Public Health Behind Bars

From Prisons to Communities

Springer Science & Business Media **Public Health Behind Bars From Prisons to Communities** examines the burden of illness in the growing prison population, and analyzes the impact on public health as prisoners are released. This book makes a timely case for correctional health care that is humane for those incarcerated and beneficial to the communities they reenter.

The Power to Arrest

Lessons from Research

Springer This insightful volume examines key research questions concerning police decision to arrest as well as police-led diversion. The authors critically evaluate the tentative answers that empirical evidence provides to those questions, and suggest areas for future inquiry. Nearly seven decades of empirical study have provided extensive knowledge regarding police use of arrest. However, this research highlights important gaps in our understanding of factors that shape police decision-making and what is required to alter current police practice. Reviewing this research base, this brief takes stock of what is known empirically about all aspects related to the use of arrests, providing important insights on the knowledge needed to make evidence-based policy decisions moving forward. With the potential to better impact policy and programs for alternatives to arrest, this brief will appeal to researchers and practitioners in evidence-based policing and police decision-making, as well as those interested in alternatives to arrest and related fields such as public policy.

The Last Gasp

The Rise and Fall of the American Gas Chamber

Univ of California Press **The Last Gasp** takes us to the dark side of human history in the first full chronicle of the gas chamber in the United States. In page-turning detail, award-winning writer Scott Christianson tells a dreadful story that is full of surprising and provocative new findings. First constructed in Nevada in 1924, the gas chamber, a method of killing sealed off and removed from the sight and hearing of witnesses, was originally touted as a "humane" method of execution. Delving into science, war, industry, medicine, law, and politics, Christianson overturns this mythology for good. He exposes the sinister links between corporations looking for profit, the military, and the first uses of the gas chamber after World War I. He explores little-known connections between the gas chamber and the eugenics movement. Perhaps most controversially, he has unearthed new evidence about American and German collaboration in the production and lethal use of hydrogen cyanide and about Hitler's adoption of gas chamber technology developed in the United States. More than a book about the death penalty, this compelling history ultimately reveals much about America's values and power structures in the twentieth century.

The Railway Age

The Devil's Cinema

Penguin Group Australia **On the night of October 10, 2008, Johnny Altinger, 38 and single, was heading to his first date with a woman he had met online. Soon after, Johnny's friends received strange emails and computer messages from him, boasting of his new girlfriend and her plans to treat him to an extended tropical holiday. 'I've got a one way ticket to heaven,' he wrote, 'and I'm never coming back.' He was never seen again. Two weeks earlier, aspiring filmmaker Mark Twitchell, a young father with a devotion to the television series Dexter, began a three-day shoot for his latest short film. His horror story featured a serial killer who impersonates women on an online dating site to lure unsuspecting men to his suburban kill room. But was his script actually the blueprint for a real-life murder? And what of Twitchell's other writings, including the elaborate and shocking document titled S.K. Confessions? Was it a diary detailing his dark transformation into a would-be serial killer? Combining sharp journalistic insight, meticulous research, and a powerfully gripping narrative, The Devil's Cinema is the definitive account of the notorious 'Dexter Killer,' a case and trial that captured the world's attention. Steve Lillebuen takes us deep into the extraordinary police investigation and the lives of everyone involved, while unveiling never-before-revealed details, all drawn from extensive and exclusive interviews - including months of contact with the killer himself. Moving from the police station to the courtroom, from the surface calm of suburbia to the surreal glamour of Hollywood, The Devil's Cinema is a compelling, multi-faceted story of dangerous obsessions pushed to extremes.**

Birds, Bees, Babies

Oh Sweat Publishing **Finally, someone has gotten around to actually telling the story of the birds and the bees...For generations, children (and oddly enough, some adults) have asked the question, "where do babies come from?" There have been answers from the biological to the absurd. However, everyone knows its got to do with birds and bees...but**

what does that mean? Did your mother ever tell you? J.L. Sweat masterfully tells a captivating non-biological story about how babies come from the birds and the bees. This story even makes mention of other mysterious loose ends, like sugar & frogs, to go where no story has gone before! No longer do you have to wonder whether a child is old enough to know the story you don't even know. Buy this book and know the real story!!

Modernizing Crime Statistics

Report 1: Defining and Classifying Crime

National Academies Press To derive statistics about crime "to estimate its levels and trends, assess its costs to and impacts on society, and inform law enforcement approaches to prevent it" a conceptual framework for defining and thinking about crime is virtually a prerequisite. Developing and maintaining such a framework is no easy task, because the mechanics of crime are ever evolving and shifting: tied to shifts and development in technology, society, and legislation. Interest in understanding crime surged in the 1920s, which proved to be a pivotal decade for the collection of nationwide crime statistics. Now established as a permanent agency, the Census Bureau commissioned the drafting of a manual for preparing crime statistics"intended for use by the police, corrections departments, and courts alike. The new manual sought to solve a perennial problem by suggesting a standard taxonomy of crime. Shortly after the Census Bureau issued its manual, the International Association of Chiefs of Police in convention adopted a resolution to create a Committee on Uniform Crime Records "to begin the process of describing what a national system of data on crimes known to the police might look like. The key distinction between the rigorous classification proposed in this report and the "classifications" that have come before in U.S. crime statistics is that it is intended to partition the entirety of behaviors that could be considered criminal offenses into mutually exclusive categories. *Modernizing Crime Statistics: Report 1: Defining and Classifying Crime* assesses and makes recommendations for the development of a modern set of crime measures in the United States and the best means for obtaining them. This first report develops a new classification of crime by weighing various perspectives on how crime should be defined and organized with the needs and demands of the full array of crime data users and stakeholders.

Religion and the Global Politics of Human Rights

Oxford University Press Are human rights universal or the product of specific cultures? Is democracy a necessary condition for the achievement of human rights in practice? And when, if ever, is it legitimate for external actors to impose their understandings of human rights upon particular countries? In the contemporary context of globalization, these questions have a salient religious dimension. Religion intersects with global human rights agendas in multiple ways, including: whether "universal" human rights are in fact an imposition of Christian understandings; whether

democracy, the "rule of the people," is compatible with God's law; and whether international efforts to enforce human rights including religious freedom amount to an illicit imperialism. This book brings together leading specialists across disciplines for the first major survey of the religious politics of human rights across the world's major regions, political systems, and faith traditions. The authors take a bottom-up approach and focus particularly on hot-button issues like human rights in Islam, Falun Gong in China, and religion in the former Soviet Union. Each essay examines the interaction of human rights and religion in practice and the challenges they pose for national and international policymakers.
