Community-Based Participatory Research Testimonios from Chicana/o Studies *University of Arizona Press* Members of communities of color in the United States often struggle for equity, autonomy, survival, and justice. Community-Based Participatory Research is an edited volume from activist-scholars who present personal testimonies showcasing how community-based participatory research (CBPR) can lead to sustainable change and empowerment. Editor Natalia Deeb-Sossa has chosen contributors whose diverse interdisciplinary projects are grounded in politically engaged research in Chicana and Latinx communities. The scholars' advocacy work is a core component of the research design of their studies, challenging the idea that research needs to be neutral or unbiased. The testimonies tell of projects that stem from community demands for truly collaborative research addressing locally identified issues and promoting community social change. Contributors share their personal experiences in conducting CBPR, focusing on the complexities of implementing this method and how it may create sustainable change and community empowerment. Along with a retrospective analysis of how CBPR has been at the center of the Chicana/o Movement and Chicana/o studies, the book includes a discussion of consejos y advertencias (advice and warnings). The most knowledgeable people on community issues are the very members of the communities themselves. Recognizing a need to identify the experiences and voices (testimonios) of communities of color, activist-scholars showcase how to incorporate the perspectives of the true experts: the poor, women, farmworkers, students, activists, elders, and immigrants. **Campaigning for Children Strategies for Advancing Children's Rights** *Stanford University Press* Advocates within the growing field of children's rights have designed dynamic campaigns to protect and promote children's rights. This expanding body of international law and jurisprudence, however, lacks a core text that provides an up-to-date look at current children's rights issues, the evolution of children's rights law, and the efficacy of efforts to protect children. Campaigning for Children focuses on contemporary children's rights, identifying the range of abuses that affect children today, including early

marriage, female genital mutilation, child labor, child sex tourism, corporal punishment, the impact of armed conflict, and access to education. Jo Becker traces the last 25 years of the children's rights movement, including the evolution of international laws and standards to protect children from abuse and exploitation. From a practitioner's perspective, Becker provides readers with careful case studies of the organizations and campaigns that are making a difference in the lives of children, and the relevant strategies that have been successful—or not. By presenting a variety of approaches to deal with each issue, this book carefully teases out broader lessons for effective social change in the field of children's rights. **Bryman's Social Research Methods** Oxford University Press Clear, comprehensive, and trusted, Bryman's Social Research Methods has guided over a quarter of a million students through their research methods course and student research project. The thoroughly updated sixth edition offers unrivalled coverage of quantitative, qualitative, and mixed methods with renewed focus and a fresh, modern feel. As a result, the text's comprehensive coverage - which includes many new examples and additional material on areas such as social media research and big data - is now even clearer, more focused, and easier to navigate. NEW TO THIS EDITION Thoroughly but sensitively updated by three new authors. Dr Tom Clark, Dr Liam Foster, and Dr Luke Sloan bring specialist expertise and have worked closely with students and lecturers to build on Alan Bryman's impressive legacy. Extensively streamlined to provide even more focused coverage of the key aspects of social research, with adjustments made throughout to improve clarity and aid navigation. A clean, attractive new design makes the material easier than ever to read and use. Coverage - including citations and real research examples - has been broadened to better reflect the concerns and contexts of the book's geographically diverse, multi-disciplinary readership. Discussions of feminist perspectives have also been updated to highlight wider issues relating to marginalised groups and power dynamics in research, and inclusive, ethical practices are consistently endorsed. New material on recent developments within social research, including social media research and big data, has been embedded throughout and the numerous examples of real research have been thoroughly updated. In new 'Learn from experience' boxes, recent social science graduates from across the UK and Europe share their experiences of conducting a student research project. These candid accounts will inspire readers and help them to avoid common pitfalls and emulate successful approaches. Expanded digital resources now include a 'research process in practice' simulation, answers to the end-of-chapter questions, videos from the new 'Learn from experience' graduate panel, and screencast tutorials covering the data analysis software packages SPSS, Nvivo, R, and Stata. This title is available as an eBook. This book uniquely reflects on how to deal with the convergence of war and peace in the context of global economic and geo-political development. It

addresses methodological challenges in contemporary approaches to conflict, violence, security peace and development. Two dominant contemporary approaches are selected for debate on methodologies and ethical choices: rational choice and identity-based theorizing. The chapters are arranged as dialogues around contending approaches, to better understand how the inter-locking fields of violent conflict, peace, development and security can be researched and understood. The book considers how theoretical and methodological approaches relate to different ethical and political choices, including around engagement and intervention in the four interwoven fields. Theoretical, methodological and ethical issues emerge from the critical reviews of academic discourses and case-study based chapters from across the world, including Sri Lanka, Ghana, Colombia and Rwanda. This book is an invaluable resource for postgraduate students and researchers in Development Studies, Conflict Studies, Peace Studies and Security Studies. **Splintered Critical Race Theory and the Progressive War on Truth** *Bombardier Books* The problem with our nation's schools today is not just the low test scores in basic reading and math—which are an obstacle for the economy, not to mention students' futures. The challenge is that K-12 instruction has been hijacked by Critical Theorists who are “skeptical” of representative government and the freedoms we cherish. The debates over the retelling of America's past, on display in local school board meetings as well as conflicts between the New York Times' 1619 Project and President Donald Trump's 1776 Commission, involve not just historical facts, but how Americans define their nation. This battle over our national identity is a cultural battle, involving schools—cultural institutions—and the ideas we all need to share to get along with our neighbors, raise families, and pursue the American Dream. “Jonathan Butcher is one of our sharpest and most insightful analysts writing about education today. The nation owes him a debt of gratitude for work demystifying an obscure academic field, critical race theory, and fearlessly following where it leads when imposed on our public schools: abandoning the cherished belief that education can be a means of uniting our diverse country and replacing it with a pedagogy of grievance and despair.” —Robert Pondiscio, Senior Fellow, American Enterprise Institute and author of *How the Other Half Learns* “Jonathan Butcher's timely book on critical race theory addresses what I have described as the civil rights issue of our times. Too few Americans understand how this dangerous ideology and how it has seeped down into our K-12 educational system. Butcher's book is part of a collective effort to educate the American people about the infiltration and indoctrination of our educational system.” —Dr. Carol M. Swain, a former tenured professor at Vanderbilt and Princeton Universities **Trust and Honesty America's Business Culture at a Crossroad** *Oxford University Press* America's culture is moving in a new and dangerous direction, as it becomes more accepting and tolerant of dishonesty and financial abuse. Tamar Frankel argues that this phenomenon is not new; in fact it has a specific traceable past. During the past thirty years temptations and opportunities to defraud have risen; legal, moral and theoretical barriers to abuse of trust have fallen. She goes on to suggest that fraud and the abuse of trust could have a widespread impact on American economy and prosperity, and argues that the way to counter this disturbing trend is to reverse the culture of business dishonesty. Finally, she presents the following thesis: If Americans have had enough of financial abuse, they can demand of

their leaders, of themselves, and of each other more honesty and trust and less cynicism. Americans can reject the actions, attitudes, theories and assumptions that brought us the corporate scandals of the 1990s. Though American society can have "bad apples," and its constituents hold differing opinions about the precise meaning of trust and truth, it can remain honest, as long as it aspires to honesty.

Cognitive Robotics *MIT Press* The current state of the art in cognitive robotics, covering the challenges of building AI-powered intelligent robots inspired by natural cognitive systems. A novel approach to building AI-powered intelligent robots takes inspiration from the way natural cognitive systems—in humans, animals, and biological systems—develop intelligence by exploiting the full power of interactions between body and brain, the physical and social environment in which they live, and phylogenetic, developmental, and learning dynamics. This volume reports on the current state of the art in cognitive robotics, offering the first comprehensive coverage of building robots inspired by natural cognitive systems. Contributors first provide a systematic definition of cognitive robotics and a history of developments in the field. They describe in detail five main approaches: developmental, neuro,

evolutionary, swarm, and soft robotics. They go on to consider methodologies and concepts, treating topics that include commonly used cognitive robotics platforms and robot simulators, biomimetic skin as an example of a hardware-based approach, machine-learning methods, and cognitive architecture. Finally, they cover the behavioral and cognitive capabilities of a variety of models, experiments, and applications, looking at issues that range from intrinsic motivation and perception to robot consciousness. Cognitive Robotics is aimed at an interdisciplinary audience, balancing technical details and examples for the computational reader with theoretical and experimental findings for the empirical scientist. **Network neutrality From policy to law to regulation** *Manchester University Press* This electronic version has been made available under a Creative Commons (BY-NC) open access license. Net neutrality is the most contested Internet access policy of our time. This book offers an in-depth explanation of the concept, addressing its history since 1999, its engineering, the policy challenges it represents and its legislation and regulation. Various case studies are presented, including Specialized Services and Content Delivery Networks for video over the Internet, and the book goes on to examine the future of net neutrality battles in Europe, the United States and developing countries, as well as offering co-regulatory solutions based on FRAND and non-exclusivity. It will be a must-read for researchers and advocates in the net neutrality debate, as well as those interested in the context of communications regulation, law and economic regulation, human rights discourse and policy, and the impact of science and engineering on policy and governance. **Nanoweapons A Growing Threat to Humanity** *U of Nebraska Press* Nanoweapons just might render humanity extinct in the near future--a notion that is frightening and shocking but potentially true. In *Nanoweapons* Louis A. Del Monte describes the most deadly generation of military weapons the world has ever encountered. With dimensions one-thousandth the diameter of a single strand of human hair, this technology threatens to eradicate humanity as it incites world governments to compete in the deadliest arms race ever. In his insightful and prescient account of this risky and radical technology, Del Monte predicts that nanoweapons will dominate the battlefield of the future and will help determine the superpowers of the twenty-first century. He traces the emergence of nanotechnology, discusses the current development of nanoweapons--such as the "mini-nuke," which weighs five pounds and carries the power of one hundred tons of TNT--and offers concrete recommendations, founded in historical precedent, for controlling their proliferation and avoiding human annihilation. Most critically, *Nanoweapons* addresses the question: Will it be possible to develop, deploy, and use nanoweapons in warfare without rendering humanity extinct? **The Oxford Handbook of Women, Peace, and Security** *Oxford Handbooks* Passed in 2000, the United Nations Security Council Resolution 1325 and subsequent seven Resolutions make up the Women, Peace, and Security (WPS) agenda. This agenda is a significant international normative and policy framework addressing the gender-specific impacts of conflict on women and girls, including protection against sexual and gender-based violence, promotion of women's participation in peace and security processes, and support for women's roles as peace builders in the prevention of conflict and rebuilding of societies after conflict. Implementation within and across states and international organizations - and within peace and security operations - has been slow despite significant

transnational advocacy in support of the WPS agenda. The Oxford Handbook of Women, Peace, and Security brings together scholars, advocates, and policymakers to provide an overview of what we know concerning what works to promote women's participation in peace and security, what works to protect women and girls from sexual and gender-based violence and other human rights violations, and what works to prevent conflict drawing on women's experiences and knowledge of building peace from local to global levels. Just as importantly, it addresses the gaps in knowledge on and the future direction of scholarship on WPS. The handbook particularly aims to build on the findings from the 2015 Global Study of Resolution 1325, commissioned by the UN-Secretary General. Over the course of six sections, the handbook addresses the concepts and early history behind WPS; the theory and practice of WPS; international institutions involved with the WPS agenda; the implementation of WPS in conflict prevention, peace operations, peace building, arms control, human-rights protection, and protection of civilians; connections between WPS and other UN resolutions and agendas; and the ongoing and future challenges of WPS.

Why Don't Students Like School? A Cognitive Scientist Answers Questions About How the Mind Works and What It Means for the Classroom John Wiley & Sons Easy-to-apply, scientifically-based approaches for engaging students in the classroom Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning. His book will help teachers improve their practice by explaining how they and their students think and learn. It reveals the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-

understand principles with clear applications for the classroom Includes surprising findings, such as that intelligence is malleable, and that you cannot develop "thinking skills" without facts How an understanding of the brain's workings can help teachers hone their teaching skills "Mr. Willingham's answers apply just as well outside the classroom. Corporate trainers, marketers and, not least, parents -anyone who cares about how we learn-should find his book valuable reading." —Wall Street Journal

Liberating Economics Feminist Perspectives on Families, Work, and Globalization *University of Michigan Press* *Liberating Economics* draws on central concepts from women's studies scholarship to construct a feminist understanding of the economic roles of families, caring labor, motherhood, paid and unpaid labor, poverty, the feminization of labor, and the consequences of globalization. Barker and Feiner consistently recognize the importance of social location -- gender, race, class, sexual identity, and nationality -- in economic processes shaping the home, paid employment, market relations, and the global economy. Throughout they connect women's economic status in the industrialized nations to the economic circumstances surrounding women in the global South. Rooted in the two disciplines, this book draws on the rich tradition of interdisciplinary work in feminist social science scholarship to construct a parallel between the notions that the "personal is political" and "the personal is economic." Drucilla K. Barker is Professor of Economics and Women's Studies, Hollins University. Susan F. Feiner is Associate Professor of Economics and Women's Studies, University of Southern Maine.

Spare the Kids Why Whopping Children Won't Save Black America *Beacon Press* A challenge to the cultural tradition of corporal punishment in Black homes and its connections to racial violence in America Why do so many African Americans have such a special attachment to whopping children? Studies show that nearly 80 percent of black parents see spanking, popping, pinching, and beating as reasonable, effective ways to teach respect and to protect black children from the streets, incarceration, encounters with racism, or worse. However, the consequences of this widely accepted approach to child-rearing are far-reaching and seldom discussed. Dr. Stacey Patton's extensive research suggests that corporal punishment is a crucial factor in explaining why black folks are subject to disproportionately higher rates of school suspensions and expulsions, criminal prosecutions, improper mental health diagnoses, child abuse cases, and foster care placements, which too often funnel abused and traumatized children into the prison system. Weaving together race, religion, history, popular culture, science, policing, psychology, and personal testimonies, Dr. Patton connects what happens at home to what happens in the streets in a way that is thought-provoking, unforgettable, and deeply sobering. *Spare the Kids* is not just a book. It is part of a growing national movement to provide positive, nonviolent discipline practices to those rearing, teaching, and caring for children of color.

The 2014 Redesign of the Survey of Income and Program Participation An Assessment *National Academies Press* The Survey of Income and Program Participation (SIPP) is a national, longitudinal household survey conducted by the Census Bureau. SIPP serves as a tool to evaluate the effectiveness of government-sponsored social programs and to analyze the impacts of actual or proposed modifications to those programs. SIPP was designed to fill a need for data that would give policy makers and researchers a much better grasp of how effectively government programs were

reaching their target populations, how participation in different programs overlapped, and to what extent and under what circumstances people transitioned into and out of these programs. SIPP was also designed to answer questions about the short-term dynamics of employment, living arrangements, and economic well-being. The Census Bureau has reengineered SIPP—fielding the initial redesigned survey in 2014. This report evaluates the new design compared with the old design. It compares key estimates across the two designs, evaluates the content of the redesigned SIPP and the impact of the new design on respondent burden, and considers content changes for future improvement of SIPP.

Competition Policy and Patent Law under Uncertainty Regulating Innovation Cambridge University Press The regulation of innovation and the optimal design of legal institutions in an environment of uncertainty are two of the most important policy challenges of the twenty-first century. Innovation is critical to economic growth. Regulatory design decisions and, in particular, competition policy and intellectual property regimes can have profound consequences for economic growth. However, remarkably little is known about the relationship between innovation, competition and regulatory policy. Any legal regime must attempt to assess the trade-offs associated with rules that will affect incentives to innovate, allocative efficiency, competition, and freedom of economic actors to commercialize the fruits of their innovative labors. The essays in this book approach this critical set of problems from an economic perspective, relying on the tools of microeconomics, quantitative analysis and comparative institutional analysis to explore and begin to provide answers to the myriad challenges facing policymakers.

Writing for Scholarly Publication SAGE In this guide to academic writing the author takes the reader step-by-step through the writing and publication process—from choosing a subject, developing content that will engage others, to submitting the final manuscript for publication.

Most students in these programs are not themselves students of color, meaning the topics and the faculty teaching them are often faced with groups of students whose backgrounds and perspectives may be decidedly different - even hostile - to multicultural pedagogy and curriculum. This edited collection brings together an interdisciplinary group of scholars of color to critically examine what it is like to explore race in predominantly white classrooms. It delves into the challenges academics face while dealing with the wide range of responses from both White students and students of color, and provides a powerful overview of how teachers of color highlight the continued importance and existence of race and racism. Exploring Race in Predominately White Classrooms is an essential resource for any educator interested in exploring race within the context of today's classrooms **Researching Medical Education** *John Wiley & Sons* Researching Medical Education is an authoritative guide to excellence in educational research in the health professions. Presented by the Association for the Study of Medical Education and the Association for Medical Education in Europe, Researching Medical Education includes contributions from a team of international clinicians and non-clinical researchers in health education,

This accessible reference provides readers with the basic building blocks of research, introduces a range of theories and how to use them, illustrates a diversity of methods and their use, and gives guidance on practical researcher development. By linking theory and design and methods across the health profession education research spectrum, this book supports the improvement of quality, capacity building and knowledge generation. Researching Medical Education is the ideal resource for anyone researching health education, from undergraduate, through postgraduate training, to continuing professional development. **Healthy lives, healthy people our strategy for public health in England** *The Stationery Office* The Government recognises that many lifestyle-driven health problems are at alarming levels: obesity; high rates of sexually transmitted infections; a relatively large population of drug users; rising levels of harm from alcohol; 80,000 deaths a year from smoking; poor mental health; health inequalities between rich and poor. This white paper outlines the Government's proposals to protect the population from serious health threats; help people live longer, healthier and more fulfilling lives; and improve the health of the poorest. It aims to empower individuals to make healthy choices and give communities and local government the freedom, responsibility and funding to innovate and develop ways of improving public health in their area. The paper responds to Sir Michael Marmot's strategic review of health inequalities in England post 2010 - "Fair society, healthy lives" (available at <http://www.marmotreview.org/AssetLibrary/pdfs/Reports/FairSocietyHealthyLives.pdf>) and adopts its life course framework for tackling the wider social determinants of health. A new dedicated public health service - Public Health England - will be created to ensure excellence, expertise and responsiveness, particularly on health protection where a national response is vital. The paper gives a timetable showing how the proposals will be implemented and an annex sets out a vision of the role of the Director of Public Health. The Department is also publishing a fuller story on the health of England in "Our health and wellbeing today" (http://www.dh.gov.uk/prod_consum_dh/groups/dh_digitalassets/@dh/@en/@ps/documents/digitalasset/dh_122238.pdf), detailing the challenges and opportunities, and in 2011 will issue documents on major public health issues. **How to Write a BA Thesis, Second Edition A Practical Guide from Your First Ideas to Your Finished Paper** *University of Chicago Press* How to Write a BA Thesis is the only book that directly addresses the needs of undergraduate students writing a major paper. Cognitive psychologists, curriculum specialists, teacher

educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives- cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12. **The Intersectional Approach Transforming the Academy through Race, Class, and Gender** *Univ of North Carolina Press* Intersectionality, or the consideration of race, class, and gender, is one of the prominent contemporary theoretical contributions made by scholars in the field of women's studies that now broadly extends across the humanities, social sciences, and natural sciences. Taking stock of this transformative paradigm, *The Intersectional Approach* guides new and established researchers to engage in a critical reflection about the broad adoption of intersectionality that constitutes what the editors call a new "social literacy" for scholars. In eighteen essays, contributors examine various topics of interest to students and researchers from a feminist perspective as well as through their respective disciplines, looking specifically at gender inequalities related to globalization, health, motherhood, sexuality, body image, and aging. Together, these essays provide a critical overview of the paradigm, highlight new theoretical and methodological advances, and make a strong case for the continued use of the intersectional approach both within the borders of women's and gender studies and beyond. Ghana Routledge The world development institutions commonly present 'urban governance' as an antidote to the so-called 'urbanisation of poverty' and 'parasitic urbanism' in Africa. Governance for Pro-Poor Urban Development is a comprehensive and systematic analysis of the meaning, nature, and effects of 'urban governance' in theory and in practice, with a focus on Ghana, a country widely regarded as an island of good governance in the sub region. The book illustrates how diverse groups experience urban governance differently and contextualizes how this experience has worsened social differentiation in cities. This book will be of great interest to students, teachers, and researchers in development studies, and highly relevant to anyone with an interest in urban studies, geography, political economy, sociology, and African studies. **How to Write and Sell Simple Information for Fun and Profit Your Guide to Writing and Publishing Books, E-Books, Articles, Special Reports, Audio Programs, DVDs, and Other How-To Content** *Linden Publishing* Packed with income-generating ideas about creating a variety of saleable written works, this guide includes information for researching and writing effective, instructional materials and calling upon a variety of publishing channels, including magazines, traditional book publishers, self-publishing, and the Internet.
