**Problem Solving in Haematology Solving Problems in Clinical Hematology Diagnostic Hematology Springer Science & Business Media** The approach described in this book is different from that in most student texts, and has been very successful in practice, starting almost from scratch, but omitting many of the 'basics' such as the details of hematopoiesis, laboratory technology, and so on, which are hardly relevant to the practising clinician and student in the wards, and are primarily of interest to the hematologist and sometimes to the clinical specialist. Considerable emphasis is given to the clinical history and examination, and the interpretation of the clinical patterns thus exposed. Hopefully it will overcome many of the traditional problems experienced in practical diagnostic haematology. **Problem Solving in Medical Technology-hematology Problem Solving in Haematology Clinical Pub Serv Guides** readers through real-life clinical presentations on how to diagnose and manage a variety of clinical cases seen in haematology practice. This title includes over 30 common and challenging clinical scenarios that create a foundation incorporating the medical literature and presenting the guidelines for management. **Problem Solving in Acute Oncology Second Edition Evidence-based Networks Ltd** Created in partnership with the Association of Cancer Physicians (ACP) **Structured problem solving approach illustrated through 38 case studies** Suitable for acute oncology teams including in the community, and trainees **Provides a template for acute service development and emergency treatment** The development and delivery of acute oncology services have undoubtedly improved the care of cancer patients, the management of acute complications of cancer and its treatment, and our approaches to diagnosing patients who present with cancer and no

obvious primary site. There remains a need to ensure that practitioners are kept fully informed and up-to-date about the appropriate clinical care to be provided in the setting of acute oncology, and to continue a dialogue on the best way to deliver acute oncology services within limited resources. Since the first edition of *Problem Solving in Acute Oncology* was published there has been continued development and expansion of services. The importance of the involvement of primary care in delivering acute oncology nationally has been increasingly recognized, leading to the development of ever stronger links between the two. Closer working with acute medicine physicians has also improved the care of acute oncology patients; work is ongoing to encourage closer collaboration between acute oncology services and clinical haematology. This updated text is particularly helpful and timely. It will serve as a valuable resource for those who continue to develop excellent acute oncology services, as well as provide a source of training and an update for clinicians working in this challenging clinical area. This book proposes a template that can be used by any professional involved in the planning and delivery of acute oncology care around the world. The book is formally supported by the Association of Cancer Physicians (ACP). This highly patient-centred, readable text will be of value to clinicians, healthcare strategic and operations managers, and doctors in training, in their daily work.

**Hematology A Problem-oriented Approach Pediatric Hematology Methods and Protocols** *Springer Science & Business Media* Pediatric Hematology is a collection of cutting-edge methods for investigating and detecting a wide variety of hematological disorders. Here, the reader will find reliable molecular protocols for the diagnosis of Fanconi anemia and dyskeratosis congenita, immunodeficiency, and most forms of hemoglobinopathy. In addition, there are detailed methods for molecular human platelet antigen genotyping, an effective PCR procedure for thrombophilia screening, and protocols for fluorescent in situ hybridization. Since the measurement of minimal residual disease (MRD) provides a much more accurate risk-directed therapy, three methods are presented for detecting residual leukemia below the threshold of light microscopy, along with relatively simple, rapid, and cheap methods for the detection of MRD in ALL and AML.

**Ethical Issues in Pediatric Hematology/Oncology** *Springer Nature* This book identifies the various ethical challenges that arise in pediatric hematology/oncology and provides the necessary tools to overcome these challenges. Aiming to expand upon and strengthen providers' knowledge and experience in pediatric health care ethical issues, the text positions providers to be beneficial resources to faculty, staff, patients, and families within their institution. It presents a multidisciplinary approach to sound ethical practices that is necessary to effectively care for these patients and their families. The book reviews the principles of ethical decision-making, the unique difficulties in using children as research subjects, common ethical conundrums involved in providing end-of-life care, and general moralities of professional practice. Written by experts in their fields, *Ethical Issues in Pediatric Hematology/Oncology* is an

innovative and valuable resource for clinicians, practitioners, and trainees who work in the field of pediatric hematology/oncology. **Practical Pediatric Hematology** *JP Medical Ltd* This second edition brings postgraduates and paediatricians fully up to date with the latest knowledge and developments in paediatric haematology. Beginning with an introduction to interpreting the complete blood count, the following chapters examine in detail different conditions such as anaemia, white blood cell disorders, von Willebrand's disease, stroke and myelodysplastic syndrome. The final sections discuss therapies including hemato-oncology, hematopoietic stem cell transplantation, vascular access and specialised techniques for drug delivery, as well as psychological support of chronic blood disorders. With emphasis put on the development of new diagnostic tests for these disorders, this comprehensive guide includes almost 200 images and illustrations to assist understanding. **Key Features** New edition brings postgraduates up to date with latest developments in paediatric haematology Discusses in detail numerous conditions and disorders Nearly 200 images and illustrations Author trained in paediatric haematology-oncology at the Royal Marsden Hospital, Surrey and University College Hospital, London, UK First edition published 2006 **Microscopic Haematology A Practical Guide for the Laboratory** *Elsevier Australia* **Microscopic Haematology 3e** is an atlas of Haematology designed for use in a diagnostic setting. The third edition provides over 400 full colour haematological slides of exceptional quality. Arranged in a logical order, it commences with the red cell series describing normoblastic erythropoiesis and then goes on to describe abnormal erythropoiesis and all the red cell disorders associated with anaemia. Each type of anaemia is described with a minimal amount of text and accompanied by coloured haematological slides depicting the red cell changes associated with the particular disorder. The images have been magnified x1000 and are of a very high quality. The platelet section follows on and adheres to the same format. There is a section on haematology relating to paediatrics which describes red cell, white cell and platelet disorders occurring in cord blood, the neonate and childhood. The last section is on Blood Parasites and describes the four species of human malaria. A description of the characteristic features of each species as it occurs in the red cell is accompanied by images clearly depicting the various stages of maturation of each species of malaria. . Paediatrics section - which describes red cell, white cell and platelet disorders occurring in cord blood, the neonate and childhood. . Over 400 high quality images . 30 detailed case studies online . Updated in line with the current WHO classification . Online image bank Evolve Student . Downloadable student content specific to Haematology I and II **Section 1 - Development of Blood cells** A brief overview of the haematological system and blood cell development . Normal cells of the blood . The morphology of blood cells found in a normal blood film . Automated analysis of blood - Parameters measured - Summarising cell counter values - Other analytical methods Flow cytometry Cytochemistry Reference Ranges **Section 2 - Blood film examination** . Preparation of

a blood film of an acceptable standard for diagnostic pathology . The systematic microscopic examination of a blood film . Examination of red blood cells . Examination of white blood cells . Performing a white cell differential . Examination of platelets . Artefacts . Terminology and reporting 13 interactive case studies . Interactive case studies with MCQ's for self directed learning Lecturer . 17 detailed case studies to help develop differential diagnosis skills and problem solving skills with model answers . Image bank . Aligned to the current WHO classification standard. . Expanded coverage of blood cell production, haematopoiesis, and disease physiology. . Detailed case studies for both adult and paediatric conditions (Evolve) . New images - approx 90 new images will be included showing cell morphology and cell ultrastructures. . Comprehensive online teaching and learning package. Reasoning and Decision Making in Hematology A problem-orientated approach to decision making in haematology, containing practical information and organized around algorithms. This book also identifies reasoning strategies which lie behind diagnostic and therapeutic problem solving during the care of patients with blood disease. Testes Cancer, An Issue of Hematology/Oncology Clinics of North America - E-Book *Elsevier Health Sciences* Dr. Gilligan has recruited global experts to contribute articles on the topic of testes cancer. The issue is organized to mimic the clinical process of detection, treatment, and management. Included in the issue are articles on the biology, interpretation, and imaging of germ cell tumors; early stage and stage II of seminomas and nonseminomas; first, second, and third line of chemotherapy for disseminated germ cell tumors, resection of residual masses, and treatment of brain metastases. Pancreatic Cancer Hematology/Oncology Clinics of North America *Elsevier Health Sciences* This issue of Hematology/Oncology Clinics of North America is devoted to Pancreatic Cancer. Guest Editor Brian Wolpin, MD has assembled a group of expert authors to review the following topics: Biology and genetics of pancreatic adenocarcinoma; Mouse models of pancreatic adenocarcinoma; Epidemiology and inherited predisposition for sporadic pancreatic adenocarcinoma; Familial pancreatic adenocarcinoma; Imaging and endoscopic approaches to pancreatic cancer; Diagnosis and management of pancreatic cystic neoplasms; Surgical management of pancreatic cancer; Peri-operative therapy for surgically resectable pancreatic adenocarcinoma; Diagnosis and management of borderline resectable pancreatic adenocarcinoma; Treatment approaches to locally advanced pancreatic adenocarcinoma; Therapeutic approaches for metastatic pancreatic adenocarcinoma; Supportive and end-of-life care for patients with pancreatic adenocarcinoma; and Novel therapeutics for pancreatic adenocarcinoma. Hematology E-Book Basic Principles and Practice, Expert Consult Premium Edition - Enhanced Online Features *Elsevier Health Sciences* Hematology, 6th Edition encompasses all of the latest scientific knowledge and clinical solutions in the field, equipping you with the expert answers you need to offer your patients the best possible outcomes. Ronald Hoffman, MD, Edward J. Benz, Jr., MD, Leslie E. Silberstein, MD,

Helen Heslop, MD, Jeffrey Weitz, MD, John Anastasi, MD, and a host of world-class contributors present the expert, evidence-based guidance you need to make optimal use of the newest diagnostic and therapeutic options. Consult this title on your favorite e-reader with intuitive search tools and adjustable font sizes. Elsevier eBooks provide instant portable access to your entire library, no matter what device you're using or where you're located. Make confident, effective clinical decisions by consulting the world's most trusted hematology reference. Access the complete contents online at [www.expertconsult.com](http://www.expertconsult.com), with a downloadable image collection, regular updates, case studies, patient information sheets, and more. Apply all the latest knowledge on regulation of gene expression, transcription splicing, and RNA metabolism; pediatric transfusion therapy; principles of cell-based gene therapy; allogeneic hematopoietic stem cell transplantation for acute myeloid leukemia and myelodysplastic syndrome in adults; hematology in aging; and much more, thanks to 27 brand-new chapters plus sweeping updates throughout. Find the information you need quickly and easily thanks to a completely reworked organization that better reflects today's clinical practice. Visualize clinical problems more clearly with new and updated images that reflect the pivotal role of hematopathology in modern practice. Benefit from the experience and fresh perspective of new editor Dr. Jeffrey Weitz, Professor of Medicine at McMaster University School of Medicine and Executive Director of the Thrombosis and Atherosclerosis Research Institute in Ontario. *Essentials of Haematology JP Medical Ltd* The second edition of *Essentials of Haematology* brings students fully up to date with common haematologic disorders and blood transfusion, with an emphasis on pathogenesis, diagnosis and treatment. Divided into five sections, topics include blood physiology, red and white blood cell disorders, haemostasis disorders and blood transfusion. Each chapter discusses the diagnosis and treatment of a different disorder and the final section describes transfusion techniques. This comprehensive new edition includes more than 400 full colour figures, tables and illustrations with descriptions to assist learning. Key points New edition bringing students up to date with common haematologic disorders and blood transfusion Emphasis on pathogenesis, diagnosis and treatment Includes more than 400 full colour figures, tables and illustrations Previous edition published in 2006 *Clinical Hematology Theory and Procedures Lippincott Williams & Wilkins* This established entry-level hematology text enters its Fourth Edition with even more of the focused coverage and learning tools that have made it so successful. Well-illustrated and reader-friendly, the book features extensive study and review tools, including learning objectives, case studies, procedure boxes, and review questions. The fully updated Fourth Edition includes new material on safety issues, transplants, sickle cell anemia, and genetic diagnostics. New chapters address flow cytometry, cytochemistry, and hemostasis and coagulation. Chapter summaries have been boxed for rapid reference, and this edition includes an expanded 16-page color insert. *Health Sciences* **The Hematology: Diagnosis and Treatment eBook is the ideal mobile resource in hematology! It distills the most essential, practical information from Hematology: Basic Principles and Practice, 6th Edition - the comprehensive masterwork by Drs. Hoffman, Benz, Silberstein, Heslop, Weitz, and Anastasi - into a concise, clinically focused resource that's optimized for reference on any e-reader. Focusing on the dependable, state-of-the-art clinical strategies you need to optimally diagnose and manage the full range of blood diseases and disorders, this eBook is a must-have for every hematologist's mobile device! Apply the latest know-how on heparin-induced thrombocytopenia, stroke, acute coronary syndromes, hematologic manifestations of liver disease, hematologic manifestations of cancer, hematology in aging, and many other hot topics. Get quick, focused answers on the diagnosis and management of blood diseases - in a portable digital format that you can carry and consult anytime, anywhere. View abundant images that mirror the pivotal role hematopathology plays in the practice of modern hematology. Count on all the authority that has made Hematology: Basic Principles and Practice, 6th Edition, edited by Drs. Hoffman, Benz, Silberstein, Heslop, Weitz, and Anastasi, the go-to clinical reference for hematologists worldwide. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Compatible with Kindle®, nook®, and other popular devices.**

*Analysis of Some Mathematical Models of Cell Dynamics in Hematology Casa Cărții de Știință*  
**Bringing new contributions to science might be challenging, however, this is our path to evolution. We cannot assume that we know everything, but it is only our curiosity that can lead us to answers. Therefore, we can and we should keep trying, seeking new and different paths. There is always a starting point: asking yourself „Why?“, and the answer will follow... The purpose of the present book is the study of some mathematical models of cell dynamics and convex optimization problems applied to chronic myeloid leukemia, a type of leukemia also known as chronic myelogenous leukemia. We take into consideration basic concepts, methods and results from the theory of differential equations, such as: existence, uniqueness, monotonicity, boundedness, continuous dependence on data and stability of solutions.**

*Evidence-Based Hematology John Wiley & Sons* **This unique new book uses a series of focussed questions, comprehensive literature evaluations and structured grades of recommendation to provide evidence for the treatment of hematological disorders, both malignant and benign. With contributions from leading international experts who have a real understanding of evidence-based medicine the book provides comprehensive reviews accompanied by clinical commentaries and recommendations on the best treatment regimes to adopt for individual patients. The book is split into two sections: the first examines the methodology underlying evidence based practice, and the second concentrates on the clinical practice of hematology, providing current “best evidence” to guide practice in a series of well-defined clinical situations. This clinical reference is an invaluable source of evidence-based information distilled**

into guidance for clinical practice which will be welcomed by practitioners, trainees and associated health professionals. **Central Nervous System Malignancies, An Issue of Hematology/Oncology Clinics of North America, E-Book Elsevier Health Sciences** In this issue of Hematology/Oncology Clinics, guest editor David A. Reardon? brings his considerable expertise to the topic of Central Nervous System Malignancies. Top experts in the field cover key topics such as CNS Metastases, Leptomeningeal Disease, Neurofibromatoses, Imaging Advances for CNS Tumors, and more. Contains 16 relevant, practice-oriented topics including CNS Tumor Classification: An Update on the Integration of Tumor Genetics; Etiology and Epidemiology of CNS Tumors; The Evolving Role of Neurosurgical Intervention for CNS Tumor ; Update on Radiation Therapy for CNS Tumors; and more. Provides in-depth clinical reviews on CNS Malignancies, offering actionable insights for clinical practice. Presents the latest information on this timely, focused topic under the leadership of experienced editors in the field. Authors synthesize and distill the latest research and practice guidelines to create clinically significant, topic-based reviews. **Hematology Basic Principles and Practice Elsevier Health Sciences** This leading text reflects both the new direction and explosive growth of the field of hematology. Edited and written by practitioners who are the leaders in the field, the book covers basic scientific foundations of hematology while focusing on its clinical aspects. This edition has been thoroughly updated and includes ten new chapters on cellular biology, haploidentical transplantation, hematologic manifestations of parasitic diseases, and more. The table of contents itself has been thoroughly revised to reflect the rapidly changing nature of the molecular and cellular areas of the specialty. Over 1,000 vivid images, now all presented in full color for the first time, include a collection of detailed photomicrographs in every chapter, selected by a hematopathology image consultant. What's more, this Expert Consult Premium Edition includes access to the complete contents of the book online, fully searchable and updated quarterly by Dr. Hoffman himself. - Publisher. **Hematology Landmark Papers of the Twentieth Century Elsevier** This book is a centennial volume celebrating the enormous progress made in hematology in the 20th century. It is edited by Marshall Lichtman, a distinguished senior hematologist, past president of the American Society of Hematology, and co-editor of the leading text in the field. Hematology is a compendium, with commentaries, of the most important papers published in the field from 1900-1999. The book will be useful for reference--many of the older papers can no longer be found in most libraries, yet are still referred to in current publications, especially review articles--as well as teaching. The Editor and a team of associate editors have included the most important papers covering eight categories: anemia; phagocytic cells; platelets; coagulation and thrombosis; lymphocytes and immune disorders; transfusion medicine; hematologic malignancies and therapeutics; and laboratory developments. Each paper is accompanied by a 1-2 page commentary explaining its impact, and references to the developments that resulted.

**Key Features** \* Contains 86 landmark articles from the last 100 years of research in clinical hematology \* Includes expert commentaries discussing the impact of each article \* Cites approximately 1000 preceding or subsequent articles of consequence in the commentaries \* Includes the English translations of nine articles originally published in other languages \* Provides easy access to several papers that may no longer be found in libraries

**Problem Solving in Immunoematology Case Reports for Pathologists and Medical Technologists** *Year Book Medical Publishers, Incorporated*

**Laboratory Hematology Practice** *John Wiley & Sons* Expertly edited and endorsed by the International Society for Laboratory Hematology, this is the newest international textbook on all aspects of laboratory hematology. Covering both traditional and cutting-edge hematology laboratory technology this book emphasizes international recommendations for testing practices. Illustrative case studies on how technology can be used in patient diagnosis are included. **Laboratory Hematology Practice** is an invaluable resource for all those working in the field.

**Haematology in Critical Care A Practical Handbook** *John Wiley & Sons* Issues of thrombosis, bleeding, and transfusion are extremely common, and often complex, in critically ill patients. **Haematology in Critical Care: A Practical Handbook** provides a dependable source of expert guidance on how to handle common haematological problems seen in the critical care setting, as well as the acute care of patients with a primary haematological disorder. Full-time clinical haematologists, regularly attending on intensive care, the Editors begin with an approach to abnormal laboratory tests, following with a disease-orientated approach to topics such as coagulation and haematological malignancy. Other key topics include paediatric and neonatal care, transfusion, point of care testing and the emergency presentation of haematological disease. This title brings together two of the most highly scientific specialties in clinical practice, delivering a practical approach to these problems, and guiding the clinician through the diagnosis and management of common scenarios encountered in the ICU.

**Medical Laboratory Science Review** *F.A. Davis* Use this comprehensive resource to gain the theoretical and practical knowledge you need to be prepared for classroom tests and certification and licensure examinations.

**Clinical Hematology: Theory & Procedures, Enhanced Edition** **Hematology: Basic Principles and Practice E-Book** *Elsevier Health Sciences* Get the expert guidance you need to offer your patients the best possible outcomes with **Hematology: Basic Principles and Practice, 7th Edition**. This thoroughly up-to-date text contains both unparalleled scientific content and must-know clinical guidance, so you can enhance your problem-solving skills and make optimal use of the newest diagnostic techniques and therapeutic options in this fast-changing field. Delivers state-of-the-art information and guidance from editors and global contributors who are at the forefront of their respective subspecialty areas. Features sweeping content updates throughout, including basic science research which serves as a foundation for modern hematology, recent advances in stem cell transplantation, clinical advances in the treatment of each of the

hematologic malignancies, immune checkpoint inhibitors, molecular diagnostics, transfusion medicine, and much more. Includes several new chapters including Epigenetics and Epigenomics, Stem Cell Model of Hematologic Diseases, Multiple Myeloma, IND Enabling Processes for Cell-Based Therapies, and Immune Checkpoint Blockade in Hematologic Malignancies. *Hematology in Practice F.A. Davis* Basic principles of hematology made memorable. Build a solid understanding of hematology in the context of practical laboratory practice and principles. Visual language, innovative case studies, role-playing troubleshooting cases, and laboratory protocols bring laboratory practice to life. Superbly organized, this reader-friendly text breaks a complex subject into easy-to-follow, manageable sections. Begin with the basic principles of hematology; discover red and white blood cell disorders; journey through hemostasis and disorders of coagulation; and then explore the procedures needed in the laboratory. *Patient Safety and Quality in Pediatric Hematology/Oncology and Stem Cell Transplantation Springer* This volume provides a concise yet comprehensive overview of patient safety issues and quality improvement for the pediatric hematology/oncology/stem cell transplant practice. The book reviews patient safety in complex healthcare delivery systems, delineates the various safety issues affecting pediatric hematology/oncology patients, and discusses quality improvement methods and improvement science that allow the reader to implement and sustain change in their home institution. The text also explores mechanisms to measure quality and safety outcomes, allowing the provider to implement proven processes shown to minimize harm to patients. Written by experts in the field, *Patient Safety and Quality in Pediatric Hematology/Oncology and Stem Cell Transplantation* is a valuable resource for healthcare professionals treating pediatric hematology, oncology and stem cell transplant patients. *Practical Algorithms in Pediatric Hematology and Oncology Karger Medical and Scientific Publishers* This is the only comprehensive collection of algorithms which exclusively addresses hematologic and oncologic problems affecting neonates, children and adolescents. Examining clinical problems which challenge the pediatrician, general practitioner and family practice physician, each algorithm utilizes a concise, step-by-step approach based upon clues from the history, physical examination and laboratory studies. The algorithms addressing differential diagnosis clearly distinguish between the most common etiologies, those that are less frequent, and finally some that are rare but important to recognize. The 51 topics include evaluation of anemia, sickle cell anemia, thalassemia, hemolytic anemia, the bleeding child, thrombocytopenia and other platelet disorders, hemophilia, leukocyte disorders, leukemias, lymphadenopathy, splenomegaly, approaches to mass lesions in the mediastinum, abdomen, pelvis, bones and soft tissues as well as approaches to potential emergencies such as tumor lysis and superior vena cava syndromes. The oncology topics emphasize diagnostic approach and management of complications, and not the details of chemotherapy. All algorithms are presented with a page of explanatory notes and

a list of selected reading. Pediatricians, family physicians and general practitioners will find this book very helpful in managing problems in their practices. Trainees in pediatric hematology will find it a useful tool in developing approaches to solve the problems they will encounter, and pediatric hematologists/oncologists will find it useful as a teaching tool. **Hematology in the Adolescent Female** *Springer Nature* Adolescent females experience a variety of blood disorders that are often unique to this patient population. As they go through puberty, they are uniquely poised to encounter various bleeding and thrombotic disorders once they attain menarche, start to have menstrual bleeding, and require hormonal therapy. This may in turn lead to other medical conditions, such as anemia and iron deficiency. Pregnancy encountered by some adolescents can pose hematologic challenges specifically in regards to bleeding and thrombotic disorders. In addition, adolescent females are at risk to develop immune mediated hematologic disorders, such as immune thrombocytopenia, auto-immune hemolytic anemia, and thrombotic thrombocytopenic purpura, as well as vitamin deficiencies due to pernicious anemia. Sickle cell disease, thalassemia and bone marrow failure disorders in the adolescent female poses unique challenges that need to be addressed with special care and attention. Knowledge about these various blood disorders in adolescent females is crucial for the treating physician in order to accurately diagnose and optimally manage these teenagers. Otherwise, it can affect their overall health, causing hematologic and gynecologic issues, poor quality of life, neurocognitive impairments, and poor psycho-social development, all of which can lead to various complications immediately and into adulthood. This book provides a comprehensive, state-of-the art overview of blood disorders in female adolescents. The text presents new data about bleeding disorders that affect the female adolescent, including bleeding disorders, thromboembolism, thrombophilia, anemia, sickle cell disease and thalassemia, disorders of hemostasis and thrombosis in pregnancy, immune hematology and bone marrow failure disorders; reviews our current understanding of these disorders; outlines recent research findings; and spotlights multi-disciplinary approaches, evaluation and treatment modalities to combat these blood disorders. Written by experts in the field, **Hematology in the Adolescent Female** is a valuable resource for clinicians and practitioners who treat and manage female adolescents with blood disorders. **Atlas of Avian Hematology** *Schalm's Veterinary Hematology* *John Wiley & Sons* The long-awaited Sixth Edition of Schalm's Veterinary Hematology has been revised and reorganized to increase accessibility and cohesiveness of the text. Topics are grouped within established disciplines in hematology, and outlines are now included at the beginning of each chapter. The book features new sections on Hematototoxicity and Quality Control and Laboratory Techniques, and includes expanded sections on Laboratory Animal Hematology, Species Specific Hematology, and Hematologic Neoplasia. With in-depth coverage on all aspects of the field, this comprehensive reference is an essential purchase for veterinary clinical

hematologists, internists, and students. **Problem Solving Through Precision Oncology A Case Study Based Reference and Learning Resource** *Problem Solving New Drugs for Malignancy, An Issue of Hematology/Oncology Clinics of North America - E-Book Elsevier Health Sciences* **Topics include: Targeting IGF-1R, Tyrosine Kinase Inhibitors in Lung Cancer, Targeting mTOR, Targeting Hedgehog, Mitotic Inhibitors, Topoisomerase I Inhibitors , and New Strategies and Drugs Inhibiting Folate Pathways.** **Nursing in Haematological Oncology** *Elsevier Health Sciences* **This title is directed primarily towards health care professionals outside of the United States. Haematological oncology is a rapidly advancing and exciting field of medicine and this is the first British textbook addressing haematological oncology written specifically for nurses. The second edition of this successful text has been fully revised and updated throughout in line with recent developments in clinical practice. There are seven new chapters and expanded sections on bone marrow transplant, the immune system and palliative care. Comprehensive coverage of nursing issues in hematological malignancies providing everything a newcomer will need to know Addresses the role of chemotherapy, radiotherapy, and blood marrow transplant treatments in haematological oncology to enable effective management of patients Discusses pertinent daily issues for practicing nurses including oral care, nausea and vomiting, nutrition, infection control, social and psychological issues Reflection points provide an active reading experience and illuminate ideas and issues within the text Six new chapters: Research Priorities; Leadership Issues for Specialist Nurses; Fatigue; Adolescent Issues; Addressing the Needs of Families; Immune Modulators and Novel Therapies Expanded information on bone marrow transplant, the immune system and palliative care Improved design and layout New expert contributors to provide the latest information on their field Handbook of Pediatric Hematology and Oncology Children's Hospital and Research Center Oakland** *John Wiley & Sons* **"This new edition of Handbook of Pediatric Hematology and Oncology: Children's Hospital & Research Center Oakland features practical guidance on how to handle common inpatient and outpatient challenges seen in pediatric hematology and oncology. Designed as a rapid reference to the latest diagnostic and therapeutic protocols, the text is short and didactic and supplemented with practical algorithms and case studies throughout. Completely revised and updated, there are brand-new chapters on subjects including bone marrow transplantation, pain management and palliative care. Comprehensive, yet concise, the handbook presents essential guidelines on the diagnosis and management of the most common pediatric blood disorders and malignancies, in addition to chemotherapeutic drug information and transfusion protocols. Designed for medical students, residents, and fellows, this user-friendly portable reference is also the perfect companion on the ward for pediatric hematology and oncology nurses."--Publisher's website.** **The Washington Manual Hematology and Oncology Subspecialty Consult** *Lippincott Williams & Wilkins* **This handbook is a practical guide to the diagnosis and treatment of hematologic disorders**

**and adult malignancies. Coverage includes both symptom-oriented and disease-oriented management strategies and both acute and chronic problems. The authors discuss the major clinical manifestations and usual management options for each disease entity. Each chapter ends with a list of "key points to remember" and includes current references.**
