHER WRITINGS ON POLITICS AND MEDIA 2016-2019

---

Outskirts Press The months between the presidential election of 2016 and the summer of 2019 have been a wild ride, from the unexpected (and for many traumatic) results of the election to growing recognition of how profoundly the Trump presidency has changed our lives, from discoveries of corruption and foreign influence on our democratic institutions to fresh assaults on reproductive rights, the Brett Kavanaugh hearings and the #MeToo movement, Robert Mueller's long-awaited report and its aftermath, and the beginnings of the 2020 primary contest. Follow cultural historian and media critic Susan Bordo through those events as they happened, in a book whose format is uniquely designed to capture their immediacy. Notable pieces include "Reflections on Trump's Inauguration," inspired by an exchange of looks between Michelle Obama and Hillary Clinton; "To the Core" recalls both the Anita Hill hearings and Bordo's own experience with sexual harassment in the context of #MeToo; "Please Mr. Prosecutor Mueller" is a personal plea as well as an argument about the power of television; "My MSNBC Interview" finds the author perched on a high stool in a local TV studio, talking about her just-published book on the election, finding out what it feels like to be misunderstood on national television; "Imagine Bernie Sanders as a Woman" confronts the double-standards and double-binds faced not only by female politicians but by all women who are seen as "leaning in" too much, while "Two Elizabeths" explores how the Tudor queen and the presidential contender negotiate those challenges in their differing historical contexts. Combining full-length published pieces with spontaneous, unfiltered, never-before published posts, in a voice that is bracingly honest as well as critically penetrating, this collection goes beyond journalistic conventions to reveal the ways in which the political is indeed the personal.

## IMAGINE NO MORE LIES

---

Xlibris Corporation WHAT WOULD YOU DO IF YOU COULD CHANGE THE WORLD? The Pate family is brutally attacked and ripped apart by a Chicago crime syndicate. The survivors are split up only to be brought back together by fate and their shared passion for philately. Fast forward...computer genius and biochemical engineer, Ashton Jones secretly designs a special device which would dramatically change not only the criminal justice system but the entire human race. Preventing this new technology from falling into the hands of a powerful international criminal lawyer sparks a struggle between the forces of good and evil. The race for control of this special device sends the Pate family and Ashton Jones on a life and death chase which spans from coast to coast. At what point can family be trusted with the truth, and how many lies and deceit can one family endure? A decision has to be made, but will it be the right one? And, can you imagine a world with no more lies?

## IMAGINE THIS

---

Xulon Press For decades, or maybe centuries, the Church has ignored some of the most crucial truths found in God's word. The author has been shown these truths over a long period of time, resulting in an incredible transformation of his life. For any person who is serious about his/her walk with Christ, these truths are absolutely essential in order to grow in grace and the knowledge of the truth. The author's lament is, 'If only I had been taught these truths decades ago, I may well have enjoyed life to the fullest, and experienced the joy of His salvation many years ago.' Sadly he is close to his life's expected time span and will not have the time to enjoy such a life for very long. But his desire is that many people who believe they are Christians will read this book with hungry, open hearts, ready to hear from God, accept the truth, be set free, and experience the joy of His salvation far earlier in life than the author. The United States of America is spiritually sick, in desperate need of healing. The author offers some very wise advice to the Church in America which would change the direction of this nation if accepted and applied to the lives of those who profess to know Christ. The teaching found in this book is not the author's opinion, but rather the exposition of scripture in a clear and concise manner. He believes that his doctrinal stance, ideology or opinions are worth nothing, so he simply and clearly brings to light the teaching of God's word, much of which has been ignored for far too long.

**PEDAGOGIES AND CURRICULUMS TO (RE)IMAGINE PUBLIC EDUCATION**

---

**TRANSNATIONAL TALES OF HOPE AND RESISTANCE**

---

*Springer* This book discusses current market-based educational discourses and how they have undermined the notion of “the public” in public education by allowing private visions of education to define the public democratic imagination. Against this discouraging background, this text embraces Freire’s understanding of hope as an ontological need and calls for finding new public grounds for our public imagination. It further articulates Freire’s mandate to unveil historically concrete practices to sustain democratic educational visions, no matter how difficult this task may be, by (1) presenting an in-depth description of the pedagogies and curriculums of eleven schools across historical and geographical locations that have worked or are still working with disenfranchised communities and that have publicly hoped for a better future for their students, and by (2) reflecting on how the stories of these schools offer us new opportunities to rethink our own pedagogical commitment to public visions of education. To promote this reflection, this book offers the notion of publicly imagined public education as a conceptual tool to help understand the historical and discursive specificity of schools’ hopes and to (re)claim public schools as legitimate sites of public imagination.

**THE 1920 EDITION OF THE BOOK OF MORMON**

---

**A CENTENNIAL ADVENTURE IN LATTER-DAY SAINT BOOK HISTORY**

---

*Greg Kofford Books* Members of The Church of Jesus Christ of Latter-day Saints tend to see the Book of Mormon through the lens of personal use, as a single textual and scriptural monolith—the Book of Mormon. That is somewhat natural, since we tend to have at hand and in-use, only the copy or version in our language needed to study it for inspiration. In the process, the point tends to get overlooked that while we may accept the text as inspired, the physical embodiment of that text—the Book of Mormon—is a mortal reality. The Book of Mormon, while it has a “spirit,” also has a mortal “body” (or rather, bodies) existing in space and time. As such, it has a history—and because it comes to us in the form of a book, it also has a book history. This study is divided into three parts. The first part is a straightforward history of the edition’s editing, production, and manufacturing processes. It examines key points in the reprint history of the book, following important factors in the subsequent impressions of the work across nearly thirty years of re-impressions, corrections, transfers, and one new format. The narrative crowded into chapters one through four together leave Part II to catalogue the bibliographic minutia that is the beating heart of analytic book history and which provides entertainment for true-blooded bibliophiles. The details contained in the production and manufacturing contracts and coupled to the typographical evidence explained in Part III, together resolve once and for all the question of what constitutes the 1920 edition and what does not.
