The Value of Believing in Yourself

The Tale of Louis Pasteur

World Book of Swimming

From Science to Performance

Nova Novinka Before 1970, scientific research in swimming was poor and anecdotal, and the improvements of performance were linked firstly to the swimmer's experience and, secondly, as a result of permanent research for speed. Before and after the Second World War, scientific studies were conducted by pioneers and marked the beginning of research in stroke mechanics and swimming physiology exercise. This book reviews research on the body of knowledge available for the improvement of sports coaching and training practice in swimming, which seems to be relevant, numerous, and diversified enough to help swimming coaches bridge the gap between theory and practice.

Handbook of Stress and the Brain

Part 1: The Neurobiology of Stress

Elsevier The Handbook of Stress and the Brain focuses on the impact of stressful events on the functioning of the central nervous system; how stress affects molecular and cellular processes in the brain, and in turn, how these brain processes

determine our perception of and reactivity to, stressful challenges - acutely and in the long-run. Written for a broad scientific audience, the Handbook comprehensively reviews key principles and facts to provide a clear overview of the interdisciplinary field of stress. The work aims to bring together the disciplines of neurobiology, physiology, immunology, psychology and psychiatry, to provide a reference source for both the non-clinical and clinical expert, as well as serving as an introductory text for novices in this field of scientific inquiry. Part 1 addresses basic aspects of the neurobiology of the stress response including the involvement of neuropeptide, neuroendocrine and neurotransmitter systems and its corollaries regarding gene expression and behavioural processes such as cognition, motivation and emotionality. * Provides an overview of recent advances made in stress research * Includes timely discussion of stress and its effect on the immune system * Presents novel treatment strategies targeting brain processes involved in stress processing and coping mechanisms

Dementia

From Diagnosis to Management - A Functional Approach

Taylor & Francis Clinicians from many disciplines have been challenged to provide appropriate and effective interventions for the diverse behavioral symptoms that define the neurologically degenerative condition, dementia. SLPs have only recently begun to develop assessment and treatment approaches for the cognitive and communication deficits that accompany dementia. This timely volume aims to serve as a reference manual and the starting point for those who want to provide life-enhancing services to persons with dementia, and to inspire the continued generation of quality research to demonstrate the value of cognitive-communication intervention. Students, researchers, and practitioners in all areas of communication sciences and disorders will find this book immensely helpful.

Survivors: The Gathering Darkness #6: The Final Battle

HarperCollins The time has come for a traitor to fall. Don't miss the action-packed final adventure in the Survivors: The Gathering Darkness series! From Erin Hunter, #1 nationally bestselling author of Warriors, Survivors is full of "wild and wonderful adventure" (Kirkus; starred review) that will thrill fans of Spirit Animals and Wings of Fire. Storm has discovered the identity of the traitor dog who was sabotaging her former Pack—but when she returned from her exile, she fell right into the Bad Dog's waiting trap. Now a prisoner in the Wild Pack's camp, Storm is running out of time. This is her last chance to save the Pack...and to put an end to what the traitor began.

Survivors: The Gathering Darkness #3: Into the Shadows

HarperCollins Darkness threatens the Wild Pack in this epic third book in the second Survivors series! From Erin Hunter, #1 nationally bestselling author of Warriors, Survivors is full of "wild and wonderful adventure" (Kirkus Reviews, starred review) that will thrill fans of Spirit Animals and Wings of Fire. Storm is determined to protect her Pack from any threat—but how can she protect it from her own Packmates? Some dog is sabotaging the Pack from within, and suspicion and distrust are tearing the dogs apart. If they don't uncover the traitor soon, there will be nothing left for Storm to protect...

Report to Congress on Mild Traumatic Brain Injury in the United States

Steps to Prevent a Serious Public Health Problem

CreateSpace According to existing data, more than 1.5 million people experience a traumatic brain injury (TBI) each year in the United States. Of them, as many as 75 percent sustain a mild traumatic brain injury—or MTBI. These injuries may cause long-term or permanent impairments and disabilities. Many people with MTBI have difficulty returning to routine, daily activities and may be unable to return to work for many weeks or months. In addition to the human toll of these injuries, MTBI costs the nation nearly \$17 billion each year.

Green Entrepreneur Handbook

The Guide to Building and Growing a Green and Clean Business

CRC Press Written by a practicing business attorney with startup experience in the environmental and technology sectors, this comprehensive handbook assists entrepreneurs in tackling the wide variety of opportunities to go green. A one-stop resource for entrepreneurs, it helps readers incorporate clean technology, environmental practices, and green business approaches into the work environment. The book discusses how to sell to utilities, explores fundraising outlets for green businesses, covers government incentives, presents key startup tools aimed at green businesses, and addresses challenges of many new businesses, such as raising money and making sales. Additional resources are available on the book's website.

Markov Point Processes and Their Applications

World Scientific These days, an increasing amount of information can be obtained in graphical forms, such as weather maps, soil samples, locations of nests in a breeding colony, microscopical slices, satellite images, radar or medical scans and X-ray techniques. "High level" image analysis is concerned with the global interpretation of images, attempting to reduce it to a compact description of the salient features of the scene. This book takes a stochastic approach. It studies Markov object processes, showing that they form a flexible class of models for a range of problems involving the interpretation of spatial data. Applications can be found in statistical physics (under the name of "Gibbs processes"), environmental mapping of diseases, forestry, identification of ore structure in materials science, signal analysis, object recognition, robot vision, and interpretation of images from medical scans or confocal microscopy. Contents: Point Processes: Definitions and Notation Simple Point Processes Finite Point Processes Markov Point Processes: Ripley-Kelly Markov Point Processes The Hammersley-Clifford Theorem Markov Marked Point Processes Statistics Inference: The Metropolis-Hastings Algorithm Conditional Simulation Spatial Birth-and-Death Processes Applications: Modelling Spatial Patterns Pairwise Interaction Processes Area-Interaction Processes and other papers Readership: Undergraduate and postgraduate students; a reference book for researchers in probability & statistics, or engineers interested in spatial data and image analysis. Keywords: Conditional Intensity; Gibbs Process; Interaction Modelling; Markov Point Process; Spatial Statistics; Spatial Inference; Stochastic Geometry; Marked Point Process; Markov Chain Monte Carlo Reviews: "The book is remarkable by the amount of the material covered and excellent readability ... It is highly recommended as the first comprehensive text that covers various concepts related to Markov point processes and typically scattered in the journal literature." Mathematical Reviews

Crazy Over You

Entangled: Select Otherworld She's on the sheriff's most wanted list. Waking up with a naked woman holding a knife at his throat is just about the last thing Sheriff Travis Flynn expected. And the brother she's looking for? A murderer. And dead. Probably. But the real shock comes when she insists she's not a Lycan. LeAnn Wilcox isn't looking for love...especially not from some wolf in sheriff's clothing. She operates on the other side of the law. Once she finds her brother-alive-she'll get out of the pack's territory and go back to her regular, normal, non-furry life of changing jobs and her name whenever her past closes in. The cool, logical Sheriff has finally met his match, but LeAnn's life is at stake if she won't claim her place in the pack, especially once his control over the pack is challenged and her brother's fate is questioned.
