The UNESCO Training Manual for the Protection of the Underwater Cultural Heritage in Latin America and the Caribbean *UNESCO Publishing* The First Modern Economy Success, Failure, and Perseverance of the Dutch Economy, 1500-1815 *Cambridge University Press* The First Modern Economy provides a comprehensive economic history of the Netherlands during its rise to European economic leadership, the 'Golden Age', and subsequent decline (1500-1815). The authors argue that it was the first modern economy, and defend their position with detailed analyses of its major economic sectors, as well as investigations of social structure and macro-economic performance. Dutch economic history is placed in its European and world context, and inter-continental and colonial trade are discussed fully. Special emphasis is placed on the environmental context of economic growth and later decline, as well as on demographic developments. The authors also argue that the Dutch model of development and stagnation is applicable to currently maturing economies. Crossing the Quality Chasm A New Health System for the 21st Century *National Academies Press* Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, Crossing the Quality Chasm also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change. These eight comedies comprise the most extensive collection of Ludvig Holberg plays ever offered in the English language. The translators' general introductions establish a cultural context for the comedies and break new ground in understanding the importance of Holberg's comic aesthetic. Argetsinger's extensive experience in theatre and Rossel's preeminence as a Scandinavian Studies scholar assure that the translations are not only accurate but stage-worthy. The collection opens with *The Political Tinker*, the first Danish play to be produced in the new Danish Theatre, and ends with *The Burial of Danish Comedy*, literally the funeral service for the bankrupt theatre. Three more of Holberg's renowned character comedies follow, *Jean de France*, *Jeppe of the Hill*, and *Erasmus Montanus*, along with his literary satire *Ulysses von Ithacia*. The final two plays demonstrate his ability to write shorter comic works, *The Christmas Party*, a scathing comedy of manners, and *Pernille's Brief Experience as a Lady*, a situation comedy that satirizes the practice of baby-switching.

The Cambridge Handbook of the Law of Algorithms *Cambridge University Press*

Algorithms are a fundamental building block of artificial intelligence - and, increasingly, society - but our legal institutions have largely failed to recognize or respond to this reality. *The Cambridge Handbook of the Law of Algorithms*, which features contributions from US, EU, and Asian legal scholars, discusses the specific challenges algorithms pose not only to current law, but also - as algorithms replace people as decision makers - to the foundations of society itself. The work includes wide coverage of the law as it relates to algorithms, with chapters analyzing how human biases have crept into algorithmic decision-making about who receives housing or credit, the length of sentences for defendants convicted of crimes, and many other decisions that impact constitutionally protected groups. Other issues covered in the work include the impact of algorithms on the law of free speech, intellectual property, and commercial and human rights law.

"The" Illustrated London News Simplified Signs *A Manual Sign-communication System for Special Populations.* Principles, background, and application. Volume 1 "Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually

resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience - such as healthcare professionals, aid workers, military personnel, travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike."--Publisher's website Modern Marine Engineer's Manual *Cornell Maritime Pr/Tidewater Pub* Volume II of the manual that has been absolutely indispensable to the ship's engineer for over forty years was completely updated by a team of practicing marine engineers in 1991. Chapters on obsolete equipment were deleted; those on systems that are still current were updated; and new chapters were written to cover the innovations in materials, machines, and operating practices that evolved recently. Philosophy manual: a South-South perspective *UNESCO Publishing* FRA Guide for Preparing Accidents/incidents Reports Price Setting and Price Regulation in Health Care *OECD Publishing* The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan). A New English Dictionary on Historical Principles Founded Mainly on the Materials Collected by the Philological Society The Popular History of England Of Society and Government from the Earliest Period to Our Own Times Probability with Applications in Engineering, Science, and Technology *Springer* This updated and revised first-course textbook in applied probability provides a contemporary and lively post-calculus introduction to the subject of probability. The exposition reflects a desirable balance between fundamental theory and many applications involving a broad range of real problem scenarios. It is intended to appeal to a wide audience, including mathematics and statistics majors, prospective engineers and scientists, and those business and social science majors interested in the quantitative aspects of their disciplines. The textbook contains enough material for a year-long course, though many instructors will use it for a single term (one semester or one quarter). As such, three course syllabi with expanded course outlines are now available for download on the book's page on the Springer website. A one-term course would cover material in the core chapters (1-4), supplemented by selections from one or more of the remaining chapters on statistical inference (Ch. 5), Markov chains (Ch. 6), stochastic processes (Ch. 7), and signal processing (Ch. 8—available exclusively online and specifically designed for electrical and computer engineers, making the book suitable for a one-term class on random signals and noise). For a year-long course, core chapters (1-4) are accessible to those who have taken a year of univariate differential and integral calculus; matrix algebra, multivariate calculus, and engineering mathematics are needed for the latter, more advanced chapters. At the heart of the textbook's pedagogy are 1,100 applied exercises, ranging from straightforward to reasonably challenging, roughly 700 exercises in the first four "core" chapters alone—a self-contained textbook of problems introducing basic theoretical knowledge necessary for solving problems and illustrating how to solve the problems at hand - in R and MATLAB, including code so that students can create simulations. New to this edition • Updated and re-worked Recommended Coverage for instructors, detailing which courses should use the textbook and how to utilize different sections for various objectives and time constraints • Extended and revised instructions and solutions to problem sets • Overhaul of Section 7.7 on continuous-time Markov chains • Supplementary materials include three sample syllabi and updated solutions manuals for both instructors and students Underwriting Manual Underwriting Analysis Under Title II, Section 203 of the National Housing Act Films and Other Materials for Projection
