CIMA MANAGERIAL STUDIES

BE PREPARED

Butterworth-Heinemann *Be prepared for your CIMA Managerial Level Studies* CIMA Managerial Studies brings you quickly and thoroughly up to speed for your Managerial Level studies by covering the key components of the CIMA Certificate in Business Accounting. CIMA tutor and author, Mike Rogers, explores the areas that are most problematic for students who are embarking on Managerial Level studies without having first completed the CIMA Certificate in Business Accounting and provides the relevant information. With summaries of key theory and a self-test Question and Answer section at the end of each chapter, this book is an essential addition to the CIMA Official Learning systems and Exam Practice Kits. Check out Mike Rogers' blog (CIMAmanagerialstudies.wordpress.com), for frequently updated information on the accounting and audit aspects of your managerial studies including changes to current International Financial Reporting Standards. •IFRS •Corporate Governance •Financial reporting •Business Maths

INTERNATIONAL FINANCIAL REPORTING STANDARDS IN DEPTH 2 VOLUME SET

FINANCIAL ACCOUNTING AND REPORTING

Providing students with the skills to prepare and analyze company-only and consolidated financial statements, this book also looks at the theory behind asset valuation and income determination, and encourages students to develop an awareness of the limitations of conventional financial statements. teaching and learning aids, such as discussion questions, reference to source material, further reading suggestions and worked examples. It is designed for undergraduate 2nd year financial accounting courses, 2nd/3rd year undergraduate business courses, and 1st year MBA/DMS courses.

UK GAAP FOR BUSINESS AND PRACTICE

Butterworth-Heinemann UK companies other than those listed on the full market or AIM will be permitted to continue using UK GAAP for several years to come. The Accounting Standards Board recently announced that it was re-considering its strategy for converging UK GAAP with IFRS. The UK Government has also brought in many company law changes in the past two years. Never in the history of financial reporting has the pace of change been so rapid. This book provides you with a concise and easily accessible guide to all the recent changes, and their likely practical impact. This new edition has been extensively updated and revised and includes: • An Executive summary of recent developments; • UITF Abstract 40 on Revenue recognition; • Financial Reporting Standard for Smaller Entities (effective January 2005); • The latest convergence developments, including summaries of comparison of UK GAAP with IFRS; • Financial instruments (FRS 25 and 26); • Events after the balance sheet date (FRS 21); • A new chapter on the UK regulatory framework, including statutory Instruments issued during 2005; • Overview of reporting requirements for listed companies. New features within the book include: • Frequently Asked Questions at the end of most chapters. • Each chapter concludes with a concise summary of relevant IFRS requirements. • References to relevant websites. The book also includes summaries of current standards and key implementation dates. [This book was previously known as: Spicer and Pegler: Financial Reporting for Business and Practice] • Practical, concise reference • Worked examples • Checklists • Chapter "what-if" scenarios • Fully updated to cover convergence of GAAP/IAS/IFRS

CONTEMPORARY MANAGEMENT ACCOUNTING PRACTICES IN UK MANUFACTURING

Elsevier This report investigates the presentation and analysis of financial information in 41 UK Manufacturing companies. Traditional and contemporary accounting techniques are exemplified in the case studies. With old and new techniques explored, the research shows that there is little that is new in management accounting theory and practice. The study concludes that there is not one set of practices which all should follow. • Cima research report - reveals methods currently used for reporting financial information in UK manufacturing companies. • Based on 41 companies, it shows a rich diversity of reporting practices that are constrained neither by the financial accounting requirements of SSAP9 nor by any sense of general management accounting trends. • Financial Directors choose from a toolkit of 'traditional' and 'contemporary' practices in constructing reporting systems appropriate to their varied commercial needs, but with a strong leaning towards contribution margin approaches.

ACCOUNTING AND FINANCE FOR MANAGERS

A BUSINESS DECISION MAKING APPROACH

Kogan Page Publishers This textbook is the ideal guide for business and management students who need to understand accounting and finance information and develop analytical skills in order to make better-informed decisions. Accounting and Finance for Managers rebukes the myth that in order to excel in accounting and finance you need to be great at mathematics. Split into two broad sections which focus on financial accounting and management accounting and finance, this textbook uses clear, accessible language that will appeal to students from a variety of academic backgrounds. Taking a uniquely practical approach that focuses on the financial aspects of business decisions, the textbook covers all the core topics of accounting and finance, including basic bookkeeping, financial analysis, business planning, cash-flow analysis and investment decisions. Now in its third edition, Accounting and Finance for Managers contains updates on new accounting standards and regulations, as well as featuring up-to-date real-world examples of real options, value chain analysis and competitive advantage analysis. This textbook features 'traditional' accounting practices in detail, but also covers topics with a strategic focus to ensure students learn to think in broader strategic terms. Written for an international audience using International Financial Reporting Standards (IFRS) terminology with supporting online resources including additional exercise questions, curated further reading and lecture slides for each chapter.

HANDBOOK OF MANAGEMENT ACCOUNTING

CIMA Publishing This book is a reference book for all Management Accountants in both small and large organisations whether in the manufacturing or service sectors. There is extensive cross-referencing so that readers are directed to topics of related interest. There are a number of themes running throughout but perhaps the two most important are: 1) cost commitment during the design process; 2)

external focus of management accounting. *The Handbook of Management Accounting* is a reference that enables practitioners to review developments and research their relevance for use in their own organisations. The book will keep you up to date on management accounting developments and techniques and serve as a constant working reference. The book focusing on four major themes of Planning, Costing, Decision Making and Control. It is packed with pragmatic contributions from a broad mix of Management Accounting experienced practitioners and leading academics who have an ability to communicate with practitioners. This new edition has been extensively updated through out and now covers reference material on corporate governance, ethical accounting, risk management and the new accounting standards. In addition there is a new case study on outsourcing. * Up-to-date information on Planning, Costing, Decision Making and Control * Pragmatic contributions from experienced practitioners and academics * Extensively updated to include material on corporate governance, ethical accounting, risk management and the new accounting standards. .

ASSET, COMPLEX ASSET AND NON-CURRENT ASSET HELD FOR SALE

INTERNATIONAL STANDARDS

CreateSpace Asset is one the major item in the financial statements of an entity, any mistake or incorrect treatment and recognition of asset in the financial statements will affect statement of profit or loss, statement of financial position and statement of cash flow. There is always a need for a comprehensive guide on the correct treatment and recognition of assets especially in our ever changing and continuous development era This book gives you clear and concise explanation of tangible non-current assets using international accounting standard 16 (IAS 16). It covers the definitions, types, various methods of calculating depreciation, the recognition of depreciation, revaluation and subsequent of assets, treatment of subsequent expenditure on assets, how to account for derecognition of an asset, deferred tax implication on revaluation of an asset and treatment of complex assets, were all discussed with illustrative examples extracted from professional examination questions Non-current asset held for sales is also discussed in line with international financial reporting standard 5 (IFRS 5). Other reporting standards are also referred to as appropriate This book covered many areas in some details with illustrative examples from professional exam questions, such as subsequent revaluation of assets and deferred tax implication on revalued asset. These are areas ether ignored or covered cursorily by major textbook around, and student often get confused when such areas are tested by the examiners This book used ACCA professional questions as illustrative example with step-by-step model solution provided by the author The book is suitable for those preparing for the examination of AAT, ACCA, CIMA, University and college students studying accounting and related courses.

THE RESEARCH-PRACTICE GAP ON ACCOUNTING IN THE PUBLIC SERVICES

AN INTERNATIONAL ANALYSIS

Springer This book considers how the practical and public policy relevance of research might be increased, and academics and practitioners can better engage to define research agendas and deliver findings relevant to accounting and accountability in the public services. To do so, an international comparative analysis of the research-practice gap in public sector accounting has been undertaken. This involved academic perspectives from over twenty countries, and practitioner perspectives from leading international professional accounting bodies actively involved in the public services arena. It was found that research is valued for informing practice, but engaging at a high level of policy engagement has been primarily by a small group of experienced researchers. For other researchers the impact accomplished may not always be valued highly in the academic community relative to other, more scholarly, activities. The book therefore looks at how engagement and impact between academics and practitioners can be increased.

MANAGEMENT ACCOUNTING

RETROSPECT AND PROSPECT

Elsevier Management Accounting is part of the celebrations to mark CIMA's 90th anniversary in 2009. It looks at the development of cost and management accounting from the founding of the Institute to today. It considers a number of immediate challenges to management accountants and surveys a range of issues and challenges that will likely affect management accounting thought and practice in the future. The authors examine the possibilities for accountants to widen their focus and become more familiar with the enterprise technology determining their organisations' cost structures and with the effects of multiple production in various locations, such as economies or diseconomies of scale. Such change may require the alteration of traditional cost models used by accountants to become more nuanced. The book suggests how this may be accomplished and highlights the need for management accountants to work as part of management teams throughout the organisation as business partners rather than remain grounded in specialist information provision roles. Alnoor Bhimani is Professor of Management Accounting at the London School of Economics. He is also a Certified Management Accountant as well as an author of 15 books and over 100 articles. Michael Bromwich was CIMA's Professor of Accounting and Financial Management at the London School of Economics and Political Science (1985 to 2006), now Emeritus. He is a Past President of CIMA (1987/88) and currently serves on CIMA's Technical Committee. A unique survey of 90 years of CIMA research Analyses the research to determine future challenges for management accounting and business practices Charts the history of management accountancy and business practice over nearly 100 years

IFRS: A QUICK REFERENCE GUIDE

Elsevier Annotation "Intended for those with an understanding of the current regulatory framework, the book sets out the basic numerical application of the International Financial Accounting Standards and includes. A thorough introduction to the accounting standard-setting process; A guide to the boards, committees and councils responsible for the standards; Detailed coverage of individual standards, including Asset Valuation, Liabilities and Group Reporting; and Published accounts of well known British and European companies."--Jacket.

SOLUTIONS

CIMA Publishing This book reflects IFRS as of the preparation of the text during 2004, and as far as possible up to the date of first publication in July 2005. Accounting Standards in Depth contains a: * Brief summary of the relevant international accounting standards * Selection of questions illustrating how international standards are used in practice and provide useful revision practice for those attempting accountancy exams The book starts with an introduction to the standard setting process, as well as looking at the development of IASB. It examines the framework for the preparation and presentation of financial statements which underpins the practice of financial accounting. The intention of the book is that the reader will be tested on basic numerical application, on an understanding of the underlying theory, and on presentation of financial statements under the international regulatory framework. The questions have been carefully chosen to test the readers ability to write good practical reports, perform calculations, and present both extracts and full sets of financial statements. * Tests the reader on numerical application, understanding of the underlying theory and presentation of financial statements * Includes questions selected from the major accounting bodies in the UK - CIMA and ACCA

RISK AND MANAGEMENT ACCOUNTING

BEST PRACTICE GUIDELINES FOR ENTERPRISE-WIDE INTERNAL CONTROL PROCEDURES

Elsevier This CIMA research report builds on a pilot study undertaken by the authors. A framework for risk management was developed as a result of the research. This research report describes the results of a major survey-based research study entitled "Risk and Management Accounting: The development of best practice guidelines for enterprise-wide internal control procedures to identify and manage risk; the contribution of and the consequences for management accountants". This CIMA research report shows: * How (and why) organizations and their management accountants develop effective internal control systems to identify and manage risk * How (and why) organizations and their management accountants construe risk in their professional and managerial roles

FUNDAMENTALS OF FINANCIAL ACCOUNTING. SUBJECT BA3

WHISTLEBLOWING ARRANGEMENTS.

ACCOUNTING: A SMART APPROACH

An ideal companion to accountancy modules for business and management students, with a unique running case study throughout to help students visualize the practical applications of accountancy and demystify abstract concepts.

MANAGEMENT ACCOUNTING HANDBOOK

A distinguished group of expert contributors provide management accountants with an overview of the latest ideas and issues in management accounting. The Handbook of Management Accounting is the standard UK professional reference book, covering all major recent developments in the area. This handbook covers the 'hot topics' of: just-in-time accounting; throughput accounting; non-financial performance assessment; cost management; strategic management; capital investment appraisal; transfer pricing. Several chapters are targeted at specific sectors including retailing, services and local government. Useful as a reference tool and an essential source for accounting and finance departments in most organizations. An essential handbook to update the management accounting professional A distinguished group of expert contributors

ACCOUNTANCY STANDARDS IN DEPTH

CIMA Publishing This new edition of Accounting Standards in Depth seeks to examine the standards in force together with the proposed changes contained within the exposure drafts. This is followed by a selection of questions which attempt to cover most of the major problem areas that students are likely to encounter. The questions have been selected from the major accounting bodies in the United Kingdom - CIMA, ACCA, ICAEW and ICAI. The book presents an introduction to the standard-setting process. As well as looking at the development of the Accounting Standards Board it examines the conceptual framework behind the practice of financial accounting including the Statement of Principles. Further chapters include sections on the key accounting problems in the balance sheet including taxation, cash flow statements, pensions, acquisitions and developments in financial reporting. The reader will be tested on numerical application, on an understanding of the underlying theory and on presentation of financial statements under the current regulatory framework. New fully updated edition Tests the reader on numerical application, understanding of the underlying theory and presentation of financial statements Includes questions selected from the major accounting bodies in the UK

ACCOUNTING

A SMART APPROACH

Oxford University Press Engaging and lively, clear and practical, this is the most applied accounting for non-specialists book whose fully integrated case study emphasises the relevance of accounting to the world of business. Sam Smart is the budding entrepreneur who forms the basis of the case study at the heart of this book. We follow Sam as he goes from starting a small business, printing sports kits for local teams, to managing a global sports business. Throughout the course of the book he assesses the success of his business, finances day to day activities, makes pricing decisions, opens new branches, looks at cash flow, and facilitates planning, control, and investment. Featured at the start of every chapter to highlight to students the implications and applications of the topic they are about to study, Sam and his business provide consistency and connection. As we follow the case study, all the topics central to accounting are covered with clarity, imagination, and relevance, giving students the support they need to complete their course and exams with confidence. The wealth of additional examples and self-test exercises available alongside the case study enable students not only to develop an appreciation of how accounting information allows a manager to make key business decisions, but also to acquire the skills necessary to enable them to converse with accountants, and challenge their assumptions and methodologies.

CHIEF VALUE OFFICER

ACCOUNTANTS CAN SAVE THE PLANET

Greenleaf Integrated Reporting is having a profound impact on corporate thinking and reporting. Value is being assessed on the basis of the sources of value creation used by an organization and not through a financial lens alone. In Chief Value Officer: Accountants Can Save the Planet, Mervyn King, a global corporate governance and reporting leader, challenges some of the systemic issues preventing organizations from managing in an integrated value-creation manner. A shareholder-centric governance model will not result in changes to corporate behavior that can create value in a sustainable manner. The book, therefore, firmly places the accountant in the position of change-maker - the finance professional today should be more of a value officer than a financial officer. Consequently, the Chief Finance Officer should be known as the Chief Value Officer. This book explains this new approach. It encapsulates the essential reasons for adopting integrated reporting, explains its application to date and proposes the next steps needed to achieve change that will improve both business and environmental sustainability.

MANAGERIAL FINANCE

Routledge Managerial Finance provides a clear and readable explanation of the most important topics managers should understand about business finance. These include resource management, investment and decision making, as well as the practical use of financial ratios and performance indicators. Real examples and case studies are used throughout to illustrate points in a practical context. The book is based upon the Management Charter Initiative's Occupational Standards for Management NVQs and SVQs at Levels 4 & 5 and is also particularly suitable for managers on Certificate and Diploma in Management programmes, including those accredited by the IM and Edexcel (formerly BTEC). Managerial Finance is part of the highly successful series of textbooks for managers which cover the knowledge and understanding required as part of any competency based management programme. The books cover the three main levels of management: supervisory/first-line management (NVQ level 3), middle management (Certificate/NVQ level 4) and senior management (Diploma/NVQ level 5). Alan Parkinson is the Hill Samuel Senior Lecturer in Accounting & Finance at the Open Business School. He was previously responsible as Director of the Open University MBA Programme for launching the highly successful MBA Course.

INSIDE ACCOUNTING

THE SOCIOLOGY OF FINANCIAL REPORTING AND AUDITING

Routledge Based on a study covering a one-year financial reporting cycle at a commercial subsidiary of a well-known scientific research organization, Inside Accounting examines how accountants and non-accounting managers construct their company's earnings. Addressing issues in both internal management accounting, such as budgeting, performance evaluation, and control, as well as external financial accounting, such as book keeping, monthly/year end accounts and auditing, David Leung focuses on how people classify transactions, make professional judgments and use computer software for accounting, and prepare for and facilitate the auditing process. He also looks at accountancy training and the impact of people's affiliations to the accounting profession or other professions on their accounting and on their perceptions of financial statements. Other contingent or contextual factors that influence the choice of accounting method, such as time pressure, reward structures, management authority and institutions are also considered. David Leung's research employs an innovative blend of theory and practice that redresses the imbalance between ethnographic studies of financial accounting, and management accounting and helps close the gap between the academic curriculum and the experiences of practitioners. His research leads the author to conclude that no act of accounting classification is ever indefeasibly correct; that the accounting community's institutions and authority are central to the accounting process and to the 'truth and fairness' of accounting numbers; that accounting training involves extensive use of learning by doing; and that both accountants and non-accounting managers have goals and interests that often result in no better than 'good enough' accounting. This book will appeal to accounting and finance professionals and academics in finance, as well as to sociologists and academic researchers interested in research methods and science studies.

SUPPLY CHAIN MANAGEMENT ACCOUNTING

THE ROUTLEDGE COMPANION TO FINANCIAL ACCOUNTING THEORY

Routledge Financial accounting theory has numerous practical applications and policy implications, for instance, international accounting standard setters are increasingly relying on theoretical accounting concepts in the creation of new standards; and corporate regulators are increasingly turning to various conceptual frameworks of accounting to guide regulation and the interpretation of accounting practices. The global financial crisis has also led to a new found appreciation of the social, economic and political importance of accounting concepts generally and corporate financial reporting in particular. For instance, the fundamentals of capital market theory (i.e. market efficiency) and measurement theory (i.e. fair value) have received widespread public and regulatory attention. This comprehensive, authoritative volume provides a prestige reference work which offers students, academics, regulators and practitioners a valuable resource containing the current scholarship and practice in the established field of financial accounting theory.
