HOPE AND INDEPENDENCE

BLACKS' RESPONSE TO ELECTORAL AND PARTY POLITICS

Russell Sage Foundation Over the past fifteen years, a New Black Politics has swept black candidates into office and registered black voters in numbers unimaginable since the days of Reconstruction. Based on interviews with a representative sample of nearly 1,000 voting-age black Americans, *Hope and Independence* explores blacks' attitudes toward electoral and party politics and toward Jesse Jackson's first presidential bid. Viewed in the light of black political history, the survey reveals enduring themes of hope (for eventual inclusion in traditional politics, despite repeated disappointments) and independence (a strategy of operating outside conventional political institutions in order to achieve incorporation). The authors describe a black electorate that is less alienated than many have suggested. Blacks are more politically engaged than whites with comparable levels of education. And despite growing economic inequality in the black community, the authors find no serious class-based political cleavage. Underlying the widespread support for Jackson among blacks, a distinction emerges between "common fate" solidarity, which is pro-black, committed to internal criticism of the Democratic party, and conscious of commonality with other disadvantaged groups, and "exclusivist" solidarity, which is pro-black but also hostile to whites and less empathetic to other minorities. This second, more divisive type of solidarity expresses itself in the desire for a separate black party or a vote black strategy—but its proponents constitute a small minority of the black electorate and show surprisingly hopeful attitudes toward the Democratic party. *Hope and Independence* will be welcomed by readers concerned with opinion research, the sociology of race, and the psychology of group consciousness. By probing the attitudes of individual blacks in the context of a watershed campaign, this book also makes a vital contribution to our grasp of current electoral politics.

TO LIVE UPON HOPE

MOHICANS AND MISSIONARIES IN THE EIGHTEENTH-CENTURY NORTHEAST

Cornell University Press Two Northeast Indian communities with similar histories of colonization accepted Congregational and Moravian missionaries, respectively, within five years of one another: the Mohicans of Stockbridge, Massachusetts (1735), and Shekomeko, in Dutchess County, New York (1740). In *To Live upon Hope*, Rachel Wheeler explores the question of what "missionary Christianity" became in the hands of these two native communities. The Mohicans of Stockbridge and Shekomeko drew different conclusions from their experiences with colonial powers. Both tried to preserve what they deemed core elements of Mohican culture. The Indians of Stockbridge believed education in English cultural ways was essential to their survival and cast their acceptance of the mission project as a means of preserving their historic roles as cultural intermediaries. The Mohicans of Shekomeko, by contrast, sought new sources of spiritual power that might be accessed in order to combat the ills that came with colonization, such as alcohol and disease. Through extensive research, especially in the Moravian records of day-to-day life, Wheeler offers an understanding of the lived experience of Mohican communities under colonialism. She complicates the understanding of eighteenth-century American Christianity by demonstrating that mission programs were not always driven by the destruction of indigenous culture and the advancement of imperial projects. *To Live upon Hope* challenges the prevailing view of accommodation or resistance as the two poles of Indian responses to European colonization. Colonialism placed severe strains on native peoples, Wheeler finds, yet Indians also exercised a level of agency and creativity that aided in their survival.

AUTONOMY AND INDEPENDENCE

AGING IN AN ERA OF TECHNOLOGY

Springer Nature This book looks at how AgeTech can support the autonomy and independence of people as they grow older. The authors challenge readers to reflect on the concepts of autonomy and independence not as absolutes but as experiences situated within older adults' social connections and environments. Eleven personas of people around the world provide the context for readers to consider the influence of culture and values on how we understand autonomy and independence and the potential role of technology-based supports. The global pandemic provides a backdrop for the unprecedentedly rapid adoption of AgeTech, such as information and communication technologies or mobile applications that benefit older adults. Each persona in the book demonstrates the opportunity for AgeTech to facilitate autonomy and independence in supporting one's identity, decision making, advance care planning, self care, health management, economic and social participation, enjoyment and self fulfillment and mobility in the community. The book features AgeTech from around the world to provide examples of commercially available products as well as research and development within the field. Despite the promise of AgeTech, the book highlights the "digital divide," where some older people experience inadequate access to technology due to their geographic location, socio-economic status, and age. This book is accessible and relevant to everyday readers. Older adults will recognize themselves or peers in the personas and may glean insight from the solutions. Care partners and service providers will identify with the challenges of the personas. AgeTech entrepreneurs, especially "seniorpreneurs," will appreciate that their endeavours represent a growing trend. Researchers will be reminded that the most important research questions are those that will enhance the quality of life of older adults and their sense of autonomy and independence, or relational autonomy and interdependence.

WOMEN AND HEALTHY AGING

LIVING PRODUCTIVELY IN SPITE OF IT ALL

Routledge This book explores what is known about healthy living among older women, emphasizing overcoming illness and adversity. Women and Healthy Aging focuses on common age-related changes and illnesses that frequently occur among women in the later years. It describes these diseases and changes, provides treatment options, highlights preventative measures, and offers suggestions for continued productive living as women age. Since some of the barriers to effective diagnoses, treatments, and implementation of productive living strategies are institutional, two chapters explore public health policies which affect older women and discrimination against older women in health care. This informative book assists health care professionals in the provision of services to older women, helping these professionals become catalysts for enabling older women to "overcome adversity" and continue to lead healthy, productive lives. Many of the most common diseases and age-related changes that affect older women are not "curable." In a society which stresses "cure" as the appropriate role for health care professionals, what are these professionals to do with the legions of older women for whom "cures" may not be possible? How can they assist older women in preventing or slowing the occurrences of diseases and age-related changes? When prevention or cure is not possible, how can they assist older women in living productive, meaningful lives? By addressing specific conditions and diseases, Women and Healthy Aging gives readers focused information on current treatment options, preventative strategies, and suggestions for productive living which are disease- or condition-specific and target older women. Some of the topics covered include menopause, osteoporosis, arthritis, diabetes, heart disease, cancer, Alzheimer's disease, and sensory loss. Practitioners, educators, and students in the fields of nursing, social work, physical therapy, occupational therapy, gerontology, human services, and medicine will find this book an illuminating source of valuable information

and insights into the aging process for women.
