The Lion's Share

A History of British Imperialism 1850 to the Present

Routledge *Updated to incorporate a substantial new epilogue considering Brexit and its 'imperial' implications, the sixth edition of The Lion's Share remains an essential introduction to British imperialism from its Victorian heyday to the present. Well-known for its vigorous and readable style, this book presents a broad narrative of events and explores a number of general themes, challenging more conventional and popular interpretations of British imperialism, as well as the simplistic 'for' and 'against' arguments put*

forward in today's 'history wars'. Bernard Porter sees imperialism as a symptom not of Britain's strength in the world, but of her decline, and he argues that the empire itself both aggravated and obscured deep-seated malaise in the British economy. This sixth edition includes a final epilogue that engages with what Brexit means for British Imperial History, and whether it represents an extension of or final conclusion to Britain's Imperial Career. In so doing, the book offers readers a thorough understanding of the history of British imperialism and its heritage, extending right into the present day. Supported by maps, images and an updated chronology, *The Lion's Share* is the perfect resource for both students and those interested in British and Imperial History from the Victorian era to the modern day.

Italy's Sea

Empire and Nation in the Mediterranean, 1895-1945

Transnational Italian Cultures For much of the twentieth century the Mediterranean was a colonized sea. *Italy's Sea: Empire and Nation in the Mediterranean (1895-1945)* reintegrates Italy, one of the least studied imperial states, into the history of European colonialism. It takes a critical approach to the concept of the Mediterranean in the period of Italian expansion and examines how within and through the Mediterranean Italians navigated issues of race, nation and migration troubling them at home as well as transnational questions about sovereignty, identity, and national belonging created by the decline and collapse of the Ottoman empire in North Africa, the Balkans, and the eastern Mediterranean, or Levant. While most studies of Italian colonialism center on the encounter in Africa, *Italy's Sea* describes another set of colonial identities that accrued in and around the Aegean region of the Mediterranean, ones linked not to resettlement projects or to the rhetoric of reclaiming Roman empire, but to cosmopolitan imaginaries of Magna Graecia, the medieval Christian crusades, the Venetian and Genoese maritime empires, and finally, of religious diversity and transnational Levantine Jewish communities that could help render cultural and political connections between the Italian nation at home and the overseas empire in the Mediterranean. Using postcolonial critique to interpret local archival and oral sources as well as Italian colonial literature, film, architecture, and urban planning, the book brings to life a history of mediterraneita or Mediterraneanness in Italian culture, one with both liberal and fascist associations, and enriches our understanding of how

contemporary Italy-as well as Greece-may imagine their relationships to Europe and the Mediterranean today. --

Race and Real Estate

OUP Us *Race and Real Estate* brings together new work by architects, sociologists, legal scholars, and literary critics that qualifies and complicates traditional narratives of race, property, and citizenship in the United States. Rather than simply rehearsing the standard account of how blacks were historically excluded from homeownership, the authors of these essays explore how the raced history of property affects understandings of home and citizenship. While the narrative of race and real estate in America has usually been relayed in terms of institutional subjugation, dispossession, and forced segregation, the essays collected in this volume acknowledge the validity of these histories while presenting new perspectives on this story.

Overcoming Borderline Personality Disorder

A Family Guide for Healing and Change

Oxford University Press *Borderline personality disorder (BPD)* is characterized by unstable moods, negative self-image, dangerous impulsivity, and tumultuous relationships. Many people with BPD excel in academics and careers while revealing erratic, self-destructive, and sometimes violent behavior only to those with whom they are intimate. Others have trouble simply holding down a job or staying in school. *Overcoming Borderline Personality Disorder* is a compassionate and informative guide to understanding this profoundly unsettling--and widely misunderstood--mental illness, believed to affect approximately 6% of the general population. Rather than viewing people with BPD as manipulative opponents in a bitter struggle, or pitying them as emotional invalids, Valerie Porr cites cutting-edge science to show that BPD is a true neurobiological disorder and not, as many come to believe, a character flaw or the result of bad parenting. Porr then clearly and accessibly explains what BPD is, which therapies have proven effective, and how to rise above the weighty stigma associated with the disorder. Offering families and loved ones supportive guidance that both acknowledges the difficulties they face and shows how they can be overcome, Porr teaches empirically-supported and effective coping behaviors and interpersonal skills, such as new ways of talking about emotions, how to be aware of nonverbal communication, and validating difficult experiences. These skills are derived from Dialectical Behavior Therapy and Mentalization-based Therapy, two evidence-based treatments that have proven highly successful in reducing family conflict while increasing trust. *Overcoming*

Borderline Personality Disorder is an empowering and hopeful resource for those who wish to gain better understanding of the BPD experience--and to make use of these insights in day-to-day family interactions. Winner of the ABCT Self Help Book Seal of Merit Award 2011

Functional Skills for Pianists

Its Topical structure allows teachers the freedom to design lessons that meet varied abilities and needs of students. It is Comprehensive on two levels: 1) it includes introductory guidelines on fundamentals followed by numerous examples that are sequenced from beginning through advanced levels and 2) while it covers the development of skills found in beginning texts, it extends to more demanding sight reading material and substantive sections on figured bass realization and jazz/popular music harmonization. Currently, there is not a book on the market that covers such a wide variety and range of functional keyboard skills.*

Citizens and the State in Authoritarian Regimes

Comparing Russia and China

Oxford University Press, USA *"This volume compares the most powerful authoritarian states in global politics today: Russia and China. For all their power and money, both regimes have faced difficult tradeoffs in seeking both political stability and reliable information about society while confronting the West and its international influence. They have also made different choices: Russia today is a competitive authoritarian regime, while China is a non-competitive authoritarian regime. Despite the different paths taken after the tumultuous events of 1989, both regimes have returned to a more personalized form of authoritarian rule. By placing China*

and Russia side-by-side, this volume examines regime-society relations and produces new insights, including what strategies their rulers have used to stay in power while forging political stability and gathering information; how societal groups have resisted, complied, or responded to these strategies; and what costs and benefits, anticipated and unexpected, have accompanied the bargains political leaders and their societies have struck. The essays in this volume change the way we understand authoritarian politics and expand the terrain of how we analyze regime-society relations in authoritarian states. On the societal side, this book looks not just at society as a whole, but also the more specific roles of public opinion, labor politics, political socialization, political protests, media politics, environmental movements, and non-governmental organizations. On the regime side, this study is distinctive in examining not just domestic threats and the general strategies rulers deploy in order to manage them, but also international threats and the rationale behind and impact of new laws and new policies, both domestic and international"--

From Spirituals to Symphonies

African-American Women Composers and Their Music

University of Illinois Press *Exploding the assumption that black women's only important musical contributions have been in folk, jazz, and pop Helen Walker-Hill's unique study provides a carefully researched examination of the history and scope of musical composition by African American women composers from the nineteenth and twentieth centuries. Focusing on the effect of race, gender, and class, From Spirituals to Symphonies notes the important role played by individual personalities and circumstances in shaping this underappreciated category of American art. The study also provides in-depth exploration of the backgrounds, experiences, and musical compositions of eight African American women including Margaret Bonds, Undine Smith Moore, and Julia Perry, who combined the techniques of Western art music with their own cultural traditions and individual gifts. Despite having gained national and international recognition during their lifetimes, the contributions of many of these women are today forgotten.*

Courting Gender Justice

Russia, Turkey, and the European Court of Human Rights

Oxford University Press *Women and the LGBT community in Russia and Turkey face pervasive discrimination. Only a small percentage dare to challenge their mistreatment in court. Facing domestic police and judges who often refuse to recognize discrimination, a small minority of activists have exhausted their domestic appeals and then turned to their last hope: the European Court of Human Rights (ECtHR). The ECtHR, located in Strasbourg, France, is widely regarded as the most effective international human rights court in existence. Russian citizens whose rights have been violated at home have brought tens of thousands of cases to the ECtHR over the past two decades. But only one of these cases resulted in a finding of gender discrimination by the ECtHR-and that case was brought by a man. By comparison, the Court has found gender discrimination more frequently in decisions on Turkish cases. Courting Gender Justice explores the obstacles that confront citizens, activists, and lawyers who try to bring gender discrimination cases to court. To shed light on the factors that make rare victories possible in discrimination cases, the book draws comparisons among forms of discrimination faced by women and LGBT people in Russia and Turkey. Based on interviews with human rights and feminist activists and lawyers in Russia and Turkey, this engaging book grounds the law in the personal experiences of individual people fighting to defend their rights.*

How to Achieve Inclusive Growth

Oxford University Press *This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Rising inequality and widespread poverty, social unrest and polarization, gender and ethnic disparities, declining social mobility, economic fragility, unbalanced growth due to technology and globalization, and existential danger from climate change are urgent global concerns of our day. These issues are intertwined. They therefore require a holistic framework to examine their interplay and bring the various strands together. Leading academic economists have partnered with experts from several international institutions to explain the sources and scale of these challenges. They gather a wide array of empirical evidence and country experiences to lay out practical policy solutions and to devise a comprehensive and unified plan of action for combatting these economic and social disparities. This authoritative book is accessible to policy makers, students, and the general public interested in how to craft a brighter future by building a sustainable, green, and inclusive society in the years ahead.*

Fostering Resilience and Well-Being in Children and Families in Poverty

Why Hope Still Matters

Oxford University Press *The number of children living in families with incomes below the federal poverty level increased by 33 percent between 2000 and 2009, resulting in over 15 million children living in poverty. Some of these children are able to overcome this dark statistic and break the intergenerational transmission of poverty, offering hope to an otherwise bleak outlook, but this raises the question--how? In *Fostering Resilience and Well-being in Children and Families in Poverty*, Dr. Valerie Maholmes sheds light on the mechanisms and processes that enable children and families to manage and overcome adversity. She explains that research findings on children and poverty often unite around three critical factors related to risk for poverty-related adversity: family structure, the presence of buffers that can protect children from negative influences, and the association between poverty and negative academic outcomes, and social and behavioral problems. She discusses how the research on resilience can inform better interventions for these*

children, as poverty does not necessarily preclude children from having strengths that may protect against its effects. Importantly, Maholmes introduces the concept of "hope" as a primary construct for understanding how the effects of poverty can be ameliorated. At the heart of the book are interviews with family members who have experienced adversity but managed to overcome it through the support of targeted programs and evidence-based interventions. Student leaders provide unique perspectives on the important role that parents and teachers play in motivating youth to succeed. Finally, professionals who work with children and families share their observations on effective interventions and the roles of culture and spirituality in fostering positive outcomes. Excerpts from these interviews bring research to life and help call attention to processes that promote hope and resilience. This book will be invaluable for policymakers, educators, and community and advocacy groups, as well as scholars and students in family studies, human development, and social work.
