If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time. **Harley-Davidson FXD/FLD Dyna Series 2012-2017 FXDB Street Bob (2012-2017), FXDB 103 Street Bob (2014-2017), FXDBA Street Bob (2013 Factory Custom), FXDBA 103 Street Bob (2013 Factory Custom), FXDBB 103 Street Bob (2014 Factory Custom, 2015-2016 Limited) Haynes Manuals N. Straight from the factory, in its standard form, the Sportster routinely proves an entry-level motorcycle providing a relatively tame ride. This book aims to change all that and to show every Sportster rider how to free the beast in his or her bike. With expert, detailed advice on the proper mechanical massaging and plenty of helpful diagrams and photos this updated, third edition of Buzz Buzzelli's best-selling handbook shows how the Sportster can be transformed into the superbike of old. Including a history of the Sportster from its birth in 1957 to the recent introduction of a new engine (only the third in its long life), this book has everything it takes to open up the gates of hell and give the Sportster its head. **Harley-Davidson XR-750** Harley-Davidson's XR-750 has ruled dirt-track racing for more than two decades. In fact, no other race car or motorcycle has won as many races over such a long time period. And the victories continue today. This is the story of the legendary XR-750 from its development in 1970, when it was created to replace the aging KR. The first XRs used iron cylinder heads and barrels-and were painfully slow. By 1972, the motorcycles were redesigned with aluminum heads and barrels, and the XR-750 took home the trophies. Found here is the development of the XR-750 with a technical analysis of the complete motorcycle, detailing specifications, modifications, innovations, and aftermarket components. This is also the story of the men who designed, tuned and raced the XR-750. It was their engineering skill, iron-willed riding and tuning secrets that made the motorcycle a winner. The ranks include Jay Springsteen, Dick O'Brien, Bill Werner, Scott Parker, Cal Rayborn, Mert Lawwill, the Brelsford brothers, Gary Scott, Ricky Graham, and more. The book is divided into three parts, the motorcycle's development, the season-by-season race championships, and how the pros make the bikes

go-and go fast. More than 300 photos tell the inside story of the XR-750 on the dirt track, the XR-750 and XR-1000 on the street and XR7T on the road-race circuits. Allan Girdler writes of the Harley-Davidson XR-750 with passion, enthusiasm and firsthand experience. He brings his straight-talking technical writing and colorful story-telling to the history of the XR-750.
