CPR TRAINING MANUAL

A RESCUER'S GUIDE TO BASIC LIFE SUPPORT

BASIC LIFE SUPPORT (BLS) PROVIDER HANDBOOK

The Save a Life Initiative has just released its newest course: Basic Life Support. This manual is based on the 2015-2020 Basic Life Support guidelines published by the American Heart Association. The Basic Life Support (BLS) Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in a Basic Life Support Certification or Recertification Course. It serves as the primary training material for BLS Certification and Recertification courses. Although it is primarily intended for professionals to use during their courses, the handbook was also created to serve as daily resource material for health care professionals. Information covered in the handbook includes Basic Life Support instruction for adults and children, AED usage, airway obstruction and rescue breathing techniques, and more. Specific Algorithms for BLS and more are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible.

HOME HEALTH AIDE TRAINING MANUAL

Jones & Bartlett Learning This Protocol delineates the evidence for using devices for noninvasive patient monitoring of blood pressure, heart rhythms, pulse oximetry, end-tidal carbon dioxide, and respiratory waveforms. These protocols guide clinicians in the appropriate selection of patients for use of the device, application of the device, initial and ongoing monitoring, device removal, and selected aspects of quality control.

OCULAR THERAPEUTICS HANDBOOK

A CLINICAL MANUAL

Lippincott Williams & Wilkins This compact, portable, and user-friendly clinical manual is geared to the needs of all health care professionals who treat ocular disorders. Organized and designed for rapid reference, the book is packed with information on the entire spectrum of ocular disorders and their treatment. This Second Edition is thoroughly updated, greatly expanded in scope, and includes ICD-9 codes. The book begins with a Quick Reference Section where clinicians can find vital facts about ocular microbiology, laboratory tests, ocular side effects of systemic medications, and pharmaceutical agents used in eye care. The second section contains succinct, well-organized monographs on over 150 disorders.

UNITED STATES ARMY AVIATION DIGEST

ESSENTIAL MEDICAL TERMINOLOGY

Jones & Bartlett Learning This popular introduction to medical terminology is flexible enough to be used in a traditional or a self-instructional course format. The level of detail is appropriate for those students needing only a general knowledge of medical terminology, particularly medical secretaries, medical technologists, medical librarians, and persons in all allied and paramedical health professions. After studying the basics of pronunciation, students can study the chapters in any order the instructor deems appropriate. The text has been thoughtfully revised based on the feedback of many adopters. The result is a more streamlined presentation with enhanced student learning aids. Organizational changes include the following: all general word parts are grouped together in Unit One; a review chapter on root words

is provided in Unit Four, immediately before the body systems; the coverage of body systems in Unit Five closely parallels the content of earlier chapters; and an overview of each body system is included at the beginning of the chapters in Unit Five.

APPLIED KINESIOLOGY

A TRAINING MANUAL AND REFERENCE BOOK OF BASIC PRINCIPLES AND PRACTICES

North Atlantic Books An introductory textbook complete with professional photos and graphic diagrams, this manual explains basic and advanced techniques of applied kinesiology. Frost has developed a comprehensive guide, mapping out the basic principles and applications whereby the muscles of the body act as indicators of deeper stresses and discomforts that often have their root in muscle weakness. Therapeutic solutions range from muscle strengthening to reflex point massage to manipulation of the neuromuscular spindle cells.

ADVANCED PAEDIATRIC LIFE SUPPORT, AUSTRALIA AND NEW ZEALAND

A PRACTICAL APPROACH TO EMERGENCIES

John Wiley & Sons Advanced Paediatric Life Support is the internationally renowned manual on emergency paediatric care, written to support the course run by the Advanced Life Support Group. This edition has been adapted specifically for use in Australia and New Zealand, with the latest procedures, medications and clinical best practice to match the guidelines of the Australia and New Zealand Resuscitation Councils. Using their structured approach, a tried and tested practical method of treating children during the crucial first few hours of a life threatening illness or injury, Advanced Paediatric Life Support is used by doctors, nurses and allied health professionals dealing with emergencies in children. Its clear layout and straightforward style make it a highly practical tool both for training and in the event of an emergency. The sixth edition includes major new features bringing it right up

to date, including: Fully adapted for use in Australia and New Zealand, with updates to chapters on shock, the choking child, basic life support and cardiac arrest The latest International Liaison Committee on Resuscitation (ILCOR) 2015 Guidelines The latest consensus guidelines on paediatric trauma Enhanced discussions on the importance of human factors A new and improved design including full colour photographs and diagrams Free access to the Wiley E-Text With this book at hand, all those providing care during paediatric emergencies can be confident in having comprehensive and authoritative guidance on the recognition and management of life threatening conditions necessary to save a child's life.

A PERSPECTIVE ON COUNTER IED OPERATIONS IN SOUTHERN AFGHANISTAN 2008-2009

Xlibris Corporation This book provides one perspective on the operational activities associated with executing offensive counter-IED operations in Southern Afghanistan during 2008-2009. This period of the war experienced more IED attacks on US and coalition forces than another time during the war. The comments and observations made by the author, Colonel Ed Toy USA are drawn from his personal experience while serving as the Chief of Counter-IED operations in Regional Command-South and the Deputy Commander for Joint Task Force Paladin at Kandahar Airfield. COL Toys perspective is not necessarily the official viewpoint of the US military or the contributing nations to the International Security Assistance Forces (ISAF) however much of the research and commentary are taken from actual events either drawn from the authors own personal experience or directly from US and ISAF forces conducting C-IED operations during this the bloodiest year of the Afghan war.
