The Green Book

Appraisal and Evaluation in Central Government : Treasury Guidance

Stationery Office This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Law, Bubbles, and Financial Regulation

Routledge Financial regulation can fail when it is needed the most. The dynamics of asset price bubbles weaken financial regulation just as financial markets begin to overheat and the risk of crisis spikes. At the same time, the failure of financial regulations adds further fuel to a bubble. This book examines the interaction of bubbles and financial regulation. It explores the ways in which bubbles lead to the failure of financial regulation by outlining five dynamics, which it collectively labels the "Regulatory Instability Hypothesis." . The book concludes by outlining approaches to make financial regulation more resilient to these dynamics that undermine law.

Monetizing Innovation

How Smart Companies Design the Product Around the Price

John Wiley & Sons Surprising rules for successful monetization Innovation is the most important driver of growth. Today, more than ever, companies need to innovate to survive. But successful innovation—measured in dollars and cents—is a very hard target to hit. Companies obsess over being creative and innovative and spend significant time and expense in designing and building products, yet struggle to monetize them: 72% of innovations fail to meet their financial targets—or fail entirely. Many companies have come to accept that a high failure rate, and the billions of dollars lost annually, is just the cost of doing business. Monetizing Innovations argues that this is tragic, wasteful, and wrong. Radically improving the odds that your innovation will succeed is just a matter of removing the guesswork. That happens when you put customer demand and willingness to pay in the driver seat—when you design the product around the price. It's a new paradigm, and that opens the door to true game change: You can stop hoping to monetize, and start knowing that you will. The authors at Simon Kucher know what they're talking about. As the world's premier pricing and monetization consulting services company, with 800 professionals in 30 cities around the globe, they have helped clients ranging from massive pharmaceuticals to fast-growing startups find success. In Monetizing Innovation, they distil the lessons of thirty years and over 10,000 projects into a practical, nine-step approach. Whether you are a CEO, executive leadership, or part of the team responsible for innovation and new product development, this book is for you, with special sections and checklist-driven summaries to make monetizing innovation part of your company's DNA. Illustrative case studies show how some of

Rentier Capitalism

Who Owns the Economy, and Who Pays for It?

Verso Books In this landmark book, the author of *The New Enclosure* provides a forensic examination and sweeping critique of early-twenty-first-century capitalism. Brett Christophers styles this as 'rentier capitalism', in which ownership of key types of scarce assets - such as land, intellectual property, natural resources, or digital platforms - is all-important and dominated by a few unfathomably wealthy companies and individuals: rentiers. If a small elite owns today's economy, everybody else foots the bill. Nowhere is this divergence starker, Christophers shows, than in the United Kingdom, where the prototypical ills of rentier capitalism - vast inequalities combined with entrenched economic stagnation - are on full display and have led the country inexorably to the precipice of Brexit. With profound lessons for other countries subject to rentier dominance, Christophers' examination of the UK case is indispensable to those wanting not just to understand this insidious economic phenomenon but to overcome it. Frequently invoked but never previously analysed and illuminated in all its depth and variety, rentier capitalism is here laid bare for the first time.

Credit Rating Agencies

Self-regulation, Statutory Regulation and Case Law Regulation in the United States and European Union

Springer The book examines the role of credit rating agencies (CRAs) in the subprime mortgage crisis. The CRAs are blamed for awarding risky securities '3-A' investment grade status and then failing to downgrade them quickly enough when circumstances changed, which led to investors suffering substantial losses. The causes identified by the regulators for the gatekeeper failure were conflicts of interest (as the issuers of these securities pay for the ratings); lack of competition (as the Big Three CRAs have dominated the market share); and lack of regulation for CRAs. The book examines how the regulators, both in the US and EU, have sought to address these problems by introducing soft law self-regulation in accordance with the International Organisation of Securities Commissions Code and hard law statutory regulation, such as that found in the "Reform Act" and "Dodd-Frank Act" in the US and similar provisions in the EU. The highly topical book examines these provisions in detail by using a doctrinal black-letter law method to assess the success of the regulators in redressing the problems identified. It also examines the US case law regulation relating to the legal liability of CRAs. The book examines whether the regulations introduced have had a deterrent effect on the actions of CRAs, whether investors are compensated for their losses, and how the regulators have dealt with the issues of conflicts of interest and an anti-competitive environment. Should liability be introduced for CRAs through changes in the law so as to compel them to issue reliable ratings and solve the current problems? The book seeks to simplify the complex issues involved and is backed by concrete evidence; as such, it will appeal to both the well-informed and the lay general public who are interested in learning more about the role of CRAs in the sub-prime mortgage crisis and regulators' attempts to remedy the situation. Novice readers can familiarise themselves with the legal and financial terminology used by referring to the glossary at the end of the book.

Stardust International Raceway

Motorsports Meets the Mob in Vegas, 1965-1971

McFarland Professional motorsports found their way to Las Vegas in the mid-1950s at a bankrupt horse track swarmed by gamblers--and soon became enmeshed with the government and organized crime. By 1965, the Vegas racing game moved to Stardust International Raceway, constructed with real grandstands, sanitary facilities and air-conditioned timing towers. Stardust would host the biggest racing names of the era--Mario Andretti, Parnelli Jones, John Surtees, Bobby Unser, Dan Gurney and Don Garlits among them. Established by a notorious racketeer, the track stood at the confluence of shadowy elements--secret wiretaps, casino skimming, Howard Hughes, and the beginnings of Watergate. The author traces the Stardust's colorful history through the auto racing monthlies, national newspapers and the files of the FBI.

REMOTE-ENTREPRENEURSHIP

Write Editions / Tusitala (RLS) Pte Ltd remote-Entrepreneurship™ marks a seminal contribution in the evolving field of entrepreneurship. Evidence-based and market-tested, the concept, model and strategy of r-entrepreneurship™ is set to help scores of people and aspiring entrepreneurs overcome their fear and dilemma of leaping from a stable corporate life to starting a business. With r-entrepreneurship, one can start a successful business without having to leave his or her job. The book documents a groundbreaking approach to entrepreneurship that has never been so exhaustively examined before. Broadly divided into two major parts — the theory and practice of r-entrepreneurship — it chronicles step-by-step the 10-year journey and stunning performance of author Joseph Ong's real-life business "experiment" — One Rochester Group — all while excelling in a multinational company. Readers will appreciate his wisdom, acute observations and practical know-how, and get to learn new exciting terms like Collective Leaders™ (c-Leaders™), Parental Responsibility Over Business ("PROB"), remote-Management System and many more. remote-Entrepreneurship is a revolutionary approach to entrepreneurship that promises significantly less risk and dramatically higher chance of success. Already embraced by academics and practitioners as a next-big concept to look out for, it will inevitably change the face of entrepreneurship as we know it. remote-Entrepreneurship is your complete strategic and tactical guide to having your cake and eating it too!

Power and the Professional

Ethics, Accountability and Leadership in the Workplace

McFarland No matter who you are or what you aim to achieve, power determines whether you succeed or fail. But while power dynamics permeate every interaction in the workplace, the concept is very poorly understood or managed in practice. Everyone has influence over some people and is under the influence of others, and must choose how to deal with these realities in daily interactions. This book offers a comprehensive and applied understanding of power in a professional scenario: where it comes from, how it moves and what that means in practice for how professionals work together. Drawing on numerous recent case studies, this book offers a toolbox that anyone can apply, including explanations of the different forms of power, the two ways power can move between parties, the perils of power, how to create accountability, the intersection of power and ethics, and tools for maintaining power relationships with both superiors and subordinates. It provides employers and employees alike the means to understand, manage, and exert the power necessary to control their own circumstances.

Patterns of Entrepreneurship Management

John Wiley & Sons This third edition prepares entrepreneurs for the rewards and pitfalls of this career choice. It explores a new theme on how to effectively manage a start-up company. Focus on Real Entrepreneurs sections highlight how entrepreneurs position their companies to meet the various marketing, financial, and technological challenges. Management Track sections present key management issues while following the development of a real company. Entrepreneurs will also find real situations and examples on which they can practice the broad range of skills required to start and build a company in today's complex world.

Other People's Houses

How Decades of Bailouts, Captive Regulators, and Toxic Bankers Made Home Mortgages a Thrilling Business

Yale University Press The clearest explanation yet of how the financial crisis of 2008 developed and why it could happen again In the wake of the financial meltdown in 2008, many claimed that it had been inevitable, that no one saw it coming, and that subprime borrowers were to blame. This accessible, thoroughly researched book is Jennifer Taub's response to such unfounded claims. Drawing on wide-ranging experience as a corporate lawyer, investment firm counsel, and scholar of business law and financial market regulation, Taub chronicles how government officials helped bankers inflate the toxic-mortgage-backed housing bubble, then after the bubble burst ignored the plight of millions of homeowners suddenly facing foreclosure. Focusing new light on the similarities between the savings and loan debacle of the 1980s and the financial crisis in 2008, Taub reveals that in both cases the same reckless banks, operating under different names, received government bailouts, while the same lax regulators overlooked fraud and abuse. Furthermore, in 2013 the situation is essentially unchanged. The author asserts that the 2008 crisis was not just similar to the S&L scandal, it was a severe relapse of the same underlying disease. And despite modest regulatory reforms, the disease remains uncured: top banks remain too big to manage, too big to regulate, and too big to fail.

Cost and EU Public Procurement Law

Life-Cycle Costing for Sustainability

Routledge Public institutions, companies and governments in the EU and around the world are increasingly engaging in sustainable public procurement – a broad concept that must consider the three pillars of economic equality, social welfare and public health and environmental responsibility when designing public tenders and finalizing government contracts. This book contributes to the development of life-cycle criteria tools and methodologies for public procurement in the EU. It collects both sector-crossing contributions analysing the most relevant theoretical and legal aspects, including both EU law and contract theory, and sector-specific contributions relating to some of the most important sustainable goods and services markets. The book starts with a chapter that discusses the different approaches to including sustainability considerations in buying decisions by both private and public purchasers, and then goes on to examine the EU law on LCC and how it is implemented in different Member States. These chapters address the challenges in balancing economic and sustainability objectives under EU internal market law. One chapter develops the analysis with specific reference to public-private partnership. Another chapter elaborates how multi-stakeholders' cooperation is necessary to develop LCC, based on a case study of a lighting services procurement. Three sector-specific studies relating to social housing, textile and clothing and IT close the book. With contributors from a range of backgrounds including law, business, management, engineering and policy development, this interdisciplinary book provides the first comprehensive study on LCC within the framework of EU public procurement law.

Organizational Structure and Design Quick Study Guide & Workbook

Trivia Questions Bank, Worksheets to Review Homeschool Notes with Answer Key

PediaPress

Capital

Penguin UK The "forgotten" second volume of Capital, Marx's world-shaking analysis of economics, politics, and history, contains the vital discussion of commodity, the cornerstone to Marx's theories.

High Quality Care for All

NHS Next Stage Review Final Report

The Stationery Office This review incorporates the views and visions of 2,000 clinicians and other health and social care professionals from every NHS region in England, and has been developed in discussion with patients, carers and the general public. The changes proposed are locally-led, patient-centred and clinically driven. Chapter 2 identifies the challenges facing the NHS in the 21st century: ever higher expectations; demand driven by demographics as people live longer; health in an age of information and connectivity; the changing nature of disease; advances in treatment; a changing health workplace. Chapter 3 outlines the proposals to deliver high quality care for patients and the public, with an emphasis on helping people to stay healthy, empowering patients, providing the most effective treatments, and keeping patients as safe as possible in healthcare environments. The importance of quality in all aspects of the NHS is reinforced in chapter 4, and must be understood from the perspective of the patient's safety, experience in care received and the effectiveness of that care. Best practice will be widely promoted, with a central role for the National Institute for Health and Clinical Excellence (NICE) in expanding national standards. This will bring clarity to the high standards expected and quality performance will be measured and published. The review outlines the need to put frontline staff in control of this drive for quality (chapter 5), with greater freedom to use their expertise and skill and decision-making to find innovative ways to improve care for patients. Clinical and managerial leadership skills at the local level need further development, and all levels of staff will receive support through education and training (chapter 6). The review recommends the introduction of an NHS Constitution (chapter 7). The final chapter sets out the means of implementation.

Business Ethics

A Manual for Managing a Responsible Business Enterprise in Emerging Market Economies

U.S. Government Printing Office Description This official Government manual provides a practical guide to assist owners and managers in meeting emerging global standards and expectations for an effective business ethics program. The manual is intended to be a practical resource for owners and managers, and endeavors to provide a comprehensive framework for designing and implementing business ethics programs by addressing such issues as what it means to be a responsible business, how to approach responsible business conduct as a strategy, which structures and systems help management foster reasonable expectations among enterprise stakeholders as well as guide employees and agents to meet them, how to communicate with stakeholders about enterprise standards, expectations, and performance—and secure stakeholders' feedback, how to align management practices with core enterprise beliefs through a business ethics program, and how to evaluate performance under a business ethics program and learn from it.

Cases in International Relations

Pathways to Conflict and Cooperation

CQ Press Students love good stories. That is why case studies are such a powerful way to engage students while teaching them about concepts fundamental to the study of international relations. In Cases in International Relations, Glenn Hastedt, Vaughn P. Shannon, and Donna L. Lybecker help students understand the context of headline events in the international arena. Organized into three main parts—military, economic, and human security—the book's fifteen cases examine enduring and emerging issues from the longstanding Arab-Israeli conflict to the rapidly changing field of cyber-security. Compatible with a variety of theoretical perspectives, the cases consider a dispute's origins, issue development, and resolution so that readers see the underlying dynamics of state behavior and can try their hand at applying theory.

The General Theory of Employment, Interest, and Money

Dirty Assets

Emerging Issues in the Regulation of Criminal and Terrorist Assets

Ashgate Publishing, Ltd. Adopting a multi-disciplinary and comparative approach, this book focuses on the emerging and innovative aspects of attempts to target the accumulated assets of those engaged in criminal and terrorist activity, organized crime and corruption. It examines the 'follow-the-money' approach and explores the nature of criminal, civil and regulatory responses used to attack the financial assets of those engaged in financial crime in order to deter and disrupt future criminal activity as well as terrorism networks. With contributions from leading international academics and practitioners in the fields of law, economics, financial management, criminology, sociology and political science, the book explores law and practice in countries with significant problems and experiences, revealing new insights into these dilemmas. It also discusses the impact of the 'follow-the-money' approach on human rights while also assessing effectiveness. The book will appeal to academics and researchers of financial crime, organized crime and terrorism as well as practitioners in the police, prosecution, financial and taxation agencies, policy-makers and lawyers.

Debt

The First 5,000 Years

Melville House Publishing Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time.

Strengthening Forensic Science in the United States

A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

TERRORISM AND POLITICAL VIOLENCE IN WEST AFRICA: A GLOBAL PERSPECTIVE

Xlibris Corporation While it could be arguably stated that West Africa has achieved remarkable and sustainable progress in the areas of democratic governance and economic growth, the sub-region, over the past few years, has been challenged by terrorism and other transnational security threats. Innocent civilians are continuously killed; security operatives and providers of humanitarian assistance targeted; properties and infrastructure wantonly destroyed; thus culminating in significant displacement of people and acute poverty. If these developments are not carefully and timeously addressed, they are capable of eroding progress so far recorded. It is against this background, that this Thesis undertakes a study of the different manifestations of terrorism and related transnational security challenges in West Africa, to explore the internal and external sources and drivers of instability; establish the linkages between terrorism and transnational threats; examine the various steps taken in recent time to strengthen the sub-region's capacity to prevent and address the menace of terrorism and other security challenges, and make necessary policy recommendations based on comprehensive best practices.

Sisyphus No More

The Case for Prison Education

Sisyphus No More presents compelling psychological, sociological, ethical, and financial grounds for providing more and better education and training to our incarcerated population. The arguments show that education and training programs humanize prisoners, support their reintegration into society and securing a living-wage job.

7 Occult Money Rituals

The Keys to Authentic Financial Magick

This book contains simple rituals that bring the money you desire. No demons, no darkness; you get powerful, light magick, using angelic names and sigils. Your wants and needs are converted into reality, through the power of magick. Ritual One is a rejection of personal poverty. If you're in the depths of poverty, you begin to move away from those depths. If you're already doing OK with money, the ritual removes the fear that poverty can ever return. Ritual Two will remove your financial desperation, to help you allow and attract a new financial future. Ritual Three removes the blockages that prevent wealth from coming to you. Ritual Four is a petition for riches, and this is a master working that helps to attract money into your life over the coming year. Ritual Five is designed to attract a specific sum of money, to solve a problem or fulfil a desire. Ritual Six increases your wages, or income from business or sales. Ritual Seven increases your luck in games of chance, including lotteries, card games and any form of gambling. The magick used in this book comes from many sources. If it works, it's in the book. You'll discover the six secret names of the archangel Metatron to access wealth four gnostic angels that break through financial barriers a secret pathworking technique that accesses the power of ancient gods The book explains the source of these magickal techniques, but only in brief, so you can put your focus on getting the magick to work. The methods are safe, and you don't need special equipment. All you need is an open mind and a willingness to work the magick as instructed. When you get money through magick, it's one of the best feelings in the world. This book can bring you that feeling.

The Psychology of Money

Timeless lessons on wealth, greed, and happiness

Harriman House Limited Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

Mental Capacity Act 2005 code of practice

[large print 2007 final edition]

The Stationery Office The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

Data Governance in AI, FinTech and LegalTech

Law and Regulation in the Financial Sector

Edward Elgar Publishing A comprehensive overview of the governance of urban infrastructures, this Companion combines illustrative cases with conceptual approaches to offer an innovative perspective on the governance of large urban infrastructure systems. Chapters examine the challenges facing urban infrastructure systems, including financial, economic, technological, social, ecological, jurisdictional and demand.

Smart IoT for Research and Industry

Springer Nature This book covers a variety of smart IoT applications for industry and research. For industry, the book is a guide for considering the real-time aspects of automation of application domains. The main topics covered in the industry section include real-time tracking and navigation, smart transport systems and application for GPS domains, modern electric grid control for electricity industry, IoT prospectives for modern society, IoT for modern medical science, and IoT automation for Industry 4.0. The book then provides a summary of existing IoT research that underlines enabling technologies, such as fog computing, wireless sensor networks, data mining, context awareness, real-time analytics, virtual reality, and cellular communications. The book pertains to researchers, outcome-based academic leaders, as well as industry leaders.

Legal Issues in Information Security

Jones & Bartlett Publishers Part of the Jones & Bartlett Learning Information Systems Security and Assurance Series Revised and updated to address the many changes in this evolving field, the Second Edition of *Legal Issues in Information Security* addresses the area where law and information security concerns intersect. Information systems security and legal compliance are now required to protect critical governmental and corporate infrastructure, intellectual property created by individuals and organizations alike, and information that individuals believe should be protected from unreasonable intrusion. Organizations must build numerous information security and privacy responses into their daily operations to protect the business itself, fully meet legal requirements, and to meet the expectations of employees and customers. Instructor Materials for *Legal Issues in Information Security* include: PowerPoint Lecture Slides Instructor's Guide Sample Course Syllabus Quiz & Exam Questions Case Scenarios/Handouts New to the Second Edition: Includes discussions of amendments in several relevant federal and state laws and regulations since 2011 Reviews relevant court decisions that have come to light since the publication of the first edition Includes numerous information security data breaches highlighting new vulnerabilities" *Cengage Learning*

Nimble, Focused, Feisty

Organizational Cultures That Win in the New Era and How to Create Them

BenBella Books Leaders have talked about the importance of corporate culture for decades, but the success of iconic companies like GE, Apple, and Google shows how culture is a strategic lever that can be utilized for driving growth, change, and innovation. In this new age of globalization, rapid technology shifts, and constant disruption, the 21st century marketplace is more volatile and uncertain than ever. To thrive, businesses need a new kind of emphasis around culture. Sara Roberts, former CEO and founder of Roberts Golden and a seasoned executive consultant to dozens of Fortune 500 companies and CEOs, sees how flourishing companies—from established market leaders to the surprising upstarts—share three distinct attributes: Nimble: They are much faster and more agile than ordinary organizations Focused: They use their sense of purpose as a lens to understand and meet the needs of customers and markets Feisty: They play big and act bold to capitalize on advantages and out-muscle the competition For successful companies in this new era, culture is not about playing defense but about going on offense. It's purposely designed, leveraged, and honed to deliver value and drive growth. In *Nimble, Focused, Feisty*, Roberts provides not only a look into what these organizations are doing differently but also a blueprint and framework so your company can create a cultural strategy to thrive in the new era.
