**Key Issues in Health and Social Care** A Companion to Learning Routledge Key Themes in Health and Social Care is a learning resource for students in health and social care. It provides an overview of foundational issues and core themes in the field and introduces key areas of debate, moving from an introductory level to in-depth discussion as the book progresses. Divided into three parts: the first part sets the scene, addressing introductory psychology and sociology, social policy, equality and diversity, skills for practice, and working with people the second part considers key themes such as the contribution of philosophy and politics; criminal justice; management of services; the relationship between place and wellbeing; research in health and social care; theories of counselling; housing and the built environment the third part looks at discrete areas of practice such as mental health; substance abuse, protection work; health promotion; disability studies; working with men; child welfare and public responsibility. Each chapter begins with an outline of the content and learning outcomes and includes reflective exercises to allow students to reflect on what they have read, review their learning and consolidate their understanding. Time-pressed readers wanting to 'dip into' the book for relevant areas can do so but, read from cover to cover, the book provides a comprehensive introduction to the key areas of contemporary health and social care practice. It will be particularly helpful for students undertaking health and social care undergraduate and foundation degrees. **Social Policy and Social Change** Toward the Creation of Social and Economic Justice SAGE Publications The Second Edition of Social Policy and Social Change is a timely examination of the field, unique in its inclusion of both a historical analysis of problems and policy and an exploration of how capitalism and the market economy have contributed to them. The New Edition of this seminal text examines issues of discrimination, health care, housing, income, and child welfare and considers the policies that strive to improve them. With a focus on how domestic social policies can be transformed to promote social justice for all groups, Jimenez et al. consider the impact of globalization in the United States while addressing developing concerns now emerging in the global village. The Oxford Handbook of Transnational Law Oxford University Press The Oxford Handbook of Transnational Law offers a unique and unparalleled treatment and presentation in the field of Transnational Law that has become one of the most intriguing and innovative developments in legal doctrine, scholarship, theory, and practice today. This in itself constitutes an ambitious editorial project, not only within law and legal doctrine, but also with regard to an increasing interest in an interdisciplinary engagement of law with social sciences - including sociology, anthropology, political science, geography, and political theory. Closely tied into the substantive transformation that many legal fields are undergoing is the observation that many of these developments are driven by changes in an increasingly global legal practice today. The concept then, of 'transnational law' aims at capturing the distinctly border-crossing nature even of those legal fields which had for the longest been time been seen as having merely 'domestic' relevance. This shift also requires a conscious effort among law school classroom instructors, casebook authors, and curriculum reformers to adapt their teaching content to these circumstances. As the authors of this Handbook make clear, this adaptation requires a close dialogue between a scholarly investigation into the transnational 'concept of law' and the challenges faced by practicing lawyers, be that as solicitor, in-house counsel, as judges, or as bureaucrats in a globalized regulatory and socio-economic environment. While the main thrust is on the transnationalization of legal doctrine and legal theory, with a considerable contribution from and engagement with social sciences, the Handbook features numerous reflections on the relationship between transnational law and legal practice. **Our Common Future** Developing Technology-Rich Teacher Education Programs: Key Issues Key Issues IGI Global "This book offers professional teacher educators a rare opportunity to harvest the thinking of pioneering colleagues spanning dozens of universities, and to benefit from the creativity, scholarship, hard work, and reflection that led them to the models they describe"--Provided by publisher. **Women and Management: Global Issues and Promising Solutions** [2 volumes] Global Issues and Promising Solutions ABC-CLIO For every woman still bumping the glass ceiling and every man who cares, these volumes recount challenges female leaders face—and strategies that will smooth the path to managerial positions in corporate America and worldwide. • Prepares both women and men to meet the challenges of today's global workforce • Shares up-to-date research about women leaders worldwide, including strategies for success • Provides an overview of gendered organizations to help readers understand organizational dynamics that prevent women from reaching their leadership potential • Discusses generational differences in perceptions of women leaders and managers • Offers best practices to assist organizations **Global Perspectives on Issues and Solutions in Urban Education** IAP In 2014, The Urban Education Collaborative at the University of North Carolina at Charlotte hosted its first biennial International Conference on Urban Education (ICUE) in Montego Bay, Jamaica. In 2016, the second hosting of the conference took place in San Juan, Puerto Rico. Additionally, in 2018, the third hosting of the conference took place in Nassau, Bahamas. These solution-focused conferences brought together students, teachers, scholars, public sector and business professionals as well as others from around the world to present their research and best practices on various topics pertaining to urban education. With ICUE's inspiration, this book is a response to the growing need to highlight the multifaceted aspects of urban education particularly focusing on common issues and solutions in urban environments (e.g., family and community engagement, student academic achievement, teacher preparation and professional development, targeted instructional and disciplinary interventions, opportunity gaps, culturally-relevant and sustaining practices, etc.). Additionally, with this book, we seek to better understand the challenges facing urban educators and students and to offer progressive initiatives toward resolutions. This unique compilation of work is organized under four major themes all targeted at critically addressing concerns that may inhibit the success of urban learners and providing solutions that have implications for curriculum design, development, and delivery; teacher preparation and teaching diverse populations; career readiness and employment; and even more nuanced issues related to foster care, undocumented students and mental health, sustainable consumption, childhood marriage, food deserts, and marine life and urban communities. **Global Problems, Smart Solutions** Costs and Benefits Cambridge University Press Every four years since 2004, the Copenhagen Consensus Center has organized and hosted a high profile thought experiment about how a hypothetical extra \$75 billion of development assistance money might best be spent to solve twelve of the major crises facing the world today. Collated in this specially commissioned book, a group of more than 50 experts make their cases for investment, discussing how to combat problems ranging from armed conflicts, corruption and trade barriers, to natural disasters, hunger, education and climate change. For each case, 'Alternative Perspectives' are also included to provide a critique and make other suggestions for investment. In addition, a panel of senior economists, including four Nobel Laureates, rank the attractiveness of each policy proposal in terms of its anticipated cost-benefit ratio. This thought-provoking book opens up debate, encouraging readers to come up with their own rankings and decide which solutions are smarter than others. **Key Issues Confronting the Black Community in Denver, CO** A Community in Transition Cambridge Scholars Publishing This volume highlights five critical key issues relevant to Colorado's Black and Brown communities. As a result of the recent activity around policing and equity, marijuana, education and biases, prisoner reintegration, and activism, it offers solutions to managing those problems. The book is a resource that must be read by K-12 educators, social workers, probation officers, grass roots leaders, adult educators, and university professors in the area of sociology, education, Black studies, and the non-traditional disciplines. Additionally, the volume contains essential tools for training professionals and teaching our youth by offering insights to problem solve in urban areas. It provides pertinent information vital to the development and success of our youth struggling in K-12, higher education, and the criminal justice system. Although Colorado's Black communities are the focus of the volume, it will also serve as a model for urban communities in different states. **Proceedings of the Social Statistics Section Finding Solutions for a Post-Crisis Society** PUBLICACIONES UNIVERSITAT ROVIRA I VIRGILI Since 2007 and the economic meltdown caused by the financial crisis, our societies have been evolving in different ways. New political movements have emerged in Southern Europe and new social movements in pursuit of common concerns are playing a more active role in our daily lives. In a parallel way, after the failure to predict the financial crisis, economist and social science researchers seek fresh thinking and new models that can better explain this new reality. Regulations are of critical importance in shaping the welfare of economies and society. Thus, core legal disciplines are exploring the effects of the financial crisis on social rights, labour market regulations, and civil, common law or international law, among others. With no doubt, the economic crisis has deeply impacted our economic, social, political and legal environment. During the last decade, researchers from a wide range of disciplines have been looking for solutions. Now it is time make a side stop on the way and to gather results. The 1st International SBRLab Conference, Finding solutions for a post-crisis society, is organized by the Social and Business Research Lab (SBRLab), Universitat Rovira i Virgili. It is as an international and virtual meeting point of interdisciplinary research and researchers. The purpose of this international conference is to bring together researchers from management, economics, political, social and legal disciplines in order to present and discuss new trends in their respective fields. **Federal Solutions to Ethnic Problems** Accommodating Diversity Routledge Exploring five distinct models of federal arrangement, this book evaluates the relative merits of each model as a mechanism for managing relations in ethnically divided societies. Two broad approaches to this issue, accommodation and denial, are identified and, from this, five distinct models of federal arrangement are derived. The models; ethnic, anti-ethnic, territorial, ethno-territorial, and federacy, are defined and then located within their broader theoretical tradition. Detailed case studies are used to evaluate the strengths and weakness of each model and highlight patterns in the success and failure rates of the universe of post-1945 federal arrangements. From this it is clear that two forms of ethnically defined federal arrangement - federacy and ethno-territorial federalism, are associated with low failure rates, while ethnic federalism has enjoyed a far higher rate of failure. The reasons for this are examined and the implications of this for the design of federal systems in ethnically divided societies are assessed. **Federal Solutions to Ethnic Problems: Accommodating Diversity** advances a new argument within the field of comparative politics, that certain forms of federal arrangement are systematically more successful than others in ameliorating ethnically conflicted societies and is essential reading for students and scholars with an interest in politics and the Middle East. **Connecting Social Problems and Popular Culture** Why Media is Not the Answer Routledge Is violence on the streets caused by violence in video games? Does cyber-bullying lead to an increase in suicide rates? Are teens promiscuous because of Teen Mom? As Karen Sternheimer clearly demonstrates, popular culture is an easy scapegoat for many of society's problems, but it is almost always the wrong answer. Now in its second edition, **Connecting Social Problems and Popular Culture** goes beyond the news-grabbing headlines claiming that popular culture is public enemy number one to consider what really causes the social problems we are most concerned about. The sobering fact is that a "media made them do it" explanation fails to illuminate the roots of social problems like poverty, violence, and environmental degradation. Sternheimer's analysis deftly illustrates how welfare "reform," a two-tiered health care system, and other difficult systemic issues have far more to do with our contemporary social problems than Grand Theft Auto or Facebook. The fully-revised new edition features recent moral panics (think sexting and cyberbullying) and an entirely new chapter exploring social media. Expanded discussion of how we understand society's problems as social constructions without disregarding empirical evidence, as well as the cultural and structural issues underlying those ills, allows students to stretch their sociological imaginations. **Social Issues in Living Color: Challenges and Solutions from the Perspective of Ethnic Minority Psychology** [3 volumes] ABC-CLIO Offering fresh and exciting approaches to solving global problems, this book

creatively views challenging social issues through the lens of racial and ethnic psychology. • Utilizes concepts of racial and ethnic minority psychology to address important issues of the 21st century, offering unique insights into the nature of today's real-world problems • Presents racial and ethnic psychological perspectives on topics such as media, the criminal justice system, sexual orientation, poverty, climate change, and sustainability • Provides much-needed alternative perspectives on human behavior other than the theories, systems, and practices that are largely derived from Anglo-American research using white subjects

**Network Analysis and Ethnographic Problems Process Models of a Turkish Nomad Clan** Lexington Books Using network visualization and the study of the dynamics of marriage choices, *Network Analysis and Ethnographic Problems* expands the theory of social practice to show how changes in the structure of a society's kinship network affect the development of social cohesion over time. Using the genealogical networks of a Turkish nomad clan, authors Douglas White and Ulla Johansen explore how changes in network cohesion are revealed to be indicative of key processes of social change. This approach alters in fundamental ways the anthropological concepts of social structure, organizational dynamics, social cohesion, marriage strategies, as well as the study of community politics within the dynamics of ongoing personal interaction.

**Compendium of Knowledge Solutions ADB Knowledge Solutions Key Issues in Evolving Dementia Care International Theory-based Policy and Practice** Jessica Kingsley Publishers Focusing on theoretical, policy and practice issues which are predicted to become fundamental priorities in the near future, the contributors to this important book examine how dementia care works around the globe. They explore the theory underpinning dementia care, the applications of this theory in the latest dementia care research and how this research is influencing and shaping practice. The contributors are leading practitioners, policy influencers and researchers who analyse case studies from the UK, the USA, Canada, Australia, India, France and Malta with the aim of encouraging a dialogue and exchange of interdisciplinary initiatives and ideas. Their insights into how policy and dementia strategies are developed, and the range of approaches that can be taken in dementia care practice, are a positive step towards ensuring that the needs of people with dementia around the world are met, both now and in the future. This book makes essential reading for practitioners, researchers, policy makers and students in the field of dementia care.

**Key Indicators Key Concepts and Issues in Nursing Ethics** Springer Short case studies, based on real stories from the health care arena, ensure that each chapter of this book is rooted in descriptions of nursing practice that are grounded, salient narratives of nursing care. The reader is assisted to explore the ethical dimension of nursing practice: what it is and how it can be portrayed, discussed, and analysed within a variety of practice and theoretical contexts. One of the unique contributions of this book is to consider nursing not only in the context of the individual nurse - patient relationship but also as a social good that is of necessity limited, due to the ultimate limits on the nursing and health care resource. This book will help the reader consider what good nursing looks like, both within the context of limitations on resources and under conditions of scarcity. Indeed, any discussion of ethical issues in nursing should be well grounded in a conceptualisation of nursing that nursing students and practising nursing can recognise, accept and engage with. Nursing, like medicine, social work and teaching has a clear moral aim - to do good. In the case of nursing to do good for the patient. However it is vital that in the pressurised, constrained health service of the 21st century, we help nurses explore what this might mean for nursing practice and what can reasonably be expected of the individual nurse in terms of good nursing care.

**Key Indicators of Developing Asian and Pacific Countries** Panic The Social Construction of the Street Gang Problem Pearson College Division "Panic: The Social Construction of the Street Gang Problem" deals with the "discovery" of the street gang problem in the United States during the 1980s. In these pages, authors Richard McCorkle and Terance Miethe argue that gangs are a major social threat not only because of the increased concrete threat, but because of their impact on the world around us. The result has been increased crime, a proliferation of inefficient anti-gang policies, and the squandering of millions of taxpayer dollars. "Panic: The Social Construction of the Street Gang Problem" focuses on the events, organizations, and processes that surrounded the gang panic during the late 1980s and early 1990s, a period during which gangs expanded greatly in American cities. This book provides critical insights into the discovery of the gang problem throughout the country and will encourage others to re-examine the nature of the gang threat in any jurisdiction. " 1980-1908, بيليوغرافيا الوحدة العربية, pt. 2. Titles, English & French Anthropology and Contemporary Human Problems Rowman Altamira Bodley trenchantly critiques the most pressing global mega-problems, such as unsustainable growth, resource depletion, global warming, and poverty and conflict, and shows how anthropology makes it possible to find solutions. Key Themes in European Social Work Theory, Practice, Perspectives Russell House Pub Limited What can we learn about social work - and what is its importance - when viewed from a pan-European perspective? Authors from eight European countries look at their own experiences and set them in the context of what they have learned from making comparisons. The Welfare State in Post-Industrial Society A Global Perspective Springer Science & Business Media In recent years, major social forces such as: ageing populations, social trends, migration patterns, and the globalization of economies, have reshaped social welfare policies and practices across the globe. Multinational corporations, NGOs, and other international organizations have begun to influence social policy at a national and local level. Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation-states to effect policies that are beneficial to them on a local level. With contributions from thirteen countries worldwide, this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state. The Welfare State in Post-Industrial Society is divided into two major sections: the first draws from a number of leading social welfare researchers from diverse countries who point to the nation-state as case studies; highlighting how it goes about establishing and revising social welfare provisions. The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship, ageing and marketization. The Welfare State in Post-Industrial Society seeks to encourage debate about the implications of the most pressing social welfare issues in nation-states, and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations.

**Labour Rights and the Catholic Church** The International Labour Organisation, the Holy See and Catholic Social Teaching Routledge This book explores the extent of parallelism and cross-influence between Catholic Social Teaching and the work of the world's oldest human rights institution, the International Labour Organisation (ILO). Sometimes there is a mutual attraction between seeming opposites who in fact share a common goal. This book is about just such an attraction between a secular organisation born of the political desire for peace and justice, and a metaphysical institution much older founded to bring peace and justice on earth. It examines the principles evident in the teachings of the Catholic Church and in the secular philosophy of the ILO; together with the theological basis of the relevant provisions of Catholic Social Teaching and of the socio-political origins and basis of the ILO. The spectrum of labour rights covered in the book extends from the right to press for rights, i.e., collective bargaining, to rights themselves - conditions in work - and on to post-employment rights in the form of social security and pensions. The extent of the parallelism and cross-influence is reviewed from the issue of the Papal Encyclical of Pope Leo XIII *Rerum Novarum* (1891) and from the founding of the ILO in 1919. This book is intended to appeal to lay, professional and academic alike, and will be of interest to researchers and academics working in the areas of international human rights, theology, comparative philosophy, history and social and political studies. On 4 January 2021 it was granted an Imprimatur by the Roman Catholic Archbishop of Liverpool, Malcolm P. McMahon O.P., meaning that the Catholic Church is satisfied that the book is free of doctrinal or moral error.

**Global Environment Outlook 3 Past, Present and Future Perspectives** Earthscan Integrating environment and development: 1972-2002; State of the environment and policy retrospective: 1972-2002; Human vulnerability to environmental change; Outlook: 2002-32; Options for action. Transdisciplinary Solutions for Sustainable Development From planetary management to stewardship Routledge Global environmental issues such as climate change and species loss are intensifying despite our best efforts to combat them. The key reason for this is that the drivers of these problems are closely linked to the industrialism and consumerism that are promoted by governments and other organizations the world over. This innovative book identifies the key issues that block progress in sustainable development and proposes transdisciplinary solutions. Presenting a review of the epistemology and ethics of this policy field including current policy responses, it examines the ethical and policy implications from a multidisciplinary perspective. The book explains the current limitations of scientific prediction for global environmental issues and develops innovative approaches to respond to these difficulties, drawing out lessons that will make sustainable development policy more democratic, plural and open. This book will be of great interest to students and researchers in environmental policy, development studies, politics, economics and sustainable development.

**Encyclopedia of Homelessness** SAGE "The first comprehensive resource on this important topic, this set covers the origins of homelessness, current research, and strategies for its prevention. The contributors represent such disciplines as sociology, anthropology, medicine, and social work. Articles address homelessness in eight major American cities and more than 30 cities and nations around the world. Adding depth are bibliographies, a directory of street newspapers, a filmography, and more than 20 primary-source documents offering historical and contemporary perspectives."--"Reference that rocks," *American Libraries*, May 2005.

**Critical Issues in Healthcare Policy and Politics in the Gulf Cooperation Council States** Georgetown University Press This is the first book to examine challenges in the healthcare sector in the six Gulf Cooperation Council (GCC) countries (Saudi Arabia, Oman, the United Arab Emirates, Qatar, Kuwait, and Bahrain). These countries experienced remarkably swift transformations from small fishing and pearling communities at the beginning of the twentieth century to wealthy petro-states today. Their healthcare systems, however, are only now beginning to catch up. Rapid changes to the population and lifestyles of the GCC states have completely changed—and challenged—the region's health profile and infrastructure. While major successes in combatting infectious diseases and improving standards of primary healthcare are reflected in key health indicators, new trends have developed; increasingly "lifestyle" or "wealthy country" diseases, such as diabetes, heart disease, and cancer, have replaced the old maladies. To meet these emerging healthcare needs, GCC states require highly trained and skilled healthcare workers, an environment that supports local training, state-of-the-art diagnostic laboratories and hospitals, research production and dissemination, and knowledge acquisition. They face shortages in most if not all of these areas. This book provides a comprehensive study of the rapidly changing health profile of the region, the existing conditions of healthcare systems, and the challenges posed to healthcare management across the six states of the GCC.

**European Employment Policies: Key Concepts, Domestic Implementation, Current Challenges** BWV Verlag The Future of Productivity OECD Publishing This book addresses the rising productivity gap between the global frontier and other firms, and identifies a number of structural impediments constraining business start-ups, knowledge diffusion and resource allocation (such as barriers to up-scaling and relatively high rates of skill mismatch).

**Biomedical Engineering for Global Health** Cambridge University Press Can technology and innovation transform world health? Connecting undergraduate students with global problems, Rebecca Richards-Kortum examines the interplay between biomedical technology design and the medical, regulatory, economic, social and ethical issues surrounding global health. Driven by case studies, including cancer screening, imaging technologies, implantable devices and vaccines, students learn how the complexities and variation across the globe affect the design of devices and therapies. A wealth of learning features, including classroom activities, project assignments, homework problems and weblinks within the book and online, provide a full teaching package. For visionary general science and biomedical engineering courses, this book will inspire students to engage in solving global issues that face us all.

**Solutions for Sustainability** How the International Trade, Energy and Climate Change Regimes Can Help Springer Nature This book explores links and synergies between international trade and two of the most urgent challenges of the 21st century: achieving sustainable energy (i.e., energy that is affordable, secure, and clean) and mitigating climate change. It takes the unique approach of not only examining how international trade can help achieve energy and climate goals, but also the impact of emerging tools and technologies such as smart grids and demand response, and the potential role and impact of citizens and prosumers. The book analyzes energy- and trade-related regulations in a range of jurisdictions to assess how conducive the regulation is towards achieving sustainable energy, and identifies gaps and overlaps in the existing legal framework.

**Agency, Structure and the NEET Policy Problem** The Experiences of Young People Bloomsbury Publishing For many years, government policy has associated young people 'being NEET' (Not in Education, Employment

or Training) with educational underachievement, worklessness, generational poverty, poor health, antisocial behaviour, and reduced life expectancies. Researchers and policymakers continue to debate whether young people become NEET as a result of their own choices (i.e. their personal agency), or as a result of external factors (i.e. social, political and economic structures). Most recognise that the truth is somewhere between the two, but a clear understanding of how each interacts in causing young people to become NEET has so far been elusive, making the development of effective policy and practice problematic. *Agency, Structure and the NEET Policy Problem* makes headway against this problem through an original approach that draws on social cognitive theory and the lived experiences of young people themselves. Investigating the lives of NEET young people between the ages of 17-21 in London, this book elucidates the interactions between agency and structure that lead to them becoming NEET, and in doing so, offers a new perspective on the phenomenon. It offers a valuable critique of existing policy, providing both breadth and detail on the factors affecting the trajectories of young people in their transitions to continued education, training, or employment. It offers a way forward for all who are interested in developing, supporting and implementing a revitalised approach to NEET policy and practice, and a framework around which a coherent multidisciplinary approach to addressing NEET could be developed. *Problem-solving Therapy A Social Competence Approach to Clinical Intervention* Springer Publishing Company An introduction and guide for therapists and counselors in the mental health professions to the approach as a reliable clinical treatment, health maintenance strategy, and prevention program. Includes a treating manual for increasing adaptive coping and behavioral competence and reducing daily stress. D'Zurilla (psychology, U. of Illinois-Urbana-Champaign) and Nezu (psychology, State U. of New York- Stony Brook) do not mention the date of the first edition, but have revised the second with new theoretical and empirical material, including studies of outcomes for a variety of target populations. Annotation copyrighted by Book News, Inc., Portland, OR *Current Issues in Hospitality and Tourism Research and Innovations* CRC Press Globally the hospitality and tourism industry is evolving and undergoing radical changes. The past practices are now advancing through the rapid development of knowledge and skills acquired to adapt and create innovations in various ways. Hence, it is imperative that we have an understanding of the present issues so that we are able to remedy probl *Social Problems* With historical and multicultural sensitivity, this best-selling book probes the nature and causes of the major social changes confronting today's citizens. Using the latest research, current statistics, examples, charts, and tables, it delves into the social control and action issues inherent to each problem in a clear, easy-to-read format. Balancing viewpoints and supporting material with research and policy, the book covers topics in a micro-to-macro format, pointing out the interrelationships among today's social problems and approaching them from several perspectives. The first few chapters focus on individual behaviors such as drug use and crime. The middle chapters deal with inequality and discrimination, discussing such topics as poverty, prejudice, sexism, ageism, family life, and work. The final chapters discuss the problems of cities, environmental pollution, and war and terrorism: matters of global significance. Because the nature of the United States is changing, with health and health care crises, military invasions, economic downturn, shrinking public budgets and rising fiscal deficits, and environmental issues, this book becomes a necessary read for members of the medical profession that confront the tragedy of AIDS, law enforcement professionals who cope with crime and violence, elected officials and other political leaders who are expected to formulate sound social policies to address social problems, and citizens who wish to learn more about the social problems that are pervasive in our lives. *Female Genital Cosmetic Surgery Solution to What Problem?* Cambridge University Press A cross-disciplinary take on the rising phenomenon of female genital cosmetic surgery, from world-leading experts, in a single volume.
