# Advances in Hydroinformatics

## SimHydro 2019 - Models for Extreme Situations and Crisis Management

*Springer Nature This book features a collection of extended papers based on presentations given at the SimHydro 2019 conference, held in Sophia Antipolis in June 2019 with the support of French Hydrotechnic Society (SHF), focusing on “Which models for extreme situations and crisis management?” Hydraulics and related disciplines are frequently applied in extreme situations that need to be understood accurately before implementing actions and defining appropriate mitigation measures. However, in such situations currently used models may be partly irrelevant due to factors like the new physical phenomena involved, the scale of the processes, and the hypothesis included in the different numerical tools. The availability of computational resources and new capacities like GPU offers modellers the opportunity to explore various approaches to provide information for decision-makers. At the same time, the topic of crisis management has sparked interest from stakeholders who need to share a common understanding of a situation. Hydroinformatics tools can provide essential information in crises; however, the design and integration of models in decision-support systems require further development and the engagement of various communities, such as first responders. In this context, methodologies, guidelines and standards are more and more in demand in order to ensure that the systems developed are efficient and sustainable. Exploring both the limitations and performance of current models, this book presents the latest developments based on new numerical schemes, high-performance computing, multiphysics and multiscale methods, as well as better integration of field-scale model data. As such, it will appeal to practitioners, stakeholders, researchers and engineers active in this field.*

## River to Reservoir

## Geoscience to Engineering

*Geological Society of London* This volume brings together a number of papers from two workshops with the theme, 'Rain, Rivers, Reservoirs', which considered the dynamic changes to river systems as part of natural processes, particularly changing climatic conditions. Bringing researchers from two different locations to Brazil and the UK allowed scientists to contribute to and promote, 'debate on current research...on how the planet works and how we can live sustainably on it'. This volume features a series of papers on the geoscience of modern and ancient rivers from across the world (Brazil, United States, Spain, Argentina, Canada, India and the UK), their evolution through time, their management, their deposits and their engineering, with both subsurface aquifers/hydrocarbon reservoirs (of Carboniferous, Triassic and Cretaceous age) and surface reservoirs considered.

## The Rhythm of the Rain

*Templar Publishing* A beautiful, lyrical non-fiction picture book about the water cycle. Issac empties his little jar of water into a stream and follows its journey through the country and the city until it joins the ocean. On the other side of the world, Cassi welcomes the rain in her dry village, where rivers now run and make their way back to the sea. The cycle is complete as the sun heats the ocean and clouds are formed that carry rain back to Issac once more.

## Levelling the Lake

## Transboundary Resource Management in the Lake of the Woods Watershed

*UBC Press Levelling the Lake explores a century and a half of social, economic, and legal arrangements through which the resources and environment of the Lake of the Woods and Rainy Lake watershed have been both harnessed and harmed. Jamie Benidickson traces the environmental consequences of resource extraction and recreation as well as their impacts on local residents, including Indigenous communities, which encouraged new legal and institutional responses. Assessing the transition from primary resource*

*extraction toward sustainable development, Levelling the Lake also shows how interjurisdictional and transboundary issues continue to play a significant role throughout the region.*
