It is vitally important that all canning operations are undertaken in keeping with the rigorous application of good manufacturing practices if the food is to be safe at the point of consumption. This demands that all personnel involved in the management and operation of cannery operations have a competent understanding of the technologies involved, including the basic requirements for container integrity and safe heat sterilisation. This book provides a source of up to date and detailed technical information for all those involved in the production of canned fish, from students thinking of entering the industry, to regulatory authorities with responsibility for official inspection, trading companies and retail organisations who purchase canned fish, as well as the manufacturers themselves. An exhaustive range of topics are covered in 15 chapters, including: the current global market; processing, packaging and storage operations; food safety and quality assurance; international legal requirements and laboratory analysis. **Agriculture Handbook Set** includes revised editions of some issues. **Operator's Manual Truck, Forklift, 6000 Lbs, Variable Reach, Rough Terrain, Model 6000M, NSN 3930-01-158-0849 (Army Model MHE 269).
