### **21ST CENTURY SKILLS DEVELOPMENT THROUGH INQUIRY-BASED LEARNING**

---

---

#### **FROM THEORY TO PRACTICE**

---

**Springer** This book presents innovative instructional interventions designed to support inquiry project-based learning as an approach to equip students with 21st century skills. Instructional techniques include collaborative team-based teaching, social constructivist game design and game play, and productive uses of social media such as wikis and other online communication affordances. The book will be of interest to researchers seeking a summary of recent empirical studies in the inquiry project-based learning domain that employ new technologies as constructive media for student synthesis and creation. The book also bridges the gap between empirical works and a range of national- and international-level educational standards frameworks such as the P21, the OECD framework, AASL Standards for the 21st Century Learner, and the Common Core State Standards in the US. Of particular interest to education practitioners, the book offers detailed descriptions of inquiry project-based learning interventions that can be directly reproduced in today's schools. Further, the book provides research-driven guidelines for the evaluation of student inquiry project-based learning. Lastly, it offers education policymakers insight into establishing anchors and spaces for applying inquiry project-based learning opportunities for youth today in the context of existing and current education reform efforts. The aim of this book is to support education leaders', practitioners' and researchers' efforts in advancing inspiring and motivating student learning through transformative social constructivist inquiry-based knowledge-building with information technologies. We propose that preparing students with inquiry mindsets and dispositions can promote greater agency, critical thinking and resourcefulness, qualities needed for addressing the complex societal challenges they may face.

## **SUSTAINING LIVES AND LIVELIHOODS**

### **A DECISION FRAMEWORK FOR CALIBRATING SOCIAL AND MOVEMENT MEASURES DURING THE COVID-19 PANDEMIC**

---

World Health Organization Social and physical distancing and restrictions on international travel (thereafter "social and movement measures") have been introduced to reduce the risk of acquiring or spreading infection with COVID-19 in various community settings. Whilst the risk of infection to COVID-19 decreases, social and movement measures exacerbate the economic slowdown and can worsen socioeconomic inequalities. Calibrating social and movement measures is complex as it has direct and indirect health and economic impacts, across different subpopulations, now and in the future, and is characterized by uncertainty, urgency, need for multiple levels of decision-making. In this type of context, there is no one-size-fits-all strategy. But inclusive decision making, systematically informed by data and communicated clearly will promote transparency in the process, increase the legitimacy of the decisions and promote trust between the population and the decision-makers. The World Health Organization and the Organisation for Economic Co-operation and Development describe, in their joint publication, a decision framework to assist countries as they continue to calibrate social and movement measures until there is widespread population coverage with the vaccine.

**STATISTICAL ANALYSIS OF ECOTOXICITY STUDIES**

---

John Wiley & Sons A guide to the issues relevant to the design, analysis, and interpretation of toxicity studies that examine chemicals for use in the environment Statistical Analysis of Ecotoxicity Studies offers a guide to the design, analysis, and interpretation of a range of experiments that are used to assess the toxicity of chemicals. While the book highlights ecotoxicity studies, the methods presented are applicable to the broad range of toxicity studies. The text contains myriad datasets (from laboratory and field research) that clearly illustrate the book's topics. The datasets reveal the techniques, pitfalls, and precautions derived from these studies. The text includes information on recently developed methods for the analysis of severity scores and other ordered responses, as well as extensive power studies of competing tests and computer simulation studies of regression models that offer an understanding of the sensitivity (or lack thereof) of various methods and the quality of parameter estimates from regression models. The authors also discuss the regulatory process indicating how test guidelines are developed and review the statistical methodology in current or pending OECD and USEPA ecotoxicity guidelines. This important guide: Offers the information needed for the design and analysis to a wide array of ecotoxicity experiments and to the development of international test guidelines used to assess the toxicity of chemicals Contains a thorough examination of the statistical issues that arise in toxicity studies, especially ecotoxicity Includes an introduction to toxicity experiments and statistical analysis basics Includes programs in R and excel Covers the analysis of continuous and Quantal data, analysis of data as well as Regulatory Issues Presents additional topics (Mesocosm and Microplate experiments, mixtures of chemicals, benchmark dose models, and limit tests) as well as software Written for directors, scientists, regulators, and technicians, Statistical Analysis of Ecotoxicity Studies provides a sound understanding of the technical and practical issues in designing, analyzing, and interpreting toxicity studies to support or challenge chemicals for use in the environment.

Bentham Science Publishers It is widely agreed in art education literature that art educators need to think about the possibility of widening the concept of art education. Educators need to understand the context of learning and for that they need to understand student interests in both local and global aspects. This book values young people's expression of their own culture and personal interests. It is unique in that the starting point is the drawings of the young people - not to illustrate a predetermined theory, but to enable young people from different countries to express their visions about the world - illustrati.
