### RESEARCH HANDBOOK ON CRISIS MANAGEMENT IN THE BANKING SECTOR

Edward Elgar Publishing In this timely Handbook, over 30 prominent academics, practitioners and regulators from across the globe provide in-depth insights into an area of law that the recent global financial crisis has placed in the spotlight: bank insolvency law. Research Handbook on Crisis Management in the Banking Sector discusses the rules that govern a bank insolvency from the perspectives of the various parties that are affected by these rules. Thus, whilst many bank insolvency rules have been enacted only recently and their application is still clouded by a host of uncertainties, this book takes the perspectives of the relevant authorities, of the bank and of the bank's counterparties. Providing a comprehensive approach to crisis management in the banking sector, this Handbook will prove a valuable resource for academics, postgraduate students, practitioners and international policymakers.

Cambridge University Press We have just experienced the worst financial crash the world has seen since the Great Depression of the 1930s. While real economies in general did not crash as they did in the 1930s, the financial parts of the economy certainly did, or, at least, came very close to doing so. Hundreds of banks in the United States and Europe have been closed by their supervisory authorities, forcibly merged with stronger partners, nationalized or recapitalized with the tax payers' money. Banks and insurance companies had, by mid 2010, already written off some 2000 billion dollars in credit write-downs on loans and securities. In this book, Johan Lybeck draws on his experience as both an academic economist and a professional banker to present a detailed yet non-technical analysis of the crash. He describes how the crisis began in early 2007, explains why it happened and shows how it compares to earlier financial crises.

United Nations The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.
