EngLits-Madame Bovary (pdf)

InterLingua Publishing Detailed summaries of great literature.

Injury Epidemiology: Fourth edition

Lulu.com **Research on injuries is a high priority to inform public policy that reduces deaths, hospitalizations and associated costs. Principles for research design and analysis of injury incidence and severity are emphasized. Review of extant surveillance data reveals numerous flaws that must be changed to increase usefulness of the data. Research designs of studies of injury causation and evaluation of countermeasures are often inappropriate and mislead analytic and injury control efforts. Appendices to chapters illustrate research projects that influenced public policy affecting the reduction of motor vehicle fatalities per population by half in the U.S. The principles illustrated by these studies can be applied to other types of injury.**

My Life

An Attempt at an Autobiography

Courier Corporation **This priceless historical document features firsthand accounts from top levels of leadership in the Russian revolutions of 1905 and 1917, chronicling the struggle to establish a dictatorship of the proletariat.**

Report of the Presidential Commission on the Space Shuttle Challenger Accident

DIANE Publishing **Reviews the circumstances surrounding the Challenger accident to establish the probable cause or causes of the accident. Develops recommendations for corrective or other action based upon the Commission's findings and determinations. Color photos, charts and tables.**

The SIM Guide to Enterprise Architecture

CRC Press **Enterprise architecture is leading IT's way to the executive boardroom, as CIOs are now taking their place at the management table. Organizations investing their time, money, and talent in enterprise architecture (EA) have realized significant process improvement and competitive advantage. However, as these organizations discovered, it is one thing to acquire a game-changing technology but quite another to discover ways to use it well. A project of the Society for Information Management's Enterprise Architecture Working Group and edited by Leon A. Kappelman, The SIM Guide to Enterprise Architecture provides insights from leading authorities on EA, including John Zachman, Larry DeBoever, George Paras, Jeanne Ross, and Randy Hite. The book supplies a solid understanding of key concepts for effectively leveraging EA to redesign business processes, integrate services, and become an Information Age enterprise. Beginning with a look at current theory and frameworks, the book discusses the practical application of enterprise architecture and includes a wealth of best practices, resources, and references. It contains the SIM survey of IT organizations' EA activities, which provides important metrics for evaluating progress and success. Successful businesses exploit synergy among business functions and push the boundaries of process design. IT's cross-functional position uniquely qualifies it to lead process innovation. EA lets CIOs integrate technology with business vision and is the roadmap for implementing new systems, changing behavior, and driving value. This book explores the vision, foundation, and enabling technology required to successfully transform organizations with enterprise architecture.**

The Seat of the Antichrist

Bible Prophecy and the European Union

Pedante Press **The Seat of The Antichrist: Bible Prophecy and The European Union identifies the European Union as the final world empire and explains what Bible Prophecy predicts will occur in the end times. The reader discovers the relationship between Bible Prophecy, the European Union and today's current affairs. The Seat of the Antichrist details the European Union's history and institutional structure and shows how it aligns with Bible Prophecy. Bible Prophecy comprises one third of the Bible. The Bible's last book, The Revelation, predicts the events leading to the end of the world. It provides the details for the Tribulation, which occur during a seven year period of wars, plagues, earthquakes and calamities, which end in the battle of Armageddon. Part of the earth's judgments happen through a leader who rises to power from the final world empire predicted in Bible Prophecy. Evangelical Christians customarily refer to this leader as The Antichrist. The Seat of the Antichrist is the first book dealing with Bible Prophecy, which shows prophecy's relation in the present geopolitical framework and in doing so dismisses end-time conspiracy theories, which Bible Prophecy works often rely on. No book dealing with Bible Prophecy provides such in-depth analysis and extensive research as The Seat of the Antichrist: Bible Prophecy and The European Union, which presents the reader with a gripping, riveting expose.**

The Crowd

A Study of the Popular Mind

The Floating Press **The following work is devoted to an account of the characteristics of crowds. Organized crowds have always played an important part in the life of peoples, but this part has never been of such moment as at present. The substitution of the unconscious action of crowds for the conscious activity of individuals is one of the principal characteristics of the present age. Crowds, doubtless, are always unconscious, but this very unconsciousness is perhaps one of the secrets of their strength. In the natural world beings exclusively governed by instinct accomplish acts whose marvelous complexity astounds us. Reason is an attribute of humanity of too recent date and still too imperfect to reveal to us the laws of the unconscious, and still more to take its place. The part played by the unconscious in all our acts is immense, and that played by reason very small.**

The Nowhere Emporium

Floris Books When the mysterious Nowhere Emporium arrives in Glasgow, orphan Daniel Holmes stumbles upon it quite by accident. Before long, the 'shop from nowhere' -- and its owner, Mr Silver -- draw Daniel into a breathtaking world of magic and enchantment. Recruited as Mr Silver's apprentice, Daniel learns the secrets of the Emporium's vast labyrinth of passageways and rooms -- rooms that contain wonders beyond anything Daniel has ever imagined. But when Mr Silver disappears, and a shadow from the past threatens everything, the Emporium and all its wonders begin to crumble. Can Daniel save his home, and his new friends, before the Nowhere Emporium is destroyed forever? Scottish Children's Book Award winner Ross MacKenzie unleashes a riot of imagination, colour and fantasy in this astonishing adventure, perfect for fans of Philip Pullman, Corneila Funke and Neil Gaiman.

State-Firm Coordination and Upgrading

Reaching the Efficiency Frontier in Skill-, Capital-, and Knowledge-Intensive Industries in Spain and South Korea

Oxford University Press Since the 1980s, Spain and South Korea have experienced dramatic economic transformations. Through a comparative study, this book shifts our perspective on the political economy of economic transformation and shows how upgrading was underpinned by state-firm coordination, allowing both nations to pursue different strategies.

The Condition of the Working-class in England in 1844

Airport Competition Regulation in Europe

Kluwer Law International B.V. Over the past thirty years, airports within the EU - including nearly a hundred newly built or rebuilt during that time - have undergone a major economic transformation. From mere infrastructure providers, airports have become diversified and complex commercial enterprises in competition with each other. This is the first and only book thus far to deal with the legal issues surrounding this important development, focusing on the impact of EU Directive 12/2009 on airport charges. Examining the use of airport infrastructure, the growing competition among airports, and the relations between airlines and airports, the author, a leading aviation law practitioner, covers such issues and topics as the following: - types of charges - landing, passenger, aircraft parking; - pricing factors determining airport charges; - vertical contractual relations between airports and airlines; - airport market power and dominance; - issues of consultation and transparency; - ability of airlines and passengers to switch to alternative airports; - application of state aid rules; - security charges; - environmental charges and schemes; and - price discrimination and differentiation. The presentation encompasses a critical analysis of the findings of case law, both international and European, on airport charges in the context of the new trend of airports and airlines concluding vertical agreements. As an examination of the economic regulation of EU airports due to the liberalization process, structural changes in the ownership status of many EU airports, and the emergence of new airline business models (such as low-cost carriers), this book, the only one of its kind, will quickly become indispensable to practitioners, policymakers, and academics in aviation law.

Measuring Productivity - OECD Manual Measurement of Aggregate and Industry-level Productivity Growth

Measurement of Aggregate and Industry-level Productivity Growth

OECD Publishing This manual presents the theoretical foundations to productivity measurement, and discusses implementation and measurement issues.

Creativity Under Duress in Education?

Resistive Theories, Practices, and Actions

Springer *Creativity Under Duress in Education?* introduces a new framework—creativity under duress in education. Leading creativity researchers and educational scholars discuss creative theory and practice from an educational lens that is provocative. Across international contexts, this book combines insights from creativity and educational research; rich illustrations from classrooms, schools, and other professional settings, and practical ideas and strategies for how anyone invested in education can support creative teaching and learning. Readers will encounter diverse perspectives from an international cast of authors exploring cutting-edge ideas for creativity and innovation as a foremost priority for economies in the new millennium. At the same time, they consider forces of authority, control, and constraint that impact creative education and innovation within educational systems, extending to the professions. Educators and those interested in the future of education are vitally important to this conversation around research-based and practical analyses of creativity in and beyond the classroom. Addressed are these major issues: (1) creativity frameworks of theory and action in education, (2) research investigations into creativity and education, and (3) applications of creativity theory in real-world practice. Dynamic, this book presents a bridge between draconian contexts of assessment and explosive creativity in diverse places. A key contribution of the volume is its validation and promotion of creativity and innovation for students, teachers, professors, leaders, employers, policymakers, and others seeking ways to profoundly improve learning and transform education. In tackling the seemingly irreconcilable issues of creativity and accountability in K-12 institutions, higher education, and policy circles, worldwide, this work offers a message that is both cautionary and inspiring. Book editor Carol A. Mullen, PhD, is Professor of Educational Leadership at Virginia Tech, Virginia, USA. A twice-awarded Fulbright Scholar to China (2015) and Canada (2017), she was honored with the 2016 Jay D. Scribner Mentoring Award from the University Council for Educational Administration. She is author of *Creativity and Education in China* (2017) and co-editor of *Education policy perils* (2016).

International Postmodernism

Theory and Literary Practice

John Benjamins Publishing Containing more than fifty essays by major literary scholars, *International Postmodernism* divides into four main sections. The volume starts off with a section of eight introductory studies dealing with the subject from different points of view followed by a section that deals with postmodernism in other arts than literature, while a third section discusses renovations of narrative genres and other strategies and devices in postmodernist writing. The final and fourth section deals with the reception and processing of postmodernism in different parts of the world. Three important aspects add to the special character of *International Postmodernism*: The consistent distinction between postmodernity and postmodernism; equal attention to the making and diffusion of postmodernism and the workings of literature in general; and the focus on the text and the reader (i.e., the reader's knowledge, experience, interests, and competence) as crucial factors in text interpretation. This comprehensive study does not expressly focus on American postmodernism, although American interpretations of postmodernism are a major point of reference. The recognition that varying literary and cultural conditions in this world are bound to produce endless varieties of postmodernism made the editors, Hans Bertens and Douwe Fokkema, opt for the title *International Postmodernism*.

Sculpting in Time

Reflections on the Cinema

University of Texas Press A director reveals the original inspirations for his films, their history, his methods of work, and the problems of visual creativity

The Spirit of Barcelona

Proceedings of the 21st Congress of the International Ergonomics Association (IEA)

2021)

Volume III: Sector Based Ergonomics

Springer Nature This book presents the proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021), held online on June 13-18, 2021. By highlighting the latest theories and models, as well as cutting-edge technologies and applications, and by combining findings from a range of disciplines including engineering, design, robotics, healthcare, management, computer science, human biology and behavioral science, it provides researchers and practitioners alike with a comprehensive, timely guide on human factors and ergonomics. It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance, while at the same time promoting the health, safety and wellbeing of individuals. The proceedings include papers from researchers and practitioners, scientists and physicians, institutional leaders, managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies, domains and productive sectors. This volume includes papers addressing the following topics: Transport Ergonomics and Human Factors, Practitioner Case Studies, Human Factors in Robotics, Manufacturing, Agriculture, HF/E in Supply Chain Design and Management, Aerospace, Building and Construction.

The Land of Open Graves

Living and Dying on the Migrant Trail

Univ of California Press In his gripping and provocative debut, anthropologist Jason De León sheds light on one of the most pressing political issues of our time—the human consequences of US immigration policy. The Land of Open Graves reveals the suffering and deaths that occur daily in the Sonoran Desert of Arizona as thousands of undocumented migrants attempt to cross the border from Mexico into the United States. Drawing on the four major fields of anthropology, De León uses an innovative combination of ethnography, archaeology, linguistics, and forensic science to produce a scathing critique of "Prevention through Deterrence," the federal border enforcement policy that encourages migrants to cross in areas characterized by extreme environmental conditions and high risk of death. For two decades, this policy has failed to deter border crossers while successfully turning the rugged terrain of southern Arizona into a killing field. In harrowing detail, De León chronicles the journeys of people who have made dozens of attempts to cross the border and uncovers the stories of the objects and bodies left behind in the desert. The Land of Open Graves will spark debate and controversy.

Plague Land: No Escape

Sourcebooks, Inc. In one week, the virus destroyed the world. And that was just the start. Three survivors made it through with just each other to rely on, but now they are scattered across the globe. Leon is in England, Grace is on the way to New Zealand, and Freya to the "New United States". Until now, they and some others were lucky enough to stay alive. But, when the deadliest and most sinister attack is yet to come, what hope does humanity have to survive? Praise for Plague Land: "Will immediately engross and terrify readers."—VOYA "A thrilling family survival story, a clinical study of a fictional pathogen, body horror, and an action-packed dystopian narrative."—Booklist "Terror, anxiety, and anticipation will flow rapidly through the veins of readers as they piece together clues...in this fast-paced horror."—The Bulletin of the Center for Children's Books "A high-impact horrific thriller that will keep readers on the edge of their seat and begging for the next installment."—School Library Journal

The Speculative Turn

Continental Materialism and Realism

re.press Continental philosophy has entered a new period of ferment. The long deconstructionist era was followed with a period dominated by Deleuze, which has in turn evolved into a new situation still difficult to define. However, one common thread running through the new brand of continental positions is a renewed attention to materialist and realist options in philosophy. Among the leaders of the established generation, this new focus takes numerous forms. It might be hard to find many shared positions in the writings of Badiou, DeLanda, Laruelle, Latour, Stengers, and Žižek, but what is missing from their positions is an obsession with the critique of written texts. All of them elaborate a positive ontology, despite the incompatibility of their results. Meanwhile, the new generation of continental thinkers is pushing these trends still further, as seen in currents ranging from transcendental materialism to the London-based speculative realism movement to new revivals of Derrida. As indicated by the title *The Speculative Turn*, the new currents of continental philosophy depart from the text-centered hermeneutic models of the past and engage in daring speculations about the nature of reality itself. This anthology assembles authors, of several generations and numerous nationalities, who will be at the centre of debate in continental philosophy for decades to come."

Anger in the Air

Combating the Air Rage Phenomenon

Ashgate Publishing, Ltd. The new realities of airline travel came into full focus after the September 11 terrorist attacks. These horrific events escalated air rage incidents by 400%, but more importantly they put the entire airline industry under the spotlight. In subsequent years, the general public began to voice frustrations with the industry in very dramatic ways, a marked shift in consumer behavior from that of before 9/11. The International Transport Workers Federation responded with a call to action to bring about major changes to raise the airline industry to a level of service quality sufficient to meet the needs of 21st Century passengers. The quality of services that airline customers expect and the propensity toward air rage needs to be understood. Undoubtedly, some passengers are prone to air rage by factors in no way related to customer service. However, a better understanding of the customer's perception of service and airlines' offerings is one way of addressing the air rage crisis, combating the contributing factors long before they conspire to provoke a damaging incidence. *Anger in the Air: Combating the Air Rage Phenomenon* provides airlines with valuable input to help them better meet the service expectations of their customers and avoid instances of air rage on their flights. What do today's customers need and expect? What do airline customers perceive as the quality of services and how can the gap be closed between expectations and perceptions? The book addresses these key issues in five stages: 1. Discussing air rage incidents that have caused us to focus not just on the rage levels that some passengers reach during flight but, more importantly, why these rage levels are happening more often worldwide. 2. Considering what we know to be problematic within airline industry culture and what is questionable; what can be redesigned and how. 3. Presenting the key information regarding the psychology of air rage as a means to identify new areas to be considered in airline attendant training programs. 4. Learning directly from airline passengers what it is that they really value from customer service. 5. Looking to the future and planning changes in the context of additional pressing issues such as security, pricing and safety.

The English Constitution

Createspace Independent Publishing Platform There is a great difficulty in the way of a writer who attempts to sketch a living Constitution—a Constitution that is in actual work and power. The difficulty is that the object is in constant change. An historical writer does not feel this difficulty: he deals only with the past; he can say definitely, the Constitution worked in such and such a manner in the year at which he begins, and in a manner in such and such respects different in the year at which he ends; he begins with a definite point of time and ends with one also. But a contemporary writer who tries to paint what is before him is puzzled and a perplexed: what he sees is changing daily. He must paint it as it stood at some one time, or else he will be putting side by side in his representations things which never were contemporaneous in reality.

From Clocks to Chaos

The Rhythms of Life

Princeton University Press In an important new contribution to the literature of chaos, two distinguished researchers in the field of physiology probe central theoretical questions about physiological rhythms. Topics discussed include: How are rhythms generated? How do they start and stop? What are the effects of perturbation of the rhythms? How are oscillations organized in space? Leon Glass and Michael Mackey address an audience of biological scientists, physicians, physical scientists, and mathematicians, but the work assumes no knowledge of advanced mathematics. Variation of rhythms outside normal limits, or appearance of new rhythms where none existed previously, are associated with disease. One of the most interesting features of the book is that it makes a start at explaining "dynamical diseases" that are not the result of infection by pathogens but that stem from abnormalities in the timing of essential functions. *From Clocks to Chaos* provides a firm foundation for understanding dynamic processes in physiology.

Open Veins of Latin America

Five Centuries of the Pillage of a Continent

NYU Press [In this book, the author's] analysis of the effects and causes of capitalist underdevelopment in Latin America present [an] account of ... Latin American history. [The author] shows how foreign companies reaped huge profits through their operations in Latin America. He explains the politics of the Latin American bourgeoisies and their subservience to foreign powers, and how they interacted to create increasingly unequal capitalist societies in Latin America.-Back cover.

Seeing Like a State

How Certain Schemes to Improve the Human Condition Have Failed

Yale University Press "One of the most profound and illuminating studies of this century to have been published in recent decades."—John Gray, *New York Times Book Review* Hailed as "a magisterial critique of top-down social planning" by the *New York Times*, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. "Beautifully written, this book calls into sharp relief the nature of the world we now inhabit."—*New Yorker* "A tour de force."—Charles Tilly, *Columbia University*

The Plague Year

America in the Time of Covid

Penguin UK 'A virtuoso feat ... a book of panoramic breadth' *New York Times Book Review* 'A devastating analysis ... Wright is a master of knitting together complex narratives' *The Observer* Just as Lawrence Wright's *The Looming Tower* became the defining account of our century's first devastating event, 9/11, so *The Plague Year* will become the defining account of the second. The story starts with the initial moments of Covid's appearance in Wuhan and ends with Joseph Biden's inauguration in an America ravaged by well over 400,000 deaths - a mortality already some ten times worse than US combat deaths in the entire Vietnam War. This is an anguished, furious memorial to a year in which all of America's great strengths - its scientific knowledge, its great civic and intellectual institutions, its spirit of voluntarism and community - were brought low, not by a terrifying new illness alone, but by political incompetence and cynicism on a scale for which there has been no precedent. With insight, sympathy, clarity and rage, *The Plague Year* allows the reader to see the unfolding of this great tragedy, talking with individuals on the front line, bringing together many moving and surprising stories and painting a devastating picture of a country literally and fatally misled. 'Maddening and sobering - as comprehensive an account of the first year of the pandemic as we've yet seen' *Kirkus*

Women, Race & Class

Penguin UK Ranging from the age of slavery to contemporary injustices, this groundbreaking history of race, gender and class inequality by the radical political activist Angela Davis offers an alternative view of female struggles for liberation. Tracing the intertwined histories of the abolitionist and women's suffrage movements, Davis examines the racism and class prejudice inherent in so much of white feminism, and in doing so brings to light new pioneering heroines, from field slaves to mill workers, who fought back and refused to accept the lives into which they were born. 'The power of her historical insights and the sweetness of her dream cannot be denied' *The New York Times*

The Structuring of Organizations

A Synthesis of the Research

Prentice Hall How do organizations structure themselves? A synthesis of the empirical literature in the field, supported by numerous examples and illustrations, provides images that produce a theory. The author introduces five basic configurations of structure - the simple structure, the machine bureaucracy, the professional bureaucracy, the divisionalized form, and the adhocracy. This book reveals that structure seems to be at the root of many questions about organizations and why they function as they do.

The God Particle

If the Universe is the Answer, what is the Question?

Houghton Mifflin Harcourt The world's foremost experimental physicist uses humor, metaphor, and storytelling to delve into the mysteries of matter, discussing the as-yet-to-be-discovered God particle.

Who Rules the World?

Reframings

Penguin UK The essential account of geopolitics right now, from one of our greatest living intellectuals - including a new afterword on President Donald Trump Noam Chomsky: philosopher, political writer, fearless activist. No one has done more to question the hidden actors who govern our lives, calling the powers that be to account. Here he presents *Who Rules the World?*, his definitive account of those powers, how they work, and why we should be questioning them. From the dark history of the US and Cuba to China's global rise, from torture memos to sanctions on Iran, this book investigates the defining issues of our times and exposes the hypocrisy at the heart of America's policies and actions. The world's political and financial elite are now operating almost totally unconstrained by the so-called democratic structure. With climate change and nuclear proliferation threatening our very survival, dissenting voices have never been more necessary. Fiercely outspoken and rigorously argued, *Who Rules the World?* is an indispensable guide to how things really are.

Illuminations

Essays and Reflections

Mariner Books Views from one of the most original cultural critics of the twentieth century, Walter Benjamin

Representing Justice

Invention, Controversy, and Rights in City-states and Democratic Courtrooms

Yale University Press A remnant of the Renaissance : the transnational iconography of justice -- Civic space, the public square, and good governance -- Obedience : the judge as the loyal servant of the state -- Of eyes and ostriches -- Why eyes? : color, blindness, and impartiality -- Representations and abstractions : identity, politics, and rights -- From seventeenth-century town halls to twentieth-century courts -- A building and litigation boom in Twentieth-Century federal courts -- Late Twentieth-Century United States courts : monumentality, security, and eclectic imagery -- Monuments to the present and museums of the past : national courts (and prisons) -- Constructing regional rights -- Multi-jurisdictional premises : from peace to crimes -- From "rites" to "rights" -- Courts : in and out of sight, site, and cite -- An iconography for democratic adjudication.
