The Free Economy and the Strong State

The Politics of Thatcherism

Bloomsbury Publishing *The Thatcher era was a turbulent and controversial period in British politics. Andrew Gamble's authoritative account - now revised and updated to cover Thatcher's fall and legacy - analyses the ideology, statecraft, and economic and social programme of the Thatcher Government. He explores rival interpretations of Thatcherism and assesses the evidence for claims that the Thatcher Government transformed British politics. A new conclusion considers the Conservative Party after Thatcher. New to this Edition: - Both Thatcher's fall and legacy covered in this text - New conclusion appraising the Conservative party in the wake of Thatcher*

Global Trends 2030

Alternative Worlds

Createspace Independent Publishing Platform *This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations. Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE CONFLICTED IDEOLOGICAL LANDSCAPE 12 Diffusion of Power 15 THE RISE AND FALL OF COUNTRIES: NOT THE SAME OLD STORY 17 THE LIMITS OF HARD POWER IN THE WORLD OF 2030 18 Demographic Patterns 20 Widespread Aging 20 Shrinking Number of Youthful Countries 22 A New Age of Migration 23 The World as Urban 26 Growing Food, Water, and Energy Nexus 30 Food, Water, and Climate 30 A Brighter Energy Outlook 34 Game-Changers 38 The Crisis-Prone Global Economy 40 The Plight of the West 40 Crunch Time Too for the Emerging Powers 43 A Multipolar Global Economy: Inherently More Fragile? 46 The Governance Gap 48 Governance Starts at Home: Risks and Opportunities 48 INCREASED FOCUS ON EQUALITY AND OPENNESS 53 NEW GOVERNMENTAL FORMS 54 A New Regional Order? 55 Global Multilateral Cooperation 55 The Potential for Increased Conflict 59 INTRASTATE CONFLICT: CONTINUED DECLINE 59 Interstate Conflict: Chances Rising 61 Wider Scope of Regional Instability 70 The Middle East: At a Tipping Point 70 South Asia: Shocks on the Horizon 75 East Asia: Multiple Strategic Futures 76 Europe: Transforming Itself 78 Sub-Saharan Africa: Turning a Corner by 2030? 79 Latin America: More Prosperous but Inherently Fragile 81 The Impact of New Technologies 83 Information Technologies 83 AUTOMATION AND MANUFACTURING TECHNOLOGIES 87 Resource Technologies 90 Health Technologies 95 The Role of the United States 98 Steady US Role 98 Multiple Potential Scenarios for the United States' Global*

The Fourth Industrial Revolution

Penguin UK The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

Global Trends 2030

Alternative Worlds : a Publication of the National Intelligence Council

U.S. Government Printing Office This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous *Global Trends* reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of *Global Trends 2030*. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

English Noun Phrases from a Functional-Cognitive Perspective

Current issues

John Benjamins Publishing Company Despite a significant increase in interest over the last two decades in the English Noun Phrase, there are still many open questions and unexplored issues. The papers collected in this volume contribute to this ongoing research by addressing a range of topics concerning the internal structure, use and development of English Noun Phrases. The eleven chapters represent three main themes: 1. Determination, modification and complementation; 2. Shell nouns and the X-is construction; 3. Binominal constructions. These topics are approached in different ways: some chapters are synchronic in nature, others diachronic; and while most subscribe to functional-cognitive modelling, some take a more formal approach. In addition, different methodologies are employed, varying from qualitative and quantitative corpus analyses to experimental methods. As a result, the contributions to this volume represent both the main topics currently discussed in research on the English Noun Phrase, and the diversity in the way these topics are investigated.

100 Years of Bentley

White Lion Publishing One of the most recognised and revered car brands, Bentley celebrates its centenary in 2019. In conjunction with the Bentley Drivers Club and the W.O. Bentley Memorial Foundation, *100 Years of Bentley* is a lavish celebration of the company,

from its earliest models right up the modern day cars. A six-times winner in the gruelling Le Mans 24-hour race, Bentley is also the brand behind iconic cars such as the 41/2-Litre 'Blower', the R-type Continental, and modern classics such as the Continental GT and Mulsanne. Featuring more than 200 pictures, many from the club's archives and some never seen in print before, this beautiful book details the whole history of Bentley. From W.O. Bentley's early days as a railway engineer along with his first attempts at modifying French DFP cars, to the company's early racing exploits, including its victories in the early Le Mans races. Covering the Bentley brand's revival in the 1980s and renewed impetus when it was acquired by the Volkswagen group, the story is brought up to date with the awesome new Bentleys built for the 21st century and the new era of electrification just around the corner.

The British Folk Revival 1944-2002

Routledge This title was first published in 2003. This work considers the post-war folk revival in Britain from a popular music studies perspective. Michael Brocken provides a historical narrative of the folk revival from the 1940s up until the 1990s, beginning with the emergence of the revival from within and around the left-wing movements of the 1940s and 1950s. Key figures and organizations such as the Workers' Music Association, the BBC, the English Folk Dance and Song Society, A.L. Lloyd and Ewan MacColl are examined closely. By looking at the work of British Communist Party splinter groups it is possible to see the refraction of folk music as a political tool. Brocken openly challenges folk historicity and internal narrative by discussing the convergence of folk and pop during the 1950s and 1960s. The significant development of the folk/rock hybrid is considered alongside "class", "Americana", radio and the strength of pop culture. Brocken shows how the dichotomy of artistic (natural) versus industry (mass-produced) music since the 1970s has led to a fragmentation and constriction of the folk revival. The study concludes with a look at the upsurge of the folk music industry, the growth of festivals and the implications of the Internet for the British folk revival. Brocken suggests the way forward should involve an acknowledgement that folk music is not superior to but is, in fact, a form of popular music.

Minerals Yearbook

The plan for growth

The Stationery Office This supporting document to Budget 2011 (HC 836, ISBN 9780102971033) sets out the Government's plan for sustainable, long-term economic growth for the UK economy. It sets out four ambitions that underpin this objective, these are: to create the most competitive tax system in the G20; to make the UK one of the best places in Europe to start, finance and grow a business; to encourage investment and exports as a route to a more balanced economy and to create a more educated workforce that is the most flexible in Europe. Growth review measures outlined in Chapter 2 cover these priority areas: planning; regulation; trade and inward investment; access to finance; competition; corporate governance; low carbon. The first phase of the review also examined eight sectors of the economy to remove the barriers to growth that affect them: advanced manufacturing; healthcare and life sciences; digital and creative industries; professional and business services; retail; construction; space; tourism.

Prospects of the Industrial Areas of Great Britain

Routledge This book, first published in 1945, is based primarily on some fifty regional reports submitted to the Government between 1941 and 1943. The original reports, condensed and brought together in this volume, were for the most part prepared by members of university departments of economics or geography.

New Scientist

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

The British Journal of Photography

The Consequences of Modernity

John Wiley & Sons In this major theoretical statement, the author offers a new and provocative interpretation of the institutional transformations associated with modernity. We do not as yet, he argues, live in a post-modern world. Rather the distinctive characteristics of our major social institutions in the closing period of the twentieth century express the emergence of a period of 'high modernity,' in which prior trends are radicalised rather than undermined. A post-modern social universe may eventually come into being, but this as yet lies 'on the other side' of the forms of social and cultural organization which currently dominate world history. In developing an account of the nature of modernity, Giddens concentrates upon analyzing the intersections between trust and risk, and security and danger, in the modern world. Both the trust mechanisms associated with modernity and the distinctive 'risk profile' it produces, he argues, are distinctively different from those characteristic of pre-modern social orders. This book build upon the author's previous theoretical writings, and will be of fundamental interest to anyone concerned with Giddens's overall project. However, the work covers issues which the author has not previously analyzed and extends the scope of his work into areas of pressing practical concern. This book will be essential reading for second year undergraduates and above in sociology, politics, philosophy, and cultural studies.

The Optical Munitions Industry in Great Britain, 1888–1923

Routledge *Running counter to the general decline of technological industries in post-Victorian Britain, optical munitions provides an important, previously overlooked, study into the business of manufacturing.*

Britain's Glorious Aircraft Industry

100 Years of Success, Setback and Change

Air World *Great Britain's aircraft industry started in 1908, with the first formally registered organization in the world to offer to design and build an aeroplane 'for commercial gain'. This was when the Short brothers, Oswald, Eustace and Horace, decided that aeroplanes would overtake balloons as a business opportunity in the aeronautical world and formed the partnership 'Short Brothers'. From this start, the UK aircraft industry expanded and grew rapidly, going on throughout the rest of the twentieth century to achieve many 'firsts' in the aeronautical world, with some remarkable technical successes and gaining a reputation to match. There were also setbacks along the way. This book tells the complete story of the 110 years since the start, all the companies formed and the aircraft they produced, highlighting the advances in aeronautical ambition and technology. It is the story of the creation, survival and decline of all one hundred and twenty-three of the aircraft design and construction companies formed between 1908 and 2018. The exhilaration of success and the magic of aviation technology are vividly illustrated by the technical and political birth stories of iconic projects, such as the Cirrus/Gypsy Moths, the Tiger Moth, the flying boats of Imperial Airways, Spitfire, Lancaster, Viscount, Vulcan, Harrier, Buccaneer and many more. The rotary wing industry is not forgotten. The birth of the jet turbine engine and the quest for supersonic speed is included. The stories of the disappointments of failure and disaster, such as the Brabazon, Comet, Princess, Rotodyne and TSR-2, and the growth of international collaboration in Concorde, Tornado, Airbus, Eurofighter Typhoon and other projects are included, in the context of the international scene and domestic politics. The conclusion highlights the prominent reminiscences and speculates on the future of the aircraft industry in Britain.*

J. Arthur Rank and the British Film Industry

Routledge *Presiding over the "golden era" of the British Film Industry from the mid to late 1940s, J. Arthur Rank financed movies such as Oliver Twist, The Red Shoes, Brief Encounter, Caesar and Cleopatra and Black Narcissus. Never before, and never since, has the industry risen to such heights. J. Arthur Rank charts every aspect of the robust film culture that Rank helped to create. Having started out with relatively little knowledge of the cinema, Rank's sponsorship was to bring about astounding progress within the industry, and by establishing an organization comparable in size to any of the major Hollywood studios, Rank briefly managed to reconcile and consolidate the competing demands of "art" and "business" - an achievement very much absent from today's diminished and fragmented film industry. Macnab goes on to explain the eventual collapse of the Rank experiment amidst the economic and political maelstrom of post-war Britain, highlighting the problems still facing the industry today. By meshing archival research with interviews with Rank's contemporaries and members of his family, this definitive study firmly restores Rank to his rightful place at the hub of British film history.*

Global Trends 2040

A More Contested World

Cosimo Reports *"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.*

Oxford Playhouse

High and Low Drama in a University City

Univ of Hertfordshire Press *To coincide with the 70th anniversary of its present home on Beaumont Street, Oxford, this account traces the history of the Oxford Playhouse from its earliest roots--a production of Agamemnon in 1880--and the founding of the Oxford University Dramatic Society to the rebuilding of Oxford's New Theatre and, eventually, the launch of the Playhouse itself. Recalling actress Jane Ellis' early desire for a venue where she might play decent roles, as well as her efforts to make it happen, the book also celebrates a galaxy of stars who have acted there, including Flora Robson, John Gielgud, Maggie Smith, Ronnie Barker, Judi Dench, and Helena Bonham Carter, and records the first steps of students such as Rowan Atkinson. In addition to chronicling developments in the theater's management and architecture, this comprehensive tribute explores its highbrow and lowbrow programs, its period of prosperity and postwar collapse, and its unique and vital relationship with the University of Oxford.*

Contingency in International Law

On the Possibility of Different Legal Histories

Oxford University Press *This volume brings together a group of renowned experts to discuss the question of whether international law could have developed differently. Contributors explore contingency in theory and practice across a range of fields, including those related to migrants and refugees, the sea and natural resources, and human rights.*
