Motorized Obsessions

Life, Liberty, and the Small-Bore Engine

JHU Press From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss

of habitat.

Addressing Challenging Moments in Psychotherapy

Clinical Wisdom for Working with Individuals, Groups and Couples

New International Library of Group Analysis "This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Challenging Moments in Psychotherapy* is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

Janey the Vet

Saving Sri Lanka's Street Dogs

Michael O'Mara Books 'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity

called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.

The Greatest Story Never Told

I am writing this book because I have had many wondrous visions and spiritual experiences including a face to face talk with the Lord of Glory. I began hearing the voice of the Holy Spirit at the age of 18 even though I was not studying the Bible or going to church. I must explain; I am not writing this book from the point of view of a historical, linguist, or a professional or a dogmatic religious Christian. I view scripture from a reality of many actual spiritual encounters including a face to face conversation with the Lord of Glory (Jesus the Christ) in which he qualified my understanding of organized religion by saying, 'what you say is true'. I had just made the statement, 'the people do not know you'. This would be because they follow the dictates of organized religion without having an actual relationship with the Spirit of God. This book is designed to expand your mind and give you a better understanding of the elusive and provocative subject of Bible prophecy at its conclusion, you will know the story, without question. This would include a unreputable scientific explanation of creation, what really happened to Adam and Eve in the Garden of Eden, the purpose of Baptism and coded information found in the Bible. In today's world faith in God has become a myriad of life experiences. Everything from the ultra-conservative right who think that God is the sum total of the American historical understanding, to the rainbow liberal who thinks that religion is a necessary evil for the stability of the human psyche. This kind of thinking has fostered a new concept of spirituality and created a new order of the religious elite. If you cannot credential yourself with some seminary, university or college of higher learning, you are not considered to be qualified to be a leader in the church, by the clergy or the laity. Yet most non-Christians consider Christians to be psychologically inferior. I am not placing blame anywhere because there is enough blame to go around. But how have we arrived at such a place in time where this kind of thinking is so commonplace, not only in the churches but also in every echelon of human endeavor. There is a conspiracy in this world today. It is found in our system of government, in our institutions of learning and in our social/religious endeavors: Keep them Guessing, keep modulating the frequency, never acknowledge the truth, glory in the darkness is the mentality that is slowly eroding the greatest society that has ever existed. The challenge for mankind today is to embrace not only wisdom (education) but to disdain all lies and falsehoods. If we consider ourselves to be enlightened, we must demonstrate a true example of understanding, based on knowledge and not dogma. I am a person who believes in the faithfulness of good people even before I developed a personal relationship with God. God believed in me because I believed in goodness a word that organized religion has written out of faithfulness but it's actually the very foundation faithfulness is based.
