SPORT IN CAPITALIST SOCIETY

A SHORT HISTORY

Routledge Why are the Olympic Games the driving force behind a clampdown on civil liberties? What makes sport an unwavering ally of nationalism and militarism? Is sport the new opiate of the masses? These and many other questions are answered in this new radical history of sport by leading historian of sport and society, Professor Tony Collins. Tracing the history of modern sport from its origins in the burgeoning capitalist economy of mid-eighteenth century England to the globalised corporate sport of today, the book argues that, far from the purity of sport being 'corrupted' by capitalism, modern sport is as much a product of capitalism as the factory, the stock exchange and the unemployment line. Based on original sources, the book explains how sport has been shaped and moulded by the major political and economic events of the past two centuries, such as the French Revolution, the rise of modern

nationalism and imperialism, the Russian Revolution, the Cold War and the imposition of the neo-liberal agenda in the last decades of the twentieth century. It highlights the symbiotic relationship between the media and sport, from the simultaneous emergence of print capitalism and modern sport in Georgian England to the rise of Murdoch's global satellite television empire in the twenty-first century, and for the first time it explores the alternative, revolutionary models of sport in the early twentieth century. Sport in a Capitalist Society is the first sustained attempt to explain the emergence of modern sport around the world as an integral part of the globalisation of capitalism. It is essential reading for anybody with an interest in the history or sociology of sport, or the social and cultural history of the modern world.

WHAT WORKS IN GIRLS' EDUCATION

EVIDENCE FOR THE WORLD'S BEST INVESTMENT

Brookings Institution Press Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.
