Canara Bank PO Guide 2021: Attempt 200 Questions in PDF for Free!

Canara Bank PO Guide 2021 Out Now - The Best Guide for a Canara Bank Probationary Officer!

Testbook.com This comprehensive Canara Bank PO Guide 2021 is a carrier of 200 solved examples to make you practice full mock test. Guided to cover official concepts based on Reasoning, Quant, English & GA to make your best attempt in Canara Bank PO 2021 exam.

The Official Raspberry Pi Camera Guide

For Camera Module & High Quality Camera

Educational Response, Inclusion and Empowerment for SDGs in Emerging Economies

How do education systems contribute to raising global citizens?

Springer Nature This volume analyzes cases from emerging economies in relation to the global endeavor to promote the vision of sustainable development in all forms of education. It aims to discuss the significance of hearing local voices and understanding local discourse regarding strategies for action for change, and the role of educational systems as a means to communicate, promote and educate for the Sustainable Development Goals (SDGs). In this book, emerging economies are defined as newly industrialized countries that have not yet reached developed status, but have, in a macro-economic sense, outpaced their developing counterparts. In this context, the book highlights how education in emerging economies could extend conventional economic methods to sustainability issues, or depart from money-based calculations and business-dominated values to promotion of real-life considerations and ethical, environmental and humanistic values. With the help of this volume, readers will have a chance to look at educational response, inclusion and empowerment for SDGs in countries with emerging economies, and to grasp the synthesis of Education for Sustainable Development/Global Citizenship Education (ESD/GCE) within the overall national educational systems. This volume focuses on early childhood through upper secondary education.

Multigenerational Online Behavior and Media Use: Concepts, Methodologies, Tools, and Applications

Concepts, Methodologies, Tools, and Applications

IGI Global The rapid evolution of technology continuously changes the way people interact, work, and learn. By examining these advances from a sociological perspective, researchers can further understand the impact of cyberspace on human behavior, interaction, and cognition. Multigenerational Online Behavior and Media Use: Concepts, Methodologies, Tools, and Applications is a vital reference source covering the impact of social networking platforms on a variety of relationships, including those between individuals, governments, citizens, businesses, and consumers. The publication also highlights the negative behavioral, physical, and mental effects of increased online usage and screen time such as mental health issues, internet addiction, and body image. Showcasing a range of topics including online dating, smartphone dependency, and cyberbullying, this multi-volume book is ideally designed for sociologists, psychologists, computer scientists, engineers, communication specialists, academicians, researchers, and graduate-level students seeking current research on media usage and its behavioral effects.

Enhancing the Contribution of Sport to the Sustainable Development Goals

Commonwealth Secretariat Enhancing the Contribution of Sport to the Sustainable Development Goals builds on the work of previous Commonwealth publications analysing the role of sport in achieving sustainable development. Aimed at governmental policy-makers and other stakeholders, it provides evidenced and balanced policy options supporting the effective contribution of sport towards six prioritised Sustainable Development Goals (SDGs).

Environmental Sensing and Monitoring Using Digital Camera (Penerbit USM)

Penerbit USM This monograph is the outcome of 15 years experience of working with satellite images with the funding from IRPA RM7, ESCAP NASDA, Science Fund and several short term grants. It introduces a new methodology and algorithms for water and air quality monitoring by using conventional digital camera as a sensor to provide multi-spectral remote sensing data. The image is either captured by a digital camera mounted in an unman aircraft vehicle (UAV) or directly captured from a light air-craft. New algorithms were developed to correlate the pollutant concentration with the digital images. The algorithms can also generate a map of the pollutant concentration of the studied area. Pollutant information is very important for survey information, tourism information, development assessment, coastal preservation and area development planning. This new methodology allows images to be captured below the cloud level. Thus, with this method and the algorithms, cloud cover problem of satellite and airborne images can be overcome. They also overcome the problems of time, money, and resources wasted in collecting in-situ data for algorithm calibration of cloud cover satellite images. Furthermore, they provide real-time, high accuracy information. Universiti Sains Malaysia, Penerbit Universiti Sains Malaysia

Frontiers in Drug Design and Discovery

Bentham Science Publishers "Frontiers in Drug Design and Discovery" is an Ebook series devoted to publishing the latest and the most important advances in drug design and discovery. Eminent scientists write contributions on all areas of rational drug design and drug discovery inclu

Leadership Landscapes

Mapping cross-cultural differences in global leadership

CCBS Press 'Leadership Landscapes' provides an invaluable reference point for senior executives or those striving towards a successful cross-border career, to understand how cultural differences impact upon leadership styles and practices. Each semester, we publish a report on our quantitative survey-based global study, alongside our review of extant in-country leadership literature, preferably written by local scholars and professionals in their native language. Moreover, we attempt to empirically validate these findings by conducting expert interviews with native specialists. This new issue of our ongoing leadership series presents country-specific analyses of culturally endorsed leadership practices and styles in the following countries or territories: Channel Islands, Cuba, Ecuador, Egypt, Eritrea, Indonesia, Iran, Ireland, Nepal, Slovakia, Solomon Islands, Ukraine, Uruguay and Venezuela. This publication contains contributions from around 111 researchers from 26 countries who participated in the Cross-Cultural Business Skills elective offered by the Part-time Academy of the Faculty of Business and Economics at the Amsterdam University of Applied Sciences (HvA). Final Editors: Sander Schroevers and Christopher Higgings, Bibliographic editor Isabella Swart. The following authors contributed: Abigail Boadu, Abubakar Ahmadzai, Adam Omar, Raja Aleksander van der Heijden, Александър Миленков (Aleksandar Milenkov), Andres Figueira, Antero Do Valle, Bo Jongejan, Boy Dekker, Carezza Kral, Casper Smit, Chynna Zeegelaar, Daan Smit, Dalia Ben Masoud, Dani Ruiz De Alegria Ezcurra, Daniël van de Merwe, Daniela Lozano Traviesa, Danielle de Vries, David Makkinje, Dennis Mackaaij, Derav Berwari, Dion van Dieren, Duncan Egberts, Emilia Gabrielsen, Eva Sadler, Fawad Jafari, Ferry Bakker, Fiete Kaupp, Frans Westerman, Gail van Loveren, Giovanni Bekker, Hamlin El Azab Ali, Hannah Connell, Ilana Holthoer, James Hall, Jawwad Saleem, Jaz Wanamaker, Jirmeja Yspol, Joachim de Vos, João Filipe Salvador Cabrita, Karim Erakrak, Kenan Doğan, Kevin Koolman, Kuba Kacperski, Lars Groot, Laurens Mutsaers, Lianne Bakker, Lita van Loo, Lizan Lemmen, Luginó Samseer, Lyon Goes, Любен Шкалов (Lyuben Shkalov), Maarten Schooneman, Mara Elicegui Ortiz De Urbina, Marc Orlandini, María Álvarez Aguirre, Maria Canal Clavell, Maria Paradell Barrera, Marie-Louise Ammann, Matt Bouman, Mejrem Beka, Melanie Flohil, Melody Kroneraff, Menno Fouchier, Merve Akyüz, Michael Sheikrojan, Michel Pan, Michiel Adamse, Mickey Nieraeth, Miguel Fajardo Presencio, Milou Ruizendaal, Miriam Vadillo Garcia, Misha Schachtschabel, Morteza Mohamadi, Naserdinne El Bouhdifi, Nikki van Amerom, Noelia Martínez Guinea, Parteek Chhibber, Phuong Hằng Lê, Pieter van Iperen, Ralph Heuff, Robbert van Veen, Salle

Cyber Security

Critical Infrastructure Protection

Springer Nature This book focus on critical infrastructure protection. The chapters present detailed analysis of the issues and challenges in cyberspace and provide novel solutions in various aspects. The first part of the book focus on digital society, addressing critical infrastructure and different forms of the digitalization, strategic focus on cyber security, legal aspects on cyber security, citizen in digital society, and cyber security training. The second part focus on the critical infrastructure protection in different areas of the critical infrastructure. The chapters cover the cybersecurity situation awareness, aviation and air traffic control, cyber security in smart societies and cities, cyber security in smart buildings, maritime cyber security, cyber security in energy systems, and cyber security in healthcare. The third part presents the impact of new technologies upon cyber capability building as well as new challenges brought about by new technologies. These new technologies are among others are quantum technology, firmware and wireless technologies, malware analysis, virtualization.

Guide for the Care and Use of Laboratory Animals

Eighth Edition

National Academies Press A respected resource for decades, the Guide for the Care and Use of Laboratory Animals has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. The Guide incorporates new scientific information on common laboratory animals, including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal care and use. The Guide sets the framework for the humane care and use of laboratory animals. Animal care and use program. The Guide discusses the concept of a broad Program of Animal Care and Use, including roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care. The Guide discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The Guide addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The Guide identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The Guide for the Care and Use of Laboratory Animals provides a framework for the judgments required in the management of animal facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates.

Raspberry Pi User Guide

John Wiley & Sons Learn the Raspberry Pi 3 from the experts! Raspberry Pi User Guide, 4th Edition is the "unofficial official" guide to everything Raspberry Pi 3. Written by the Pi's creator and a leading Pi guru, this book goes straight to the source to bring you the ultimate Raspberry Pi 3 manual. This new fourth edition has been updated to cover the Raspberry Pi 3 board and software, with detailed discussion on its wide array of configurations, languages, and applications. You'll learn how to take full advantage of the mighty Pi's full capabilities, and then expand those capabilities even more with add-on technologies. You'll write productivity and multimedia programs, and learn flexible programming languages that allow you to shape your Raspberry Pi into whatever you want it to be. If you're ready to jump right in, this book gets you started with clear, step-by-step instruction from software installation to system customization. The Raspberry Pi's tremendous popularity has spawned an entire industry of add-ons, parts, hacks, ideas, and inventions. The movement is growing, and pushing the boundaries of possibility along with it—are you ready to be a part of it? This book is your ideal companion for claiming your piece of the Pi. Get all set up with software, and connect to other devices Understand Linux System Admin nomenclature and conventions Write your own programs using Python and Scratch Extend the Pi's capabilities with add-ons like Wi-Fi dongles, a touch screen, and more The credit-card sized Raspberry Pi has become a global phenomenon. Created by the Raspberry Pi Foundation to get kids interested in programming, this tiny computer kick-started a movement of tinkerers, thinkers, experimenters, and inventors. Where will your Raspberry Pi 3 take you? The Raspberry Pi User Guide, 3rd Edition is your ultimate roadmap to discovery.

Your Guide to Lowering Your Blood Pressure with Dash

Dash Eating Plan

Createspace Independent Publishing Platform This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption—2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005 "U.S. Dietary Guidelines for Americans." The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat—about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.

An Introduction to the Use of Portable Vehicular Signals

Process Systems and Materials for CO2 Capture

Modelling, Design, Control and Integration

John Wiley & Sons Computer-aided approaches enable the fast, automated and accurate evaluation of a vast number of process and material characteristics that lead to economically efficient and sustainable CO2 capture systems. In this context, they offer a promising route to exploit experimental know-how and guide the search for novel and efficient CO2 capture processes and materials. This comprehensive volume brings together an extensive collection of systematic computer-aided tools and methods developed in recent years for CO2 capture applications, and presents a structured and organized account of works from internationally acknowledged scientists and engineers, through: modelling of materials and processes based on chemical and physical principles design of materials and processes based on systematic optimization methods utilization of advanced control and integration methods in process and plant-wide operations. The tools and methods described are illustrated through case studies on materials such as solvents, adsorbents and membranes, and on processes such as absorption/desorption, pressure and vacuum swing adsorption, membranes, oxycombustion, solid looping, etc. Process Systems and Materials for CO2 Capture: Modelling, Design, Control and Integration should become the essential introductory resource for researchers and industrial practitioners in the field of CO2 capture technology who wish to explore developments in computer-aided tools and methods. In addition, it aims to introduce CO2 capture technologies to process systems engineers working in the development of general computational tools and methods by highlighting opportunities for new developments to address the needs and challenges in CO2 capture technologies.

Marketing and Consumer Behavior: Concepts, Methodologies, Tools, and Applications

Concepts, Methodologies, Tools, and Applications

IGI Global As marketing professionals look for ever more effective ways to promote their goods and services to customers, a thorough understanding of customer needs and the ability to predict a target audience's reaction to advertising campaigns is essential. Marketing and Consumer Behavior: Concepts, Methodologies, Tools, and Applications explores cutting-edge advancements in marketing strategies as well as the development and design considerations integral to the successful analysis of consumer trends. Including both in-depth case studies and theoretical discussions, this comprehensive four-volume reference is a necessary resource for business leaders and marketing managers, students and educators, and advertisers looking to expand the reach of their target market.

Digital Signal Processing and Spectral Analysis for Scientists Concepts and Applications

Springer This book covers the basics of processing and spectral analysis of monovariate discrete-time signals. The approach is practical, the aim being to acquaint the reader with the indications for and drawbacks of the various methods and to highlight possible misuses. The book is rich in original ideas, visualized in new and illuminating ways, and is structured so that parts can be skipped without loss of continuity. Many examples are included, based on synthetic data and real measurements from the fields of physics, biology, medicine, macroeconomics etc., and a complete set of MATLAB exercises requiring no previous experience of programming is provided. Prior advanced mathematical skills are not needed in order to understand the contents: a good command of basic mathematical analysis is sufficient. Where more advanced mathematical tools are necessary, they are included in an Appendix and presented in an easy-to-follow way. With this book, digital signal processing leaves the domain of engineering to address the needs of scientists and scholars in traditionally less quantitative disciplines, now facing increasing amounts of data.

Analysis of Chemical Warfare Degradation Products

John Wiley & Sons This book describes nerve agents and vesicants, their decomposition and their degradation products' chemistry as well as their toxicity including a list of detection techniques of nerve agents and their degradation products. This book will present their history, toxicity, comparison between different sample preparation methods, separation techniques, and detection methods all together in a short, easy to read book, tied together by a single group doing the writing and the editing to assure smooth transition from chapter to chapter, with sufficient Tables and literature references for the reader who looks to further detail. The text will illustrate the pluses and minuses of the various techniques with sufficient references for the reader to obtain extensive detail.

Interpretable Machine Learning

Lulu.com This book is about making machine learning models and their decisions interpretable. After exploring the concepts of interpretability, you will learn about simple, interpretable models such as decision trees, decision rules and linear regression. Later chapters focus on general model-agnostic methods for interpreting black box models like feature importance and accumulated local effects and explaining individual predictions with Shapley values and LIME. All interpretation methods are explained in depth and discussed critically. How do they work under the hood? What are their strengths and weaknesses? How can their outputs be interpreted? This book will enable you to select and correctly apply the interpretation method that is most suitable for your machine learning project.

Mobile and Wireless Systems Beyond 3G

Managing New Business Opportunities

IGI Global Mobile and Wireless Systems Beyond 3G: Managing New Business Opportunities explores new business opportunities and critical issue related to mobile and wireless systems beyond 3G. This book identifies motivations and barriers to the adoption of 3G mobile multimedia services and provides an end-user perspective on mobile multimedia services that are likely to emerge with the roll out of Third Generation Mobile Services (3G). Mobile and Wireless Systems beyond 3G: Managing New Business Opportunities presents a single source of up-to-date information about mobile commerce including the technology (hardware and software) involved, security issues and factors driving demand adoption (consumer and business). This book provides researchers and practitioners with a source of knowledge related to this emerging area of business, while also facilitating managers and business leaders' understanding of the industrial evolutionary processes.

Information Plus

Sports in America: Recreation, Business, Education and Controversy

Information Plus "The Information Plus Reference Series" provides statistical data on 32 of today's most controversial and most studied social issues. Each Information Plus title is a compilation of current and historical statistics -- with analysis -- on aspects of one contemporary social issue, such as abortion, capital punishment, and genetic engineering. Each title is divided into chapters that are devoted to a particular topic. The text provides a clear and comprehensive summary of up-to-date research on the topic and is interspersed with the statistical tables, charts, and graphs. Each table is directly referred to and carefully explained in the text.

Economic Survival Strategies of Turkish Migrants in London

Lulu.com

Practicing Archaeology

A Manual For Cultural Resources Archaeology

Rowman & Littlefield Here's the perfect one-stop for courses in field archaeology and archaeologists just beginning their initial field work. Current, up-to-date and comprehensive, this is how "it's really done" in the field.

The Ultimate Guide to Raising Teens and Tweens

Strategies for Unlocking Your Child's Full Potential

Rowman & Littlefield Are you concerned or frustrated with the choices your child makes when it comes to their peer groups, study habits, and use of social media? Do you feel your child is pushing you away and your connection is weakening? Are you unsure of the next steps you should take to help your child succeed? A whole new set of parenting concerns arise during tween and teenhood that can be overwhelming for any parent. The Ultimate Guide to Raising Teens and Tweens offers a step-by-step plan for raising your adolescent through this tumultuous time. Douglas Haddad provides specific, proven tools for you to help your child become a problem solver and grow to be smart, successful, and self-disciplined. In The Ultimate Guide to Raising Teens and Tweens, you will: Discover the secrets of effective communication with your child Learn the techniques to stop behavior problems right in their tracks when they happen Know the strategies to best motivate your child and unlock their potential Find out how to set appropriate limits and hold your child accountable for their actions Understand today's "child-limiting challenges" and the solutions for handling them with your child Every parent wants the best for their child, and these years can be fraught with challenges: bullying, violence, gambling, sex, smoking, alcohol, substance use, eating disorders, depression, suicide, unhealthy eating, lack of physical activity, etc. Making sense of these challenges, this book offers exercises for incorporating the ten child unlimited tools into your parenting style and anecdotes to illustrate strategies and techniques. Supported by current research, the tools found in these pages will serve as a guide for any family with tweens or teens.

Transactions on Computational Science X

Special Issue on Security in Computing

Springer Science & Business Media The LNCS journal Transactions on Computational Science reflects recent developments in the field of Computational Science, conceiving the field not as a mere ancillary science but rather as an innovative approach supporting many other scientific disciplines. The journal focuses on original high-quality research in the realm of computational science in parallel and distributed environments, encompassing the facilitating theoretical foundations and the applications of large-scale computations and massive data processing. It addresses researchers and practitioners in areas ranging from aerospace to biochemistry, from electronics to geosciences, from mathematics to software architecture, presenting verifiable computational methods, findings and solutions and enabling industrial users to apply techniques of leading-edge, large-scale, high performance computational methods. This inaugural volume is devoted to computer systems research with an emphasis on core computational science issues faced by researchers and industries today, and focusing on the development of novel computational techniques that are versatile and verifiable in a wide range of applications. The volume is divided into two parts. The five papers in Part 1 focus on the theme of information system design, and the four papers in Part 2 are concerned with specific computational science problems in the area of data processing. Book jacket.

Police Power and the Video Revolution

Proof, Policing, Privacy, and Audiovisual Big Data

Cambridge University Press This is the first book on the policy questions raised by two revolutions in recording the police - copwatching and police-worn body cameras. This accessible book with compelling stories and coverage of the most important debates over proof, privacy and police regulation will appeal broadly to students, laypersons, practitioners, and experts.

100 technical questions and answers for job interview Offshore Oil & Gas Rigs

Petrogav International The job interview is probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 100 questions and answers for job interview and as a BONUS web addresses to 230 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

Technical questions and answers for job interview Offshore Drilling Platforms

Petrogav International This book offers you a brief, but very involved look into the operations in the drilling of an oil & gas wells that will help you to be prepared for job interview at oil & gas companies. From start to finish, you'll see a general prognosis of the drilling process. If you are new to the oil & gas industry, you'll enjoy having a leg up with the knowledge of these processes. If you are a seasoned oil & gas person, you'll enjoy reading what you may or may not know in these pages. This course provides a non-technical overview of the phases, operations and terminology used on offshore drilling platforms. It is intended also for non-drilling personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations.

Questions and answers for job interview Offshore Oil & Gas Rigs

Petrogav International The job interview is probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 288 questions and answers for job interview and as a BONUS web addresses to 289 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

This eBook contains 150 questions and answers for job interview and as a BONUS web addresses to 220 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

Network and Parallel Computing

17th IFIP WG 10.3 International Conference, NPC 2020, Zhengzhou, China, September 28–30, 2020, Revised Selected Papers

Springer Nature This book constitutes the proceedings of the 17th IFIP WG 10.3 International Conference on Network and Parallel Computing, NPC 2020, held in Zhengzhou, China, in September 2020. The 34 full and 7 short papers presented in this volume were carefully reviewed and selected from 95 submissions. They were organized in topical sections named: accelerator; AI; algorithm; architecture and hardware; big data and cloud; edge computing; emerging; network; and storage.

Plant Identification

Creating User-friendly Field Guides for Biodiversity Management

Routledge First Published in 2006. Routledge is an imprint of Taylor & Francis, an informa company.

Plant Identification

Creating User-Friendly Field Guides for Biodiversity Management

Routledge An important prerequisite for successful conservation is a good understanding of what we seek to conserve. Nowhere is this more the case than in the fight to protect plant biodiversity, which is threatened by human activity in many regions worldwide. This book is written in the belief that tools that enable more people to understand biodiversity can not only aid protection efforts but also contribute to rural livelihoods. Among the most important of those tools is the field guide. Plant Identification provides potential authors of field guides with practical advice about all aspects of producing user-friendly guides which help to identify plants for the purposes of conservation, sustainable use, participatory monitoring or greater appreciation of biodiversity. The book draws on both scientific and participatory processes, supported by the experience of contributors from across the tropics. It presents a core process for producing a field guide, setting out key steps, options and techniques available to the authors of a guide and, through illustration, helps authors choose methods and media appropriate to their context.

Introduction to Information Retrieval

Cambridge University Press Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Strengthening Forensic Science in the United States

A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Conservation Technology

Oxford University Press The first comprehensive text to describe the breadth of available technology for conservation and to evaluate its varied applications, bringing together a team of international experts using a diverse range of approaches.

Young People and Alcohol

Impact, Policy, Prevention, Treatment

John Wiley & Sons Young People and Alcohol is a practical and comprehensive reference for professionals and researchers in the field of alcohol misuse who work with people aged 12 to 25 years. The book provides readers from a range of professional backgrounds with authoritative and up to date information about the effects of alcohol use in the young and, particularly, its management, with an emphasis on interventions whose effectiveness is supported by evidence. Written by an internationally renowned team of contributors, chapters span five key sections: The Phenomenon and Impact of Youth Drinking; Neurobiology; Prevention and Early Intervention; Assessment and Diagnosis; and Treatment. FEATURES Focus is on treatment, relating the science to everyday clinical practice. Evidence-based List of further resources Tables and flowcharts Glossary of key terms and abbreviations

Optimal Control in Thermal Engineering

Springer This book is the first major work covering applications in thermal engineering and offering a comprehensive introduction to optimal control theory, which has applications in mechanical engineering, particularly aircraft and missile trajectory optimization. The book is organized in three parts: The first part includes a brief presentation of function optimization and variational calculus, while the second part presents a summary of the optimal control theory. Lastly, the third part describes several applications of optimal control theory in solving various thermal engineering problems. These applications are grouped in four sections: heat transfer and thermal energy storage, solar thermal engineering, heat engines and lubrication. Clearly presented and easy-to-use, it is a valuable resource for thermal engineers and thermal-system designers as well as postgraduate students.
