The Elephant Dance

Longhorn Publishers Plc *The Elephant Dance, set within the scenic savannah land with its rich flora and fauna, illuminates the crisis of endangered wildlife at the mercy of invasive and destructive human greed. Embedded in the narrative is a sub-stratum of the destruction of indigenous livelihood and natural habitats. The conflict in the novel pits greedy and corrupt poachers led by Shadrach, Meshach and Abednego against an indigenous minority community of hunters and gatherers led by the elderly Sulunye and Pesi and their sons Reson and Sena. Roped in are the gallant wildlife protection officers, Regina Naitore and Leah Naipande. The indigenous community's cultural attachment to wildlife and the threat to evict them from their ancestral land helps to arrest the runaway poaching menace that has become unmanageable. With the fate of wildlife and their natural habitats having become a major talking point in Kenya as well as in the entire Eastern and Central African region, this story offers insights on how we can save endangered animals, especially elephants and rhinos which have become main targets for poachers who are after their prized horns and tusks. The story also highlights the problem of land grabbing which displaces animals from their natural habitats.*

Affective Health and Masculinities in South Africa

An Ethnography of (In)vulnerability

Routledge *Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.*
