Oliver Twist

Whole Heart and Soul

Twayne Publishers Dunn uses the author's admission that he put his "whole heart and soul" into the novel's writing to explore the connections between Dickens's own adversity - having to work under wretched conditions in a blacking factory as a boy - and the dire and often life-threatening situations the bastard child Oliver must endure before, as Dickens put it, "trimumphing at last." Taking a controversial and timely subject - England's poor laws, whose debates in Parliament he covered as a court reporter - and a child as his hero, Dickens, Dunn contends, drew together two worlds: the destitute London slums that served as a breeding ground for criminal activity and the innocent world we associate with childhood. Dunn points out that Oliver's "progress" from dark world to light shows, almost paradoxically, that these worlds are linked and will always coexist, however secure one may feel in the latter.

The Connecticut Register and Manual

A State Calendar of Public Officers and Institutions Register and Manual of the State of Connecticut Witnessing Beyond Recognition

U of Minnesota Press Challenging the fundamental tenet of the multicultural movement -- that social struggles turning upon race, gender, and sexuality are struggles for recognition -- this work offers a powerful critique of current conceptions of identity and subjectivity based on Hegelian notions of recognition. The author's critical engagement with major texts of contemporary philosophy prepares the way for a highly original conception of ethics based on witnessing. Central to this project is Oliver's contention that the demand for recognition is a symptom of the pathology of oppression that perpetuates subject-object and same-different hierarchies. While theorists across the disciplines of the humanities and social sciences focus their research on multiculturalism around the struggle for recognition, Oliver argues that the actual texts and survivors' accounts from the aftermath of the Holocaust and slavery are testimonials to a pathos that is "beyond recognition". Oliver traces many of the problems with the recognition model of subjective identity to a particular notion of vision presupposed in theories of recognition and misrecognition. Contesting the idea of an objectifying gaze, she reformulates vision as a loving look that facilitates connection rather than necessitates alienation. As an alternative, Oliver develops a theory of witnessing subjectivity. She suggests that the notion of witnessing, with its double meaning as either eyewitness or bearing witness to the unseen, is more promising than recognition for describing the onset and sustenance of subjectivity. Subjectivity is born out of and sustained by the process of witnessing -- the possibility of address and response -- which puts ethical obligations at its heart.

The Companion to Oliver Twist

"Oliver Twist (1837-9), Dickens's first social novel, introduced its original readers to the shadowy world of London's juvenile gangs, stealing for master criminals in return for food, accommodation, drink and promiscuous sex. Equally engaging were the novel's polemical comments on England's treatment of the poor, the need for order in the counties surrounding London and the importance of public health in the metropolis. David Paroissien's Companion to 'Oliver Twist' recreates these contexts for the modern reader."
"Dickens's objections to legislation in 1834 which attempted to reform and revise England's Poor Laws dating from the sixteenth century are related to several concerns: his distrust of 'theories' of human nature proposed by the supporters of Jeremy Bentham, his belief that people should be tempted to virtue rather than bullied and threatened, and his deeply felt repulsion for the specific provisions of the Poor Law Amendment Act of 1834." "Drawing on government reports of the time and a range of sources not used before, Paroissien also describes how the urban poor buried their dead; the revolting conditions of some of London's worst slums like Field Lane and Jacob's Island; the vivid cant of thieves' slang and the brutal world of adolescent crime, drink, gambling and prostitution. Literary allusions and the suggested originals of characters are identified and, building a case on textual evidence, Paroissien establishes the site of Oliver's birthplace and the infamous workhouse in which he asked for more. The Companion shows convincingly the extraordinary extent to which Dickens drew on the actual world around him for his first sustained criticism of English society."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. In the Realms of Gold

Pioneering in African History

University of Wisconsin Press Born in India of British colonial parents, Roland Oliver moved to Africa as a young man and became one of the continent's leading modern historians. In this memoir, he writes of his work in training African scholars to conduct regional surveys and collect oral histories, in assembling the multivolume Cambridge History of Africa, and in struggling to give African history academic legitimacy at a time when most universities did not have scholars qualified to teach even an elementary course in the subject. Along the way Oliver considers the questions that engage Africanists today, such as the significance of European colonialism in the historical development of the continent and whether nationalism did more harm than good in the formation of modern African states.

Misogynous Economies

The Business of Literature in Eighteenth-Century Britain

University Press of Kentucky The eighteenth century saw the birth of the concept of literature as business: literature critiqued and promoted capitalism, and books themselves became highly marketable canonical objects. During this period, misogynous representations of women often served to advance capitalist desires and to redirect feelings of antagonism toward the emerging capitalist order. Misogynous Economies proposes that oppression of women may not have been the primary goal of these misogynistic depictions. Using psychoanalytic concepts developed by Julia Kristeva, Mandell argues that passionate feelings about the alienating socioeconomic changes brought on by capitalism were displaced onto representations that inspired hatred of women and disgust with

the female body. Such displacements also played a role in canon formation. The accepted literary canon resulted not simply from choices made by eighteenth-century critics but also, as Mandell argues, from editorial and production practices designed to stimulate readers' desires to identify with male poets. Mandell considers a range of authors, from Dryden and Pope to Anna Letitia Barbauld, throughout the eighteenth century. She also reconsiders Augustan satire, offering a radically new view that its misogyny is an attempt to resist the commodification of literature. Mandell shows how misogyny was put to use in public discourse by a culture confronting modernization and resisting alienation.
