### Restorative Care Nursing for Older Adults

### A Guide For All Care Settings, Second Edition

Springer Publishing Company **Named a 2013 Doody's Essential Purchase! "This is a terrific text with good basic information and a level of detail, tools, and practicality that make it a useful resource to get older adults mobilized in any setting."--The Gerontologist "[This] book provides a practical hands-on perspective for implementing function focused care in all settings...[It] is a unique resource that is relevant for all nurses and health care providers working with older adults. In addition to addressing functional decline, function-focused care provides a fresh and practical solution to many of the problems that tend to arise with older adults such as infections, falls, and pressure ulcers all known to be associated with immobility." From the Foreword by Colin Milner CEO, International Council on Active Aging "This book encourages individualization, which is difficult to achieve with more prescriptive approaches. This second edition includes chapters on cognitively impaired adults, ethical issues, and patient-centered care, all of which are so important in long-term care. I found it to be very motivating in the way it helped me apply the philosophy and strategies to elders with whom I come in contact. I would highly recommend this book to anyone working with elders. Score: 95, 4 Stars--Doody's Medical Reviews The purpose of restorative care nursing (often referred to as function-focused care) is to take an active role in helping older adults maintain their highest level of function, thereby preventing excess disability. This is the only volume to educate caregivers about both the philosophy of restorative care and how to integrate it into all care settings for older adults. Now in its second edition, the text contains updated content in each chapter along with two entirely new chapters on function-focused care for cognitively impaired adults, ethical issues, and patient-centered care. The book provides a complete six-week education program in restorative care for nurses and other caregivers, numerous practical suggestions for beneficial activities that will enhance function, and strategies for motivating both older adults and caregivers to engage in restorative care. Woven throughout the text is research that documents the benefits and expected outcomes of restorative care. The book also includes the requirements for restorative care across all settings, and the necessary documentation. Restorative Care Nursing for Older Adults will help formal and informal caregivers and administrators at all levels assimilate the philosophy of restorative care and be able to develop and implement successful restorative care programs. This New Edition Features: Completely updated information, including two new chapters on function-focused care for cognitively impaired adults, ethical issues, and patient-centered care A six-week education program that teaches practical application of restorative care nursing Helpful suggestions and strategies for motivating older adults and caregivers Education materials designed for nursing home, assisted living, and acute care settings, including required documentation and goal-setting forms Educational materials for family caregivers**

## The Use of Psychological Testing for Treatment Planning and Outcomes Assessment

### Volume 1: General Considerations

[Routledge](#) Test-based psychological assessment has been significantly affected by the health care revolution in the United States during the past two decades. Despite new limitations on psychological services across the board and psychological testing in particular, it continues to offer a rapid and efficient method of identifying problems, planning and monitoring a course of treatment, and assessing the outcomes of interventions. This thoroughly revised and greatly expanded third edition of a classic reference, now three volumes, constitutes an invaluable resource for practitioners who in a managed care era need to focus their testing not on the general goals of personality assessment, symptom identification, and diagnosis so often presented to them as students and trainees, but on specific questions: What course of treatment should this person receive? How is it going? Was it effective? New chapters describe new tests and models and new concerns such as ethical aspects of outcomes assessment. Volume I reviews general issues and recommendations concerning the use of psychological testing for screening for psychological disturbances, planning and monitoring appropriate interventions, and the assessing outcomes, and offers specific guidelines for selecting instruments. It also considers more specific issues such as the analysis of group and individual patient data, the selection and implementation of outcomes instrumentation, and the ethics of gathering and using outcomes data. Volume II discusses psychological measures developed for use with younger children and adolescents that can be used for the purposes outlined in Volume I; Volume III, those developed for use with adults. Drawing on the knowledge and experience of a diverse group of leading experts--test developers, researchers, clinicians and others, the third edition of The Use of Psychological Testing for Treatment Planning and Outcomes Assessment provides vital assistance to all clinicians, and to their trainees and graduate students.

## Orientation to Home Care Nursing

## Advanced Practice Nursing E-Book An Integrative Approach

[Elsevier Health Sciences](#) Covering all advanced practice competencies and roles, this book offers strategies for enhancing patient care and legitimizing your role within today's health care system. It covers the history of advanced practice nursing, the theory behind the practice, and emerging issues. Offering a comprehensive exploration of advanced practice nursing, this edition also adds a focus on topics including the APN scope of practice, certification, and the ethical and legal issues that occur in clinical practice. The development of all major competencies of advanced practice nursing is discussed: direct clinical practice, consultation, coaching/guidance, research, leadership, collaboration, and ethical decision-making. Advanced practice competencies are discussed in relation to all advanced practice nursing and blended CNS-NP roles (case manager, acute care nurse practitioner), highlighting the shared aims and distinctions of each role. In-depth discussions on educational strategies explain how competencies develop as the nurses' practice progresses. A chapter on research competencies demonstrates how to use evidence-based research in practice, and how to promote these research competencies to other APNs. A conceptual framework shows the clear relationship between the competencies, roles, and challenges in today's health care environment. Practical strategies are provided for business management, contracting, and marketing. Comprehensive information covers the essential competencies of the new Doctor of Nursing Practice degree. More exemplars (case studies) provide real-life scenarios showing APN competencies in action. A new chapter shows how to provide reliable and valid data to substantiate your impact and justify equitable reimbursement for APN services, also enhancing your skills in quality improvement strategies, informatics, and systems thinking. Information on telehealth considerations covers the new sources of electronic healthcare information available to patients and describes how to counsel them on using reliable resources.

## Transforming Palliative Care in Nursing Homes

## The Social Work Role

[Columbia University Press](#) This volume outlines the belief that nursing homes can and should support the physical, psychological, and social needs of residents, and that residents can thrive in nursing homes when these needs are met. The book's contributors explore the role that palliative or comfort care plays in enhancing the quality of life of nursing home residents as well as the medical, familial, psychological, cultural, and financial issues that influence decision-making about end-of-life care. The book is designed to be a tool to prepare social workers to advocate for a greater incorporation of palliative care and psychosocial care into the culture of nursing home care. The book includes discussions of the psychosocial needs of nursing home residents and families, the financing of long-term care and end-of-life care, ethical issues in chronic care and end of life, trends and characteristics in nursing home care, rituals and grief at end-of-life, and considerations for the future. Each chapter includes case examples to further illustrate points made.

### Concepts for Interprofessional Collaborative Care

[Elsevier Health Sciences](#) Master the essential medical-surgical nursing content you'll need for success on the Next Generation NCLEX® Exam (NGN) and safe clinical practice! **Medical-Surgical Nursing: Concepts for Interprofessional Collaborative Care, 10th Edition** uses a conceptual approach to provide adult health knowledge and help you develop the clinical nursing judgment skills that today's medical-surgical nurses need to deliver safe, effective care. "Iggy" emphasizes three emerging trends in nursing — interprofessional collaborative care, concept-based learning, and clinical judgment and systems thinking — trends that will ground you in how to think like a nurse and how to apply your knowledge in the classroom, simulation laboratory, and clinical settings. A perennial bestseller, "Iggy" also features NCLEX Exam-style Challenge and Mastery questions to prepare you for success on the NGN! Consistent use of interprofessional terminology promotes interprofessional collaboration through the use of a common healthcare language, instead of using isolated nursing-specific diagnostic language. **UNIQUE!** Enhanced conceptual approach to learning integrates nursing concepts and exemplars, providing a foundation in professional nursing concepts and health and illness concepts, and showing their application in each chapter. Unparalleled emphasis on clinical reasoning and clinical judgment helps you develop these vital skills when applying concepts to clinical situations. Emphasis on QSEN and patient safety focuses on safety and evidence-based practice with Nursing Safety Priority boxes, including Drug Alert, Critical Rescue, and Action Alert boxes. Direct, easy-to-read writing style features concise sentences and straightforward vocabulary. Emphasis on health promotion and community-based care reflects the reality that most adult health care takes place in environments outside of high-acuity (hospital) settings.
