CODE OF PRACTICE

MENTAL HEALTH ACT 1983

The Stationery Office *This Code of Practice is a reference tool for those dealing with, and caring for people admitted to hospital and care homes with mental health problems. Authored by the Department of Health and produced following wide consultation with those who provide and receive services under the Mental Health Act, this publication will come into force on 3 November 2008. Through the Mental Health Act 2007, the Government has updated the 1983 Act to ensure it keeps pace with the changes in the way that mental health services are - and need to be - delivered. This publication provides guidance and advice to registered medical practitioners, approved clinicians, managers and staff of hospitals, and approved mental health professionals on how they should proceed when undertaking duties under the Act. It also gives guidance to doctors and other professionals about certain aspects of medical treatment for mental disorder more generally. The Mental Health Act Code of Practice is also aimed at all of those working in primary care, Mental Health Trusts, NHS Foundation Trusts as well as solicitors and attorneys who advise on mental health law. The Code should also be beneficial to the police and ambulance services and others in health and social services (including the independent and voluntary sectors) involved in providing services to people who are, or may become, subject to compulsory measures under the Act. It will also be a guide for those working with people with specific mental health needs such as those in nursing and care homes, and those in prison.*

CRITICAL CARE MANUAL OF CLINICAL PROCEDURES AND COMPETENCIES

John Wiley & Sons *This manual is aimed at all healthcare practitioners, from novice to expert, who care for the critically ill patient, recognising that different disciplines contribute to the provision of effective care and that essential knowledge and skills are shared by all practitioners. All information is presented in a clear, double-page spread with key information accompanied by tables, illustrations, photographs and diagrams. Key features: Superbly illustrated, with full colour illustrations throughout An accessible, evidence-based, introduction to a complex topic Presents information structured according to the Resuscitation Council's systematic ABCDE framework for ease of understanding Accompanied by patient case studies to help apply theory to practice *Acute and Critical Care Nursing at a Glance* is ideal for nursing students, healthcare assistants, and registered nurses working within the acute and critical care setting.

CLINICAL PSYCHOLOGY IN THE MENTAL HEALTH INPATIENT SETTING

INTERNATIONAL PERSPECTIVES

Routledge This ground-breaking volume provides an encompassing and detailed account of clinical psychologists' highly varied work on the psychiatric ward in mental health inpatient settings. An international collection of clinical psychologists describe challenges and achievements inherent to their work, illustrating application of established, state-of-the-art, and cutting-edge methods and modes of intervention, assessment, therapeutic work, training, and leadership roles currently practiced in these settings. Chapters present numerous examples of psychologists' ability to contribute in multiple ways, benefiting patients, staff, and the overall functioning of the ward. Each of the book's four sections is dedicated to a specific domain of the clinical psychologist's work within the psychiatric inpatient setting. These include systemic modes of intervention; psychotherapeutic interventions; assessment and psychodiagnosis; and internship and supervision. From novice to experienced practitioners, psychologists will gain insight from the innovative and creative ideas this book brings to the practice of clinical psychology, as well as the practical suggestions that will enhance the varied interventions and therapeutic work they do in such settings.

REGISTRIES FOR EVALUATING PATIENT OUTCOMES

A USER'S GUIDE

Government Printing Office This *User's Guide* is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve

many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

PREVENTION AND MANAGEMENT OF VIOLENCE

GUIDANCE FOR MENTAL HEALTHCARE PROFESSIONALS

RCPsych Publications This book presents evidence-based guidance on the prevention and management of aggression and violence by patients with mental disorder. It provides a comprehensive overview of best practice and will be of practical use to a wide range of mental health professionals working in community, in-patient or prison settings. Such sensitive issues as violence in patients from minority ethnic backgrounds, ways to apply physical and pharmaceutical methods of restraint safely, and preserving patients' dignity in highly volatile situations, are addressed. The guidance also covers: relevant legislation; assessment and management of risk of violence in different settings; specific populations, including older adults and people with intellectual disabilities; both non-pharmacological management techniques and use of medication; and liaison with the police, Crown prosecution service and MAPPA (Multi-Agency Public Protection Arrangements). Health service managers, as well as clinicians dealing with potentially violent incidents day to day, will find the report informative and the guidelines contained within clear and easy to follow.

MEDICAL RECORDS MANUAL

A GUIDE FOR DEVELOPING COUNTRIES

This manual is aimed at helping medical record workers in the development and management of medical records services of health care facilities in developing countries in an effective and efficient manner. It has not been designed as an introductory text to medical record management, but rather as an aid to medical record officers (MROs) and medical record clerks by describing appropriate systems for Medical Records Departments in developing countries. It covers manual procedures and may be used as an adjunct to computerized systems. It does not provide all of the options for medical record management, but it does provide one option in each area for the management of medical records in developing countries. A list the textbooks that provide detailed information on medical record management is also provided.

REPORT OF THE MID STAFFORDSHIRE NHS FOUNDATION TRUST PUBLIC INQUIRY

EXECUTIVE SUMMARY

The Stationery Office *This public inquiry report into serious failings in healthcare that took place at the Mid Staffordshire NHS Foundation Trust builds on the first independent report published in February 2010 (ISBN 9780102964394). It further examines the suffering of patients caused by failures by the Trust: there was a failure to listen to its patients and staff or ensure correction of deficiencies. There was also a failure to tackle the insidious negative culture involving poor standards and a disengagement from managerial and leadership responsibilities. These failures are in part a consequence of allowing a focus on reaching national access targets, achieving financial balance and seeking foundation trust status at the cost of delivering acceptable care standards. Further, the checks and balances that operate within the NHS system should have prevented the serious systemic failure that developed at Mid Staffs. The system failed in its primary duty to protect patients and maintain confidence in the healthcare system. This report identifies numerous warning signs that could and should have alerted the system to problems developing at the Trust. It also sets out 290 recommendations grouped around: (i) putting the patient first; (ii) developing a set of fundamental standards, easily understood and accepted by patients; (iii) providing professionally endorsed and evidence-based means of compliance of standards that are understood and adopted by staff; (iv) ensuring openness, transparency and candour throughout system; (v) policing of these standards by the healthcare regulator; (vi) making all those who provide care for patients, properly accountable; (vii) enhancing recruitment, education, training and support of all key contributors to the provision of healthcare; (viii) developing and sharing ever improving means of measuring and understanding the performance of individual professionals, teams, units and provider organisations for the patients, the public, and other stakeholders.*

ANNUAL UPDATE IN INTENSIVE CARE AND EMERGENCY MEDICINE 2017

Springer *The Annual Update compiles reviews of the most recent developments in experimental and clinical intensive care and emergency medicine research and practice in one comprehensive reference book. The chapters are written by well recognized experts in these fields. The book is addressed to everyone involved in internal medicine, anesthesia, surgery, pediatrics, intensive care and emergency medicine.*

PRICE SETTING AND PRICE REGULATION IN HEALTH CARE

OECD Publishing *The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).*

THE AMERICAN PSYCHIATRIC ASSOCIATION PRACTICE GUIDELINES FOR THE PSYCHIATRIC EVALUATION OF ADULTS, THIRD EDITION

American Psychiatric Pub *Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and*

documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

HIGH QUALITY CARE FOR ALL

NHS NEXT STAGE REVIEW FINAL REPORT

The Stationery Office This review incorporates the views and visions of 2,000 clinicians and other health and social care professionals from every NHS region in England, and has been developed in discussion with patients, carers and the general public. The changes proposed are locally-led, patient-centred and clinically driven. Chapter 2 identifies the challenges facing the NHS in the 21st century: ever higher expectations; demand driven by demographics as people live longer; health in an age of information and connectivity; the changing nature of disease; advances in treatment; a changing health workplace. Chapter 3 outlines the proposals to deliver high quality care for patients and the public, with an emphasis on helping people to stay healthy, empowering patients, providing the most effective treatments, and keeping patients as safe as possible in healthcare environments. The importance of quality in all aspects of the NHS is reinforced in chapter 4, and must be understood from the perspective of the patient's safety, experience in care received and the effectiveness of that care. Best practice will be widely promoted, with a central role for the National Institute for Health and Clinical Excellence (NICE) in expanding national standards. This will bring clarity to the high standards expected and quality performance will be measured and published. The review outlines the need to put frontline staff in control of this drive for quality (chapter 5), with greater freedom to use their expertise and skill and decision-making to find innovative ways to improve care for patients. Clinical and managerial leadership skills at the local level need further development, and all levels of staff will receive support through education and training (chapter 6). The review recommends the introduction of an NHS Constitution (chapter 7). The final chapter sets out the means of implementation.

ACUTE AND CHRONIC WOUNDS - E-BOOK

Elsevier Health Sciences Prevent and manage wounds with this expert, all-inclusive resource! *Acute & Chronic Wounds: Current Management Concepts, 5th Edition* provides the latest diagnostic and treatment guidelines to help you provide quality care for patients with wounds. This textbook presents an interprofessional approach to maintaining skin integrity and managing the numerous types of skin damage including topics that range from the physiology of wound healing, general principles of wound management, vulnerable patient populations, management of percutaneous tubes, and specific care instructions to program development. Written by respected nursing educators Ruth Bryant and Denise Nix, this bestselling reference also provides excellent preparation for all wound certification exams. A comprehensive approach to the care of patients with acute and chronic wounds guides students and health care providers to design, deliver and evaluate quality skin and wound care in a systematic fashion; the comprehensive approach includes the latest advances in diagnosis, differentiation of wound types, nutrition, prevention, treatment, and pharmacology. Self-assessment questions and answers in each chapter help you assess your knowledge and prepare for all wound certification exams. Checklists offer a concise, easy-to-read summary of the steps needed to achieve the best patient care outcomes. Risk assessment scales help in determining a patient's risk for developing a wound, and wound classification tools identify the proper terminology to be used in documentation. Learning objectives at the beginning of each chapter focus your study on the most important content. Principles for practice development boost outcomes and productivity in agencies and institutions, home care, acute care, long-term care, and long-term acute care settings. NEW coverage includes the latest guidelines from WOCN, AAWC, NPUAP, EPUAP, and PPIA, and the American College of Physicians. New sections cover the prevention and management of biofilm, the new skin tear classification system, MASD and MARCI, CTP terminology and classification scheme, and integration of the Health Belief Model. NEW! Additional full-color photographs show the differential diagnosis of types of skin damage, management of fistulas, and NPWT procedures. NEW! Clinical Consult features help in applying concepts to clinical practice, showing students and health care professionals how to assess, manage, and document real-life patient and staff encounters using the ADPIE framework. NEW two-color illustrations and design make the book more visually appealing.
