The Book of Saints

A Comprehensive Biographical Dictionary

A&C Black A comprehensive biographical dictionary of saints canonised by the Roman Catholic Church. It contains the names of over 10,000 saints, including all modern ones, with significant information about their lives and achievements. There are illustrations showing the saints as identifiable individuals, and the volume includes a list of national martyrs, a bibliography, a glossary, and list of relevant Web sites.

A History of Philosophy

The history of philosophy aims to give a connected account of the different attempts which have been made to solve the problem of existence or to render intelligible to us our world of experience. It is the author of the development of reasoned human thought from its earliest beginnings down to the present time; not a mere chronological enumeration and exposition of philosophical theories, but a study of these in their relation to one another, the times in which they are produced, and the thinkers by whom they are offered. While every system of thought is more or less dependent on the civilization in which it arises, the character of preceding systems, and the personality of its author, it, in turn, exercise a potent influence on the conceptions and institutions of its own and succeeding ages. The history of philosophy must, therefore, endeavour to insert each world-view in its proper setting, to understand it as a part of an organic whole, to connect it with the intellectual, political, moral, social, and religious factors of its present, past, and future. It must also attempt to trace the line of progress in the history of human speculation: show how the mental attitude called philosophy arises, how the different problems and the solutions that are offered provoke new questions and answers, and what advance has been made, on the different stages, towards reaching the goal. Camera Traps in Animal Ecology

Methods and Analyses

Springer Science & Business Media Remote photography and infrared sensors are widely used in the sampling of wildlife populations worldwide, especially for cryptic or elusive species. Guiding the practitioner through the entire process of using camera traps, this book is the first to compile state-of-the-art sampling techniques for the purpose of conducting high-quality science or effective management. Chapters on the evaluation of equipment, field sampling designs, and data analysis methods provide a coherent framework for making inferences about the abundance, species richness, and occupancy of sampled animals. The volume introduces new models that will revolutionize use of camera data to estimate population density, such as the newly developed spatial capture-recapture models. It also includes richly detailed case studies of camera trap work on some of the world's most charismatic, elusive, and endangered wildlife species. Indispensable to wildlife conservationists, ecologists, biologists, and conservation agencies around the world, the text provides a thorough review of the subject as well as a forecast for the use of remote photography in natural resource conservation over the next few decades.

Acts of Archelaus

Brepols Pub Traditionally attributed to Hegemonius, the Acta Archelai is the oldest and most significant anti-Manichaean polemical texts. Originally composed in Greek in the fourth century, it has survived mainly in a near contemporary Latin translation - substantial section of the Greek version has however survived in the Panarion of Epiphanius. The Acta gives a fictional account of a debate between Mani and Archelaus, the Christian bishop of the city of Carchar in Roman Mesopotamia as well as an important summary of his teaching on cosmogony and a highly polemical version of Mani's life. The work would later exercise enormous influence on anti-Manichaean writings in both Late Antiquity and Middle Ages. The present translation, the first to be based on the excellent edition by Charles Beeson, is accompanied by detailed introduction and notes. The Greek version of the summary of Mani's teaching preserved in Greek is also translated separately in an appendix. The book is of basic importance to all scholars of Manichaeism, gnosticism and of medieval heresies.

Catholicism and Fundamentalism

The Attack on ""Romanism" by " Bible Christians"

Ignatius Press Karl Keating defends Catholicism from fundamentalist attacks and explains why fundamentalism has been so successful in converting "Romanists". After showing the origins of fundamentalism, he examines representative anti-Catholic groups and presents their arguments in their own words. His rebuttals are clear, detailed, and charitable. Special emphasis is given to the scriptural basis for Catholic doctrines and beliefs.

The Camera

Ansel Adams Ansel Adams (1902-1984) produced some of the 20th century's most iconic photographic images and helped nurture the art of photography through his creative innovations and peerless technical mastery. The Camera--the first volume in Adams' celebrated series of books on photographic techniques--has taught generations of photographers how to harness the camera's artistic potential. This time-honored handbook distills the knowledge gained through a lifetime in photography and remains as vital today as when it was first published. Along with visualization, image management, Adams' famous Zone System, and other keys to photographic artistry, The Camera covers 35mm, medium-format, and large-format view cameras, while offering detailed advice on camera components such as lenses, shutters, and light meters. Beautifully illustrated with photographs as well as instructive line drawings, this classic manual belongs on every serious photographer's bookshelf. "Adams is a clear-thinking writer whose concepts cannot but help the serious photographer." - New York Times "A master-class kind of guide from an undisputed master." - Publishers Weekly Over 1 million copies sold. Publisher's Note: This ebook of The Camera works best as a digital companion to the print edition. The ebook was produced by electronically scanning and digitizing a print edition, and as a result, your reading device may display images with halftone or moiré patterns.

Expounding the Mathematical Seed. Vol. 1: The Translation

A Translation of Bhāskara I on the Mathematical Chapter of the Āryabhatīya

Springer Science & Business Media In the 5th century, the Indian mathematician Aryabhata wrote a small but famous work on astronomy in 118 verses called the Aryabhatiya. Its second chapter gives a summary of Hindu mathematics up to that point, and 200 years later, the Indian astronomer Bhaskara glossed that chapter. This volume is a literal English translation of Bhaskara's commentary complete with an introduction.

Digital Landscape Photography

In the Footsteps of Ansel Adams and the Great Masters

Hachette UK Updated, expanded, and covering the latest software, this new edition of the bestselling Digital Landscape Photography brings the amazing techniques pioneered by Ansel Adams and his contemporaries to every digital photographer. Ansel Adams' imagery - especially his iconic vision of the American National Parks - is widely published and instantly recognisable. Many photographers will have heard of his renowned Zone System, but that is just the tip of the iceberg; his unparalleled attention to detail, which once required hours in the darkroom with specialist tools, is finally accessible to all. Michael Frye's own photography provides many stunning examples of the results that can be achieved, and as one of Adams' natural successors in the field, he is well placed to analyse the many inspirational shots from the great masters of landscape photography. Combining the cutting edge of today's digital work with some of the best-known photos ever taken, this book a must-read for any landscape or nature photographer.

Camera Trapping

Wildlife Management and Research

CSIRO PUBLISHING Camera trapping in wildlife management and research is a growing global phenomenon. The technology is advancing very quickly, providing unique opportunities for collecting new biological knowledge. In order for fellow camera trap researchers and managers to share their knowledge and experience, the First International Camera Trapping Colloquium in Wildlife Management and Research was held in Sydney, Australia. *Camera Trapping* brings together papers from a selection of the presentations at the colloquium and provides a benchmark of the international developments and uses of camera traps for monitoring wildlife for research and management. Four major themes are presented: case studies demonstrating camera trapping for monitoring; the constraints and pitfalls of camera technologies; design standards and protocols for camera trapping surveys; and the identification, management and analyses of the myriad images that derive from camera trapping studies. The final chapter provides future directions for research using camera traps. Remarkable photographs are included, showing interesting, enlightening and entertaining images of animals 'doing their thing'.

Surprised by Sin

The Reader in Paradise Lost

Harvard University Press In 1967 Milton studies was divided into two camps: one claiming (per Blake and Shelley) that Milton was of the devil's party, the other claiming (per Addison and C. S. Lewis) that the poet's sympathies were obviously with God and his loyal angels. Fish has reconciled the two camps by subsuming their claims in a single overarching thesis.
