COMPOSITE MATHEMATICS FOR CLASS 8

S. Chand Publishing Composite Mathematics is a series of books for Pre Primer to Class 8 which conforms to the latest CBSE curriculum. The main aim of writing this series is to help the children understand difficult mathematical concepts in a simple manner in easy language.

APC LEARNING MATHEMATICS - CLASS 8 (CBSE) - AVICHAL PUBLISHING COMPANY

Avichal Publishing Company Learning Mathematics - Class 8 has been written by Prof. M.L. Aggarwal in accordance with the latest syllabus of the NCERT and Guidelines issued by the CBSE on Comprehensive and Continuous Evaluation (CCE). The subject matter has been explained in a simple language and includes many examples from real life situations. Questions in the form of Fill in the Blanks, True/False statements and Multiple Choice Questions have been given under the heading 'Mental Maths'. Some Value Based Questions have also been included to impart values among students. In addition to normal questions, some Higher Order Thinking Skills (HOTS) questions have been given to enhance the analytical thinking of the students. Each chapter is followed by a Summary which recapitulates the new terms, concepts and results.

CONCEPTS OF BIOLOGY

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

SCIENCE AND HYPOTHESIS

THEMES IN WORLD HISTORY

TEXTBOOK IN HISTORY FOR CLASS XI

AKBAR AHMED

TWO PLAYS

Al Saqi Noor is the tale of three brothers attempting to rescue their sister Noor, who has been kidnapped during Ramadan. Each brother represents a different ideological position in the contemporary Islamic world; the play could be set in Baghdad but also in Cairo, Karachi or Kabul. While exploring the crisis of modern Islam, Noor is a heartfelt treatise for religious tolerance. The Trial of Dara Shikoh tells the story of the eldest son of 17th century Mughal Emperor Shah Jahan. Heir apparent, Dara Shikoh is a learned scholar with a strong belief in the unity of different faiths: Hinduism, Islam, Sikhism, Christianity and Judaism. Dara Shikoh highlights the complex issue of religious interpretation within a human context. Although the time frame is four centuries ago, its text resonates just as strongly for the contemporary reader.

71+10 NEW SCIENCE PROJECT JUNIOR (WITH CD)

V&S Publishers Science, as we all know refers to a body of knowledge itself, of the type that can be rationally explained and reliably applied. Science is a unique combination of Theory and Practice. A thorough knowledge of this subject is almost impossible without proper practical demonstrations which are also termed as Scientific Experiments or Projects. In this book, 71+10 New Science Projects (Junior), the author has taken up the simple facts and principles of Science, such as: Air Pressure, Volume and Density, Gravitational Force of the Earth, Surface Area of Solids, Fun experiments with Matchsticks, Water, Glass Bottle, Dishwashing Liquid, Oil, Candle, Balloon, etc., which are easily available for children and projected them in a simple and lucid language for the readers, particularly the school kids who can easily perform these experiments at home or school, of course with the help and guidance of their parents, elders or teachers. The book is meant for children of all age groups, particularly from 6 to 13, who can perform and experience the thrill of these fun-filled experiments as well as learn the basic principles of Science easily and quickly. Therefore, this book is a must read for all school kids, especially those from classes, five to nine to learn as well enjoy conducting all the 81 Fascinating Projects listed in the book, each explaining or proving some scientific theory or law. So go ahead children, enjoy reading, learning and experimenting!
