PALLIATIVE CARE FOR CHRONIC CANCER PATIENTS IN THE COMMUNITY

GLOBAL APPROACHES AND FUTURE APPLICATIONS

Springer Nature The new global cancer data suggests that the global burden has risen to 18.1 million new cases per year and 9.6 million cancer deaths per year. A number of factors appear to be driving this increase, in particular, a growing and aging global population and an increase of exposure to cancer risk factors linked to social and economic development. For rapidly-growing economies, the data suggests a shift from poverty- or infection-related cancers to those associated with lifestyles more typical in industrialized countries. There is still large geographical diversity in cancer occurrence and variations in the magnitude and profile of the disease between and within world regions. There are specific types of cancer that dominate globally: lung, female breast and colorectal cancer, and the regional variations in common cancer types signal the extent to which societal, economic and lifestyle changes interplay to differentially impact on the profile of this most complex group of diseases. Unfortunately, despite advances in cancer care, a significant proportion of patients at home, experience sub-optimal outcomes. Barriers to successful treatment outcomes include, but are not limited to: access to oncologists in the primary health centers, non-adherence, lack of experienced oncology and palliative care nurses in the community, inadequate monitoring and the lack of training of family and pediatric physicians. Telemedicine approaches, including telephone triage/education, telemonitoring, teleconsultation and status tracking through mobile applications, have shown promise in further improving outcomes, in particular for chronic cancer patients following their hospitalization. Lessons can be learned from existing hospices in North America, the United Kingdom, Australia, Centers of Excellence in African (Uganda) and modern community services in India (Kerala). An important goal of this book is to describe and encourage professionals to develop new community programs in palliative care, which include training and empowering physicians and nurses in the community on the principles of palliative care. The Middle East Cancer Consortium (MECC) together with the American Society of Clinical Oncology (ASCO) and the American Oncology Nursing Society (ONS) have conducted multiple courses ranging from basic palliative care to more specialized training in palliative care for multiple nationalities in Europe, Asia and Africa. Our experience clearly indicates that, to promote such activities, one needs strong leadership and confirmed political will to support the endeavor. The new book will emphasize the importance of having a core of multiple stakeholders including community leaders, government, NGOs and media to be actively involved in advocating for the cause and generating public awareness. This text will provide the reader with a comprehensive understanding of the outside-of-the-hospital treatment of cancer patients by medical, paramedical and volunteer personnel. In doing so, this text will encourage the creation of new palliative care services improving upon the existing ones and stimulate further research in this field. Part 1 of the text will begin with an overview of the current state of affairs of services provided to cancer patients while being cared for by primary health centers. It will also review the current literature regarding medical and psychological-based therapy options in the community for cancer patients at different stages of their disease. Part 2 will address the unique role of the community nurse, within the framework of the multidisciplinary team treating the patient, in the attempt to provide optimal evaluation and care in very challenging situations (such as with terminal patients). Part 3 will provide insightful models of this new discipline and serve as a valuable resource for physicians, nurses, social workers and others involved in the care of cancer patients. The book will take a multidisciplinary approach, integrating clinical and environmental data for practical management to enhance the efficacy of treatment while relieving suffering. Part 4 will also discuss the application of modern technological approaches to track symptoms, quality of life, diet, mobility, duration of sleep and medication use (including pain killers) in chronic cancer patients in the community. Part 5 of the book will also be devoted to modes of developing a collaborative program between governmental and non-governmental organization sectors. This includes volunteer workers in close collaboration with medical professionals for providing emotional and spiritual support, nursing care, nutritional support and empowering family caregivers. Such a model makes palliative care in the community a "people's movement", thus transferring part of the responsibility and ownership to the community.

HANDBOOK OF OBESITY PREVENTION

A RESOURCE FOR HEALTH PROFESSIONALS

Springer Science & Business Media Comprehensive in scope and meticulously researched, Handbook of Obesity Prevention

analyzes the intricate causes of this public health crisis, and sets out concrete, multilevel strategies for meeting it head-on. This innovative handbook clearly defines obesity in clinical, epidemiologic, and financial terms, and offers guidelines for planning and implementing programs and evaluating results. This systematic approach to large-scale social and policy change gives all parties involved—from individual practitioners to multinational corporations—the tools to set and attain realistic goals based on solid evidence and best practice in public health. A sample of topics covered: The individual: risk factors and prevention across the lifespan, specific populations (pregnant women, ethnic and regional groups). Levers for change in schools and workplaces. Community settings: role of the physical environment. "De-marketing" obesity: food industries and the media. Grassroots action: consumers and communities. The global obesity epidemic: rapid developments, potential solutions. From obesity prevention to health promotion: the future of the field. Its level of detail and wide range of topics make the Handbook of Obesity Prevention a bedrock sourcebook, overview, reference, or teaching text. Read by topic or cover to cover, here is accurate, up-to-date information for professionals and students in all areas of public health.

THE SOCIAL EPIDEMIOLOGY OF SLEEP

Oxford University Press, USA **AN ESSENTIAL NEW RESOURCE ON A FUNDAMENTAL DETERMINANT OF HEALTH** Sleep, along with the sleep-related behaviors that impact sleep quality, have emerged as significant determinants of health and well-being across populations. An emerging body of research has confirmed that sleep is strongly socially patterned, following trends along lines of socioeconomic status, race, immigration status, age, work, and geography. The Social Epidemiology of Sleep serves as both an introduction to sleep epidemiology and a synthesis of the most important and exciting research to date, including: - An introduction to sleep epidemiology, including methods of assessment and their validity, the descriptive epidemiology of sleep patterns and disorders, associations with health, and basic biology - What we know about the variation of sleep patterns and disorders across populations, including consideration of sleep across the lifespan and within special populations - Major social determinants of sleep (including socioeconomic status, immigration status, neighborhood contexts, and others) based on the accumulated research With editors from both population science and medicine, combined with contributions from psychology, sociology, demography, geography, social epidemiology, and medicine, this text codifies a new field at the intersection of how we sleep and the social and behavioral factors that influence it.

DIGESTIVE SYSTEM TUMOURS

Who Press **Digestive System Tumours** is the first volume in the fifth edition of the WHO series on the classification of human tumors. This series (also known as the WHO Blue Books) is regarded as the gold standard for the diagnosis of tumors and comprises a unique synthesis of histopathological diagnosis with digital and molecular pathology. These authoritative and concise reference books provide indispensable international standards for anyone involved in the care of patients with cancer or in cancer research, underpinning individual patient treatment as well as research into all aspects of cancer causation, prevention, therapy, and education. What is new in this edition? The fifth edition, guided by the WHO Classification of Tumours Editorial Board, will establish a single coherent cancer classification presented across a collection of individual volumes organized on the basis of anatomical site (digestive system, breast, soft tissue and bone, etc.) and structured in a systematic manner, with each tumor type listed within a taxonomic classification: site, category, family (class), type, and subtype. In each volume, the entities are now listed from benign to malignant and are described under an updated set of headings, including histopathology, diagnostic molecular pathology, staging, and easy-to-read essential and desirable diagnostic criteria. Who should read this book? - Pathologists - Oncologists - Gastroenterologists - Cancer researchers - Epidemiologists - Cancer registrars This volume: - Prepared by 168 authors and editors - Contributors from 22 countries - More than 1000 high-quality images - More than 3700 references

ABSENCE OF EXCESS BODY FATNESS

A Working Group of 21 independent experts from 8 countries, convened by the International Agency for Research on Cancer (IARC) in April 2016, reviewed the scientific evidence and assessed the cancer-preventive effects of the absence of excess body fatness. The mean body mass index (BMI) in the adult population has increased dramatically worldwide over the past 40 years, and IARC recently estimated that close to 4% of all new cancer cases in adults were attributable to a high BMI; the number of cases is highest in high-income countries and is expected to rise in low- and middle-income countries. This publication provides an important update of the 2002 IARC Handbook on Weight Control and Physical Activity, with evidence-based evaluation of the association between excess body fatness and cancer at more than 20 sites. In addition, the Working Group reviewed the evidence on childhood obesity and cancer in later life, the impact of excess body fatness in cancer patients on cancer survival and recurrence, and the few intervention studies of weight control on cancer outcome.

PRINCIPLES OF TRANSGENDER MEDICINE AND SURGERY

Routledge A practical guide to state-of-the-art treatments and health care knowledge about gender diverse persons, this second edition of Principles of Transgender Medicine and Surgery presents the foremost international specialists offering their knowledge on the wide spectrum of issues encountered by gender diverse individuals. In this handy text, professionals of all types can get important information about various aspects of transgender health care for a full spectrum of clients, from childhood to advanced age. Key topics addressed include medical and surgical issues, mental health issues, fertility, the coming out process, and preventive care. This essential text is extensively referenced and

illustrated, and instructs both novice and experienced practitioners on gender-affirming care.

THE SCIENCE OF HEALTH DISPARITIES RESEARCH

John Wiley & Sons Integrates the various disciplines of the science of health disparities in one comprehensive volume **The Science of Health Disparities Research** is an indispensable source of up-to-date information on clinical and translational health disparities science. Building upon the advances in health disparities research over the past decade, this authoritative volume informs policies and practices addressing the diseases, disorders, and gaps in health outcomes that are more prevalent in minority populations and socially disadvantaged communities. Contributions by recognized scholars and leaders in the field—featuring contemporary research, conceptual models, and a broad range of scientific perspectives—provide an interdisciplinary approach to reducing inequalities in population health, encouraging community engagement in the research process, and promoting social justice. In-depth chapters help readers better understand the specifics of minority health and health disparities while demonstrating the importance of advancing theory, refining measurement, improving investigative methods, and diversifying scientific research. In 26 chapters, the book examines topics including the etiology of health disparities research, the determinants of population health, research ethics, and research in African American, Asians, Latino, American Indian, and other vulnerable populations. Providing a unified framework on the principles and applications of the science of health disparities research, this important volume: Defines the field of health disparities science and suggests new directions in scholarship and research Explains basic definitions, principles, and concepts for identifying, understanding and addressing health disparities Provides guidance on both conducting health disparities research and translating the results Examines how social, historical and contemporary injustices may influence the health of racial and ethnic minorities Illustrates the increasing national and global importance of addressing health disparities Discusses population health training, capacity-building, and the transdisciplinary tools needed to advance health equity A significant contribution to the field, **The Science of Health Disparities Research** is an essential resource for students and basic and clinical researchers in genetics, population genetics, and public health, health care policymakers, and epidemiologists, medical students, and clinicians, particularly those working with minority, vulnerable, or underserved populations.

DRINKING COFFEE, MATE, AND VERY HOT BEVERAGES

This volume of the IARC Monographs presents evaluations of the carcinogenic hazard to humans of drinking coffee and very hot beverages including, but not limited to, mate. An IARC Monographs Working Group reviewed epidemiological evidence, animal bioassays and co-carcinogenicity studies, and mechanistic and other relevant data to reach conclusions as to the carcinogenic hazard to humans of drinking coffee, mate, and very hot beverages. The Working Group assessed more than 1000 observational and experimental studies that investigated the association between cancer at more than 20 sites with drinking coffee, mate, and very hot beverages.

STATISTICS AND DATA ANALYSIS IN GEOLOGY

Wiley Thoroughly revised and updated, this new edition of the text that helped define the field continues to present important methods in the quantitative analysis of geologic data, while showing students how statistics and computing can be applied to commonly encountered problems in the earth sciences. In addition to new and expanded coverage of key topics, the Third Edition features new pedagogy, end-of-chapter review exercises, and an accompanying website that contains all of the data for every example and exercise found in the book.

Carcinogens, which as some endogenous factors can be better delineated help initiate the neoplastic process, may be either synthetic through such investigations. The topics of this volume encompass premalignant non or naturally-occurring. Cancer causation may be ascribed to invasive lesions, species-specific aspects of carcinogenicity, certain chemicals, physical agents, radioactive materials, viruses, parasites, the genetic make-up of the organism, and radiation, viruses, a quantum theory of carinogenesis, onco bacteria. Humans, eumetazoan animals and vascular plants genes, and selected environmental carcinogens. are susceptible to the first six groups of cancer causes, whe reas the last group, bacteria, seems to affect only vascular plants. Neoplastic development may begin with impairment ofjmdy defenses by a toxic material (carcinogen) which acts as an initiator, followed by promotion and progression to an overt neoplastic state.

NUTRITION IN CHILDHOOD

WHO CLASSIFICATION OF SKIN TUMOURS

IARC Who Classification of Tum The WHO Classification of Skin Tumours is the 11th volume in the 4th edition of the WHO series on the classification of human tumours. The series (also known as the Blue Books) has long been regarded by pathologists as the gold standard for the diagnosis of tumours, and it is an indispensable guide for the design of evaluations, clinical trials, and studies involving cancer. These authoritative and concise reference books provide an international standard for anyone involved in cancer research or the care of cancer patients. Diagnostic criteria, pathological features, and genetic and other associated molecular alterations are described in a disease-oriented manner. This volume updates the existing ICD-O codes and provides new codes for use in epidemiology and cancer registration. It also provides information on clinical features, pathology, genetics, prognosis, and protective factors for each of the tumour types covered. The editors expect that this volume will be of particular interest to pathologists, oncologists, and dermatologists who manage or research skin tumours. Sections are included on all recognized neoplasms (and their variants) of the skin and its adnexae. Since the previous edition, there have been particularly substantial changes to the classification of melanoma, based on the latest information from genetic and molecular studies.

THE INSECTS OF AUSTRALIA

A TEXTBOOK FOR STUDENTS AND RESEARCH WORKERS

THE ESSENTIAL GUIDE TO PHARMACY RESIDENCY RESEARCH

"The purpose of this work is to provide Post Graduate Year 1 (PGY1) and Post Graduate Year 2 (PGY2) pharmacy residents with an elementary introduction to the research process and overview of steps that should be considered when initiating a research project. For pharmacy residents, conducting a research project from start to finish is mandatory for ASHP's residency accreditation standards. For many pharmacy residents, especially those in their first year of postgraduate training, research presents a number of daunting hurdles-how to find and evaluate research opportunities, study design, appropriate statistical analysis, and the IRB are all outside the typical pharmacist's comfort zone. Additionally, residency programs vary nationally with respect to providing support to residents throughout the stages of the research process. This book will be a primer that pharmacy residents can turn to when they need to know how to design, start, and complete a research project successfully. By providing clear steps and even tools that can be adapted for the reader's needs, this book will remove the mystique around research and biostatistical analysis, making it accessible to all"--

FOUNDATIONS OF SLEEP HEALTH

Academic Press Foundations of Sleep Health presents sleep health as a critical element of overall individual and population health. Sleep disorders are an increasing problem plaguing more than 40 million Americans. Sleep impacts numerous biological functions and plays a critical role in brain development, including learning and memory consolidation, cognitive functioning, and emotion regulation. This book provides an historic and current overview of the state of sleep health with an emphasis on the interplay between several levels of determinants and factors that influence sleep health. The text provides students in the health professions with in-depth discussion on the theory, research, and practice of sleep health, while also detailing mechanisms, hypotheses, and determinants of sleep and ways to improve sleep health. Discusses the current state of knowledge of sleep health, research into the factors that contribute to and are impacted by sleep health Uses a socioecological model to examine the whole range of determinants of sleep health, from biological to upstream environmental factors and possible modes of intervention Contains a detailed glossary of sleep health terms to aid in the understanding of key concepts Includes learning outcomes for each chapter, objective assessments of knowledge, with explanations, and open-ended questions designed to facilitate discussion

NOBLES AND NATION IN CENTRAL EUROPE

FREE IMPERIAL KNIGHTS IN THE AGE OF REVOLUTION, 1750-1850

Cambridge University Press This is a study of Central European nobles in revolution. As one of Germany's richest, most insular and most autonomous nobilities, the Free Knights in Electoral Mainz represented the early modern noble ideal of pure bloodlines and cosmopolitan loyalties in the old society of orders. But this world came to an end with the outbreak of the revolutionary wars in 1792. Quite apart from the social, economic and political dislocations and loss, the era from 1789 to 1815 also meant a cultural reorientation for the nobility. William D. Godsey, Jr here explores how nobles in post-revolutionary Germany gradually abandoned their old self-understanding and assimilated with the new cultural 'nation' while aristocrats in the Habsburg Empire, which had taken in many emigres from Mainz, moved instead towards supranationalism. This is a major contribution to debates about the relationship between identity,

cultural nationalism, supranationalism and religion in Germany and the Habsburg Empire.

PALLIATIVE CARE IN PEDIATRIC ONCOLOGY

Springer This textbook is the first to focus on comprehensive interdisciplinary care approaches aimed at enhancing the wellbeing of children with cancer and their families throughout the illness experience. Among the topics addressed are the epidemiology of pediatric cancer distress, including physical, emotional, social, and spiritual dimensions; the role of the interdisciplinary team; communication and advance care planning; symptom prevention and management; care at the end of life; family bereavement care; and approaches to ease clinician distress. The contributing authors are true experts and provide guidance based on the highest available level of evidence in the field. The book has not only an interdisciplinary but also an international perspective; it will appeal globally to all clinicians caring for children with cancer, including physicians, nurses, psychosocial clinicians, and chaplains, among others.

LETTERS FROM PHARMACY PRECEPTORS

PEARLS FOR SUCCESS

ASHP The latest in ASHP's Letters series, Letters from Pharmacy Preceptors: Pearls for Success is comprised of 22 letters from award-winning pharmacy preceptors from a wide variety of practice settings and organizations. Led by Co-Editors Joshua Raub, Sara J. White, and Cathy Walker, this inspiring compilation draws on the vast experience, knowledge, and expertise from past recipients of the ASHP Foundation's Pharmacy Residency Excellence Award who have been recognized in their program achievements and leadership in the training of pharmacy residents. This book is intended to help guide both new and tenured preceptors to further develop their skills as pharmacy educators. This compilation of shared best practices and precepting pearls is derived from the collective experience of precepting over 2,148 residents. Topics include: Socratic teaching Creating a teaching philosophy Interdisciplinary involvement of learners Importance of accreditation Avoiding burnout Precepting Millennials Preceptor development plans Simulator training Mentorship Coaching Involving residents in academic courses Letters from Pharmacy Preceptors joins the ASHP series of personal letters books created to inspire pharmacists through all stages of their professional journey.

OBSTETRICAL DECISION MAKING

Mosby Incorporated

CANCER-RELATED BONE PAIN

Oxford University Press Cancer-related bone pain is experienced by patients with primary bone tumours such as myeloma and osteosarcoma, but is more commonly seen in patients with malignant tumours that have metastasised to bone. Bone pain is one of the most common and severe forms of pain associated with breast, prostate and lung cancer, yet little is known about the underlying mechanisms responsible for the pain. Cancer patients identify bone pain as the most disruptive cancer-related event in terms of their quality of life and daily functioning, and it is also associated with increased incidence of morbidity, depression, and anxiety. Part of the Oxford Pain Management Library, this volume summarises the latest evidence-based and practical information on the management of cancer-related bone pain. Chapters cover the pathophysiology and clinical features of bone pain, general principles of management and the use of opioids and other agents. It will be an invaluable reference for all health care professionals involved in the management of patients with bone pain from various disciplines including palliative care, anaesthetics, oncology and general practice.

TOWARDS BETTER HEALTH ??? ??? ????

Partridge Singapore Over several years the author has published a weekly column in "Al Madina "daily newspaper. Varieties of subjects were to be discussed in this column in the fields of health, education, environment, family and society. Selected health topics were collected in the book. They present to the reader a message; health is the responsibility of the individual. He/she has to appreciate health as being defined by WHO "Health is not the mere absence of diseases, but rather the integrated physical, mental, social and spiritual well being". In order to maintain good health, the individual has to practice a healthy life style and keep a healthy environment. This is in brief the message of the book.

LESBIAN, GAY, BISEXUAL, AND TRANSGENDER AGING

RESEARCH AND CLINICAL PERSPECTIVES

Columbia University Press This volume fills a unique gap. Gerontologists seldom focus on special concerns of gay and lesbian older adults, lesbian, gay, bisexual, and transgender aging organizations rarely address issues of aging, and the mental health field has demonstrated an ability to marginalize both aging and homosexuality. This book lays out the state of knowledge with respect to lesbian, gay, bisexual, and transgender aging—physical health, sexuality, family ties, victimization, and legal and financial concerns. The references at the end of individual chapters and the bibliographical material at the end of the book provide an invaluable resource. For any gerontologist intrigued by the

interplay of historical changes and individual aging, it is difficult to imagine a more powerful example than Lesbian, Gay, Bisexual, and Transgender Aging. Evolution of attitudes toward homosexuality, the emergence of HIV/AIDS, and legal protections beginning to be afforded to same-sex relationships are all part of the changing world that has shaped and been shaped by lesbian, gay, bisexual, and transgender individuals who are now old.

TRANSGENDER HEALTH AND HIV PREVENTION

NEEDS ASSESSMENT STUDIES FROM TRANSGENDER COMMUNITIES ACROSS THE UNITED STATES

CRC Press Get the latest assessment of the health needs of the transgender population The impact of the HIV/AIDS epidemic on the transgender community has been tragically ignored, and as yet there is surprisingly little research data on the subject of health care and HIV prevention in this marginalized population. *Transgender Health and HIV Prevention* fills this void by providing a groundbreaking empirical assessment of the health needs of transgender persons in several areas around the United States. Respected experts discuss issues that hinder the effectiveness of HIV prevention programs, including housing, mental health, and employment, as well as the unique broader problems of social stigma, discrimination, and the lack of transgender knowledge and sensitivity on the part of health providers and prevention workers. Even though recent studies show estimated HIV infection rates to be as much as 60 percent among specific transgender populations in the United States, the transgender community continues to receive inadequate healthcare support. *Transgender Health and HIV Prevention* tackles the problems inherent in the healthcare system by first assessing the needs of transgender persons, then offering specific practical recommendations for remedy. Top researchers in partnership with community members in San Francisco, Houston, Washington DC, Chicago, Boston, Philadelphia, New England, San Juan, and Minneapolis/St. Paul bring empirical data together to assess what has to be done to effectively stem the HIV epidemic. This essential resource is extensively referenced with several tables to clarify data. *Transgender Health and HIV Prevention* explores in detail: health and social services needs of African-Americans, Latinas, and Asian/Pacific Islanders sources for the high rates of HIV infection among male-to-female transgender persons the prevalence of physical and sexual violence, substance abuse, and unemployment in the transgender community risk behaviors of male-to-female transgender persons health care providers' ignorance, insensitivity, and discrimination—with training strategies to increase patient access and effectiveness of care how traditional notions about femininity affect risk behaviors a comparison between transgender persons and other sexual minorities *Transgender Health and HIV Prevention* is crucial, one-of-a-kind reading for educators, students, researchers, public health professionals, social workers, health care providers, HIV/AIDS caregivers, and prevention workers.

TRANSGENDER AND HIV

RISKS, PREVENTION, AND CARE

Routledge Deliver effective services to this growing population! This volume presents the first collection of reports on the impact of HIV/AIDS on the transgender community worldwide. It includes a thorough description of the unique HIV risks of transgender people and exposes their largely neglected health and social service needs. This unique book also reports on the first generation of prevention interventions targeting this community, discusses guidelines for providing sex reassignment services to HIV-positive transsexuals, and encourages collaboration between communities at risk, researchers, and people in the helping professions. The social stigma faced by this population adds to their risk of HIV infection. Low self-esteem, rejection, neglect, employment discrimination, disenfranchisement, and a desire for acceptance and validation are all contributing factors. Yet, as the editors point out, "On the positive side, the transgender community has been able to mobilize and empower itself, and has found a voice that no longer can be ignored. We call on transgender and nontransgender people alike to work together to advance HIV prevention and promote our sexual health." In *Transgender and HIV* you'll encounter: extensive discussions of the health, social service, and HIV prevention needs of the transgender community tips on how to work with marginalized communities in an empowering way explorations of the sexuality of both male-to-female and female-to-male transsexuals first-ever findings on sex reassignment surgery on HIV-positive individuals guidelines for surgery on HIV-positive transsexuals *Transgender and HIV* provides much-needed and often-requested information on HIV prevalence, risks, prevention, and care for this increasingly visible community.

FEELING PERSECUTED

CHRISTIANS, JEWS AND IMAGES OF VIOLENCE IN THE MIDDLE AGES

Reaktion Books In *Feeling Persecuted*, Anthony Bale explores the medieval Christian attitude toward Jews, which included a pervasive fear of persecution and an imagined fear of violence enacted against Christians. As a result, Christians retaliated with expulsions, riots, and murders that systematically denied Jews the right to religious freedom and peace. Through close readings of a wide range of sources, Bale exposes the perceived violence enacted by the Jews and how the images of this Christian suffering and persecution were central to medieval ideas of love, community, and home. The images and texts explored by Bale expose a surprising practice of recreational persecution and show that the violence perpetrated against medieval Jews was far from simple anti-Semitism and was in fact a complex part of medieval life and culture. Bale's comprehensive look at medieval poetry, drama, visual culture, theology, and philosophy makes *Feeling Persecuted* an important read for anyone interested in the history of Christian-Jewish relations and the impact of this history on modern culture.

INTERDISCIPLINARY PEDIATRIC PALLIATIVE CARE

"We hope that the lives of all children will be filled with possibility, with open horizons and rainbows into the future. Children with serious illnesses, their families, and those who care for them, confront the realization that "not everything is possible," that despite dramatic scientific and medical advances, the lifespan of some children will be shortened. This threat of premature loss heightens the sense of time for children and families alike, and challenges clinicians to create new pathways of hope for them"--

CHEMICAL APPLICATIONS OF SPECTROSCOPY

MARK TWAIN'S CIVIL WAR

University Press of Kentucky When the Civil War halted steamboat travel on the Mississippi River in 1861, an unemployed riverboat pilot named Samuel Clemens enlisted in the Missouri militia. After two weeks of service, Clemens abandoned his post and fled westward to begin a writing career—a turn of events that precipitated the rise to fame of the man who would become known as Mark Twain. The circumstances surrounding his departure are unclear; some view Twain as a deserter, while others call into question the nature of his commitment from the beginning. Twain defended himself in speeches and in print, offering varying accounts—with varying degrees of truth—of his confusion upon enrollment, his ignorance of the moral and political forces behind the war, and his claim to have killed a man while hiding in a corncrib. Regardless of the reason for his desertion, his personal experiences and the Civil War in general are recurring topics in Twain's speeches, fiction, and nonfiction. In addition to broaching the issue in longer works, such as *Life on the Mississippi* and *The Gilded Age*, Twain directly addresses it in shorter pieces such as "The Private History of a Campaign That Failed" and "A Curious Experience." Editor David Rachels unites these selections in *Mark Twain's Civil War*, offering Twain fans and Civil War scholars the unprecedented opportunity to read the entire array of Twain's Civil War-influenced literature in one volume. In addition to Twain's own pieces, Rachels includes an account of Twain's war career by his official biographer as well as a story by Absalom C. Grimes, a Confederate mail runner who claims to have served with Twain early in the war. An introduction by Rachels completes the text, which analyzes Twain's military stint and assesses the war's profound influence on one of America's most celebrated authors.

TEAMWORK IN PALLIATIVE CARE

FULFILLING OR FRUSTRATING?

Oxford University Press Teamwork is a complex but essential component of palliative care. The needs of people diagnosed with life threatening disease will vary greatly over time, and it is rarely possible for just one professional to be able to provide adequate care. In order to ensure an holistic approach, the whole multi-disciplinary team must be involved. Inevitable questions arise from such an approach, and this book seeks to address these. How does a team come into being? What different formats are there? How might the patient contribute to the effectiveness of their care and the way in which the team operates? What are the difficulties and frustrations encountered in developing and maintaining such teams? What models of working and styles of leadership have developed? How are power and authority handled within the team setting? The importance of team building, training, support, attention to group process, and stress management to protect the mental health of the team are explored. The ethical issues inherent in palliative care such as consent, autonomy, confidentiality, decision making within teams, and the legal implications of such are also discussed. The book concludes with one important question - do we know if teams are the most effective way of providing care? This book addresses key issues surrounding the role of the team in palliative care, and is an essential guide to reappraising the importance of collaborative teamwork, and enhancing understanding of existing team

structures.
