Official U.S. and International Financing Institutions A Guide for Exporters and Investors Handbook of Deep Trade Agreements World Bank Publications Deep trade agreements (DTAs) cover not just trade but additional policy areas, such as international flows of investment and labor and the protection of intellectual property rights and the environment. Their goal is integration beyond trade or deep integration. These agreements matter for economic development. Their rules influence how countries (and hence, the people and firms that live and operate within them) transact, invest, work, and ultimately, develop. Trade and investment regimes determine the extent of economic integration, competition rules affect economic efficiency, intellectual property rights matter for innovation, and environmental and labor rules contribute to environmental and social outcomes. This Handbook provides the tools and data needed to analyze these new dimensions of integration and to assess the content and consequences of DTAs. The Handbook and the accompanying database are the result of collaboration between experts in different policy areas from academia and other international organizations, including the International Trade Centre (ITC), Organisation for Economic Co-operation and Development (OECD), United Nations Conference on Trade and Development (UNCTAD), and World Trade Organization (WTO). Accordingly, familiarity with export control laws and regulations around the world has become extremely important for those involved in the international trade of dual-use or military goods, technology, and services. In this preeminent handbook, now in its third edition, two experienced professionals have gathered contributions from expert practitioners and academics. The third edition adds three new country chapters (Brazil, Israel, and Sweden) and a new separate chapter on sanctions and embargoes. In addition to chapters on the international regime in general, the book provides a practical overview of the export/import control regimes covering defence and dual-use goods and services in fourteen key jurisdictions. Country reports each follow the same structure for easy comparison. Issues and topics covered include the following and much more: • import/export legal and regulatory requirements for controlled goods and services; • sanctions for breach of such requirements (civil, administrative, or criminal); • licence application processes; • arms, dual-use and other products embargo (including chemical and biological materials and technology); and • enforcement measures.
