The Fluke Illuminator

Lulu.com Poetry. Art. Mail Art. Collaboration between Michael Peters & John M. Bennett. These Illuminations were created between 2001 and 2015. They could be called Visual Poems or Visual Stories or Art or Totemic Screens, or something else entirely. To create them, something like five "starts"—a few letters or an image or a rubber stamp or some combination thereof—were sent out in the mail (the first nine were done together at an artist's residency), and when these were added to by the receiving collaborator, the

same five "Fluke Illuminations" were sent back to the original sender along with five new Fluke "starts." Materials in this overlapping process include alphabetic stamps, graphite pencils, colored pencils, rubber stamps, typewriters, handwriting, newspaper and magazine images, black ink, magic markers, and both acrylic paint and white exterior house paint. The result is a stunningly beautiful body of work that will repay many revisitings. John M. Bennett has published over 400 books and media materials of poetry, visual poetry, and other matters. He writes/creates in English, Spanish, and other languages; is editor and publisher, with his wife, the Fluxus artist C. Mehrl Bennett, of Luna Bisonte Prods, and is Curator of the Avant Writing Collection at the Ohio state University Libraries. Recent books include LA M AL (2015), VERTICAL SLEEP (2015), MIRRORS MÁSCARAS (2014), THE STICKY SUIT WHIRS: LOS PREOLVIDADOS (2013), OLVIDOS (2013), and BLOCK (2012). Michael Peters is the author of the sound- imaging work VAAST BIN (Calamari Press, 2007) and other assorted language art and sound works. The book VAAST BIN, which is part of a larger Vaast Bin Project, is also available through SPD. As certain as he is uncertain of access to "the real," Peters frequently tests this periphery in the guise of a poet, a visual poet, a fictioneer, and a musician in a variety of old and new media.

Where the Life Dries Out

Notion Press The three primeval qualities of nature are Sattva (mode of goodness), Rajah (mode of passion) and Tamah (mode of ignorance). All these three modes of qualities, produced by material nature, confine the immortal soul to the mortal body. Now, the mode of goodness being purest than others confines in the happiness. The mode of passion confines in the material fugitive activities and the mode of ignorance enveloping the wisdom is enamoured in misfortune. From the material nature is created six enemies of life at every moment: sex-passions (kaam), rage (krodh), greed (lobh), infatuation (moho), vanity (mada) and envy (matsarya). Superabundance and the influence of these six passions sometimes outpoured the emotion of human life and were sometimes devastated. Human life, as influenced by these six passions, was cast off to the earth like dried leaves. The reason for this short explanation is that the collection of six stories described how the human life is cast off like dried leaves, due to the influence of the six passions. The readers will get concrete indication about the six enemies of human life, which may help them to adjust their lives in a

righteous way.

Hachette UK Just why do humpback whales sing? That's the question that has marine biologist Nate Quinn and his crew poking, charting, recording and photographing very big, wet, gray marine mammals. Trouble is, Nate's beginning to wonder if he hasn't spent just a little too much time in the sun. 'Cause no one else saw a thing- not his longtime partner, Clay Demodocus; not their

saucy young research assistant; not even the spliff-puffing white-boy Rastaman Kona (ne Preston Applebaum). But later, when a roll of film returns from the lab missing the crucial tail shot- and his research facility is trashed- Nate realizes something very fishy indeed is going on.

The Maths and Myths of Coincidences

Simon and Schuster What are the chances?! This exclamation greets the scarcely believable coincidence - you're picked up by the same taxi driver several years and thousands of miles apart or, in a second-hand bookshop far from home, you find your own childhood copy of Winnie-the-Pooh on the shelf. But the unlikely is more probable than you think. Against every fibre of common sense, the fact is that it's quite likely that some squirrel, somewhere, will be struck by lightning as it crosses the road. The chaos and unpredictability of our lives is an illusion. There is a rational order to the universe, and it's called mathematics. Fluke is a fascinating investigation into the true nature of chance, a must-read for maths enthusiasts and avid storytellers alike, it tears down the veil of improbability to reveal the wonderfully possible.

The New Bill James Historical Baseball Abstract

Simon and Schuster When Bill James published his original Historical Baseball Abstract in 1985, he produced an immediate classic, hailed by the Chicago Tribune as the "holy book of baseball." Now, baseball's beloved "Sultan of Stats" (The Boston Globe) is back with a fully revised and updated edition for the new millennium. Like the original, The New Bill James Historical Baseball Abstract is

really several books in one. The Game provides a century's worth of American baseball history, told one decade at a time, with energetic facts and figures about How, Where, and by Whom the game was played. In The Players, you'll find listings of the top 100 players at each position in the major leagues, along with James's signature stats-based ratings method called "Win Shares," a way of quantifying individual performance and calculating the offensive and defensive contributions of catchers, pitchers, infielders, and outfielders. And there's more: the Reference section covers Win Shares for each season and each player, and even offers a Win Share team comparison. A must-have for baseball fans and historians alike, The New Bill James Historical Baseball Abstract is as essential, entertaining, and enlightening as the sport itself.
